

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: American Heritage School
School Website: <https://af.americanheritageschool.org/>

December 21, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

I'm not yet seeing the "newly attached crawl data" for a specific school (typically this is a JSON/JSONL or HTML/PDF bundle with the site text). Right now, the library only shows the general classical-education references and the lexicon, not a particular school's crawl.

To produce the full classicality audit you requested (with keyword counts, six-category ratings, Executive Summary, Abstract, and JSON output), I need the crawl content for the specific school site.

Please either:

1. **Confirm the crawl file name** if it's already uploaded

- It will usually look like something like `schoolname_crawl.jsonl`, `*_crawl.json`, or similar.
- Once I know the filename, I can search it directly and run the keyword-based audit.

or

2. **Upload the crawl data**

- Ideal formats:
 - JSON / JSONL vector store from your crawler, or
 - A small set of HTML/PDF exports (homepage, About, Academics/Curriculum, Admissions, Faith/-Beliefs, Faculty, Parents, etc.).

As soon as I can see that crawl file, I'll:

- Run the **Six Essential Elements** keyword analysis in each of the six categories using the positive/negative lexicon (truth, goodness, beauty, virtue, theology, Socratic, scholé, wonder, chanting, project-based, experiential learning, etc.)
- Compute **pos/neg hit counts**, **percent_positive**, and **percent_coverage** per category as specified in the metadata instructions .
- Assign **category ratings** (CLASSICAL / SOMEWHAT CLASSICAL / NOT CLASSICAL) and an **aggregate classicality_status**.
- Produce:
 - **Executive Summary** (with school URL),
 - **Six-category analysis** with explicit keyword lists and ratios,
 - **"What would move the needle"** (if the school is SOMEWHAT CLASSICAL),
 - **ABSTRACT** summarizing the findings,
 - **JSON OUTPUT** conforming to `school_metadata_instructions.md` (including the classicality metrics).

Once you point me to the specific crawl file (or upload it), I'll generate the complete audit.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
