

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Christ Church Academy
School Website: <https://wearechristchurch.com/>

December 21, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

Christ Church Academy La 70501 presents a classical Christian framing in its public materials, with clear emphasis on a Christian worldview, formation of character, and the goal of education oriented toward God-glorifying aims. Public content repeatedly foregrounds a Christian lens on education (e.g., "Education Is Enculturation" and discussions of a Christian worldview and biblical knowledge) and explicitly frames the goal of education as aligning with divine purposes (e.g., "to bring glory to God"). These signals align with the Religious and Metaphysical Foundations and School Purpose/Goal elements of a classical framework. However, explicit articulation of several core classical curriculum and pedagogy hallmarks (e.g., explicit Great Books/Great Conversation commitments, systematic use of Socratic dialogue in upper grades, and a fully developed public articulation of a classical pedagogy) is not consistently visible in the site's public materials. When mapped against the six-element rubric, the school shows strong Classical-leaning signals in religion and mission, and in the general formation/purpose rhetoric, but more explicit textual commitments to core classical curricula and pedagogical methods are less evident in the crawl content available here. The aggregate assessment is therefore SOMEWHAT CLASSICAL.

Key takeaways - Religious and Metaphysical Foundations are strongly present via explicit Christian worldview framing and God-centered education. - School Purpose/Goal signals emphasize formation, virtue, and a transcendent aim beyond information or job prep. - Curriculum signals (grammar/logic/rhetoric, liberal arts) are present in knowledge-base materials and some public posts, but explicit Great Books/Great Conversation commitments are not consistently evident on the site. - Pedagogy signals (Socratic, scholastic, chanting, and upper-level rhetoric) are less visible in the public site content; more robust explicit articulation would push this category toward CLASSICAL. - Faculty signals are not clearly described on the site; the knowledge-base materials emphasize "living curriculum" and modeling virtue, but direct site-based descriptions are limited. - Parents & Community signals emphasize partnership with families and parent formation in classical education, which aligns with the classical model, though explicit on-site statements are less consistently visible.

Executive Summary — Element-by-Element Snapshot

- **Element 1: Religious and Metaphysical Foundations — CLASSICAL Evidence:** Public materials foreground Christian worldview and the goal of education aligned with God-glorifying aims (Education Is Enculturation; The Goal of Education). See sources describing Christian worldview and God-centered aims.
Positive/Negative keyword analysis: Positive indicators include "Christian worldview," "biblical knowledge," "glory to God," and explicit theology-oriented framing. Negative indicators: none detected in the site material.
Why this rating: The religious and metaphysical foundations are explicit and central to the school's messaging, aligning with transcendental moral realism and theological grounding.
- **Element 2: Purpose and Goal — CLASSICAL Evidence:** The school expresses formation over mere information and emphasizes a higher telos (glory to God; formation of character). See The Goal of Education and enculturation framing. Positive/Negative keyword analysis: Positive keywords include "formation," "virtue," "human flourishing" (from classical rubrics in the knowledge base) and explicit

God-centered telos. Negative indicators: minimal if any, in the site content; the main public items emphasize formation and ultimate purpose rather than purely vocational aims.

Why this rating: The messaging centers on formation, virtue, and transcendent aims rather than job-preparation alone, which aligns with classical educational aims.

- Element 3: Curriculum — SOMEWHAT CLASSICAL Evidence: Site materials emphasize classical branding (Classical Christian School) and a liberal-arts orientation; knowledge-base documents highlight liberal arts and the Great Books framework as part of classical curricula (e.g., references to liberal arts and Great Books). Public site posts mention education as enculturation and a Christian approach to curriculum; additional support comes from the broader classical-education documents in the knowledge base.

Positive/Negative keyword analysis: Positive keywords found include “liberal arts,” “classical,” “great books” (documented in knowledge-base materials rather than explicit site copy), “grammar, logic, rhetoric,” and “Great Conversation” (per the knowledge-base rubric). Negative indicators include a lack of explicit, on-site confirmation of Great Books/Great Conversation in the crawl results and limited direct site-language about Great Books on public pages.

Why this rating: The school aligns with classical-curriculum ideals in branding and mission, and it references liberal arts, but explicit on-site commitments to Great Books and the full Great Conversation, as defined by classical criteria, are not consistently visible in the crawl materials.

- Element 4: Pedagogy — NOT CLASSICAL Evidence: The site’s public materials reviewed do not clearly describe the canonical classical pedagogical methods (Socratic seminars, scholé days, memorization chants, upper-school rhetoric training) as working practice. The classical-pedagogy signals present in the knowledge-base documents are not clearly reflected in the crawl content shown for the school. Positive/Negative keyword analysis: Positive signals (from the rubric) include Socratic dialogue, scholé, memorization/recitation (chanting), and formation through imitation. Negative signals include lack of explicit on-site references to these pedagogies.

Why this rating: Without explicit on-site articulation of Socratic dialogues, chanting/memory-work, or upper-level rhetoric pedagogy, the site does not clearly demonstrate the full standard classical pedagogy.

- Element 5: Faculty — NOT CLASSICAL Evidence: The crawl results do not provide explicit on-site descriptions of faculty as “living curriculum” or “portrait of a teacher,” though the knowledge-base documents discuss ideal teacher models in classical education. No strong on-site faculty profile is visible in the available crawl data. Positive/Negative keyword analysis: Positive keywords (from rubric) include “model teachers,” “living curriculum,” “portrait of a teacher,” “collegial” culture. Negative: absence of explicit on-site statements about faculty as living curriculum or mentor-mentee culture.

Why this rating: The school’s own site content does not clearly articulate the faculty-character signals the classical rubric requires; external documents provide the framework but are not on-site.

- Element 6: Parents & Community — CLASSICAL Evidence: Public materials emphasize partnership with families, parent formation, and community involvement in classical education (as reflected in the knowledge-base content about parent involvement and enculturation). The ICE pamphlets discuss parent formation and open-campus style engagement.

Positive/Negative keyword analysis: Positive keywords include “Partnership with Families,” “parent formation,” “home and school connection,” and “open campus.” Negative keywords: none evident in the site copy; some knowledge-base items frame these practices but not all are spelled out on-site.

Why this rating: The school aligns with classic parent-partnership and family-formation signals, which is a key element of the classical model.

Aggregate assessment: SOMEWHAT CLASSICAL - The strongest signals are in Religious/Metaphysical Foundations and in Parent Communities, with clear Christian framing and family partnership. There are clear classical-education signals in the school branding and mission, but the public crawl data lacks explicit detailing of core classical curriculum elements (e.g., consistent Great Books commitments) and canonical pedagogy (Socratic/dialogue-based teaching, scholé, and explicit upper-level rhetoric practice). Taken together, the overall profile sits between Classical and non-traditionally classical, i.e., SOMEWHAT CLAS-

SICAL.

What Would Move the Needle - Make Great Books and Great Conversation commitments explicit on the website, with representative reading lists and clear expectations for higher-level discussion and dialectic work (Element 3). - Explicitly articulate a classical pedagogy on-site, including Socratic seminars, scholé days, memorization/recitation practices, and rhetoric training for upper grades (Element 4). - Provide a visible faculty portrait or living-curriculum narrative on the site, highlighting teacher-mentorship roles, virtuous exemplars, and a formal “portrait of a teacher” (Element 5). - Expand parent-facing content that codifies parent formation, book studies, and community gatherings as ongoing, visible parts of the school’s classical program (Element 6). - Include explicit theology/theological-limb content in the curriculum and classroom practices (Element 1) to strengthen the metaphysical grounding beyond general Christian messaging.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
