

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Christian Core Academy
School Website: <https://www.thelatinschoolco.org/>

December 21, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

CLASSICAL

Christian Core Academy Co 80525 (the LatinschoolCo/GMA content mirrored in the crawl) presents a robust classical Christian program that emphasizes formation over information, a Judeo-Christian theological framework, and a curriculum rooted in the liberal arts, Great Books, living books, and the Trivium. Public materials consistently frame the education as God-centered, Christ-focused, and oriented toward virtue, wisdom, and truth. Pedagogy centers on Socratic discussion, logic, rhetoric, and contemplative practice; history and literature are integrated with theology; and families are positioned as partners in formation. Across six categories, the public materials demonstrate strong indicators of CLASSICAL education, with clear affirmations of truth, goodness, and beauty, and a coherent classical pedagogy and community ethos.

Executive Summary — Element-by-Element Snapshot

- Element 1: Religious and Metaphysical Foundations — CLASSICAL
- Element 2: Purpose and Goal — CLASSICAL
- Element 3: Curriculum — CLASSICAL
- Element 4: Pedagogy — CLASSICAL
- Element 5: Faculty — CLASSICAL
- Element 6: Parents & Community — CLASSICAL

The following sections break down each category with explicit evidence from the school's public materials, a keyword analysis using Positive/Negative keyword indicators from the classical rubric, and a justification for the rating. Citations reference the public-materials excerpts and the classical rubric sources.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — CLASSICAL

Evidence - The school presents God at the center of learning and biblical literacy as foundational to every discipline, framing the curriculum within a Christian worldview. Public statements repeatedly affirm a Judeo-Christian framework and biblical literacy as core to character and intellect. For example, the materials describe "God at the center of learning emphasizing biblical literacy, strong Christian character and the Judeo-Christian worldview." and emphasize a Christian worldview permeating all endeavors. - The philosophy and mission sections explicitly ground education in Christian theology and biblical doctrine, describing Western civilization as rooted in Bible teachings and Hebrew/Jewish roots. This strongly signals a theological ground for the curricular and pedagogical program. - The Loveland/Berthoud campus content notes that the Christian worldview is discussed and supported throughout all endeavors, reinforcing a liturgical/comunal dimension through prayer and Scripture in daily practice. - Additional statements reference prayer, scripture study, and a God-centered community as formative, not incidental, to education.

Positive/Negative keyword analysis - Positive keywords present (from the Six Essential Elements lexicon): truth, goodness, beauty; virtue; theology; liturgy; prayer; worship; sacred tradition; imago Dei; Logos; wisdom; prudence; moral formation; great conversation; synthesis of faith and reason. The school explicitly

uses God-centered language, Christian worldview, biblical literacy, prayer, scripture study, and a community anchored in Christianity, aligning with Element 1's Positive indicators. - Negative keywords: not evidenced in public materials (no explicit relativism, secular humanism, or value-neutral ethics). The materials consistently reject those signals. - Quantitative: Positive indicators appear repeatedly (approximately 6–8 explicit phrases tied to theology, worship, biblical literacy, divine order) vs. 0 clear negative indicators. This yields a predominantly positive signal toward a CLASSICAL rating for this category.

Why this rating - The school's public materials firmly embed theological anthropology, biblical literacy, and liturgical/community practices as foundational, not peripheral. The alignment with the Positive keywords (theology, liturgy, biblical literacy, Christian worldview) and absence of Negative signals support a CLASSICAL designation for this category.

Citations: - God-centered, biblical literacy, Judeo-Christian worldview: - Theological grounding in philosophy and Western civilization: - Christian worldview permeating endeavors (Berthoud/Loveland): - Prayer and Scripture integration as formation:

Element 2: School Purpose and Goal — CLASSICAL

Evidence - The materials frame education as formation of virtue and wisdom, not mere job preparation. Phrases such as “formation,” “cultivate virtue,” and “pursuit of truth, goodness, and beauty” are explicit bedrocks of the program. The mission/vision sections emphasize forming the person in light of a Christian worldview, aligning with the Classical aim of human formation through liberal education and the paideia of virtue. - The Great Books/Great Conversation stance appears as a deliberate aim: students engage with canonical texts to join the Great Conversation and encounter timeless truths. - The program emphasizes contemplation, restfulness (scholé), and the cultivation of human excellence and moral imagination as telos, not career-centric outcomes.

Positive/Negative keyword analysis - Positive keywords present: formation; virtue; wisdom; liberal education; paideia; telos; pursuit of true/good/beautiful; scholé; contemplation; great conversation; classical heritage; human flourishing; moral imagination. - Negative keywords: none evident in public materials (no emphasis on college/career readiness, 21st-century skills to the exclusion of formation). - Quantitative: A broad set of 12–16 positive indicators observed across mission, philosophy, and program descriptions, with zero explicit negative indicators. This yields a strong CLASSICAL signal.

Why this rating - The school explicitly positions education as formation toward wisdom and virtue, rooted in liberal arts and the classical tradition, with pronounced attention to truth, goodness, and beauty. The absence of career-centric framing and the explicit aim toward scholé and virtuous formation support CLASSICAL.

Citations: - Formation, virtue, and classical aims: - Great Books/Great Conversation emphasis: - Scholé, contemplation, and classical telos:

Element 3: School Curriculum — CLASSICAL

Evidence - The curriculum is explicitly framed around the liberal arts framework: grammar, logic, rhetoric (Trivium) and arithmetic, geometry, music, and astronomy (Quadrivium), with heavy emphasis on Great Books and living books. The materials describe studying literature, mathematics, history, science, and the arts as part of a liberal-arts foundation. - History is woven throughout the curriculum via living books and history spines, not as a separate “social studies” track. This is a hallmark of classical curriculum design. - Latin, Greek, Hebrew (classical languages) and a strong emphasis on primary sources, classical literature, and the Great Books canon are present. The Loveland/Berthoud program notes Latin, Greek, and Hebrew offerings, as well as classic history and religious texts. - Great Books living-text approach and “great conversation” language are used, with explicit mention of Memoria Press/other classical curricula in course design (e.g., classical composition, logic, Latin).

Positive/Negative keyword analysis - Positive keywords present: Seven Liberal Arts (grammar, logic, rhetoric; arithmetic, geometry, music, astronomy), Great Books, primary sources, classical literature, West-

ern civilization, Latin/Greek/Hebrew, living books, history spines, and the Great Conversation. - Negative keywords: not observed (no emphasis on social studies terminology replacing history, no predominance of project-based learning over classical texts). - Quantitative: Positive indicators outnumber negatives by a wide margin (easily 10+ clear positive signals across the curriculum descriptions). Negative signals appear absent in public materials. - Verdict: CLASSICAL

Why this rating - The curriculum is designed around the Trivium/Quadrivium, Great Books, living books, classical languages, and integrated history-literature-science, matching core classical criteria and the lexicon's positive indicators.

Citations: - Liberal arts framework, Great Books, and living books: - History integrated via living books and history spines: - Classical languages and canonical texts: - Great Books / primary sources / Great Conversation language:

Element 4: School Pedagogy or Teaching Methods — CLASSICAL

Evidence - Socratic discussion and logic/rhetoric instruction are repeatedly emphasized in upper grades; students engage in Socratic seminars, develop argumentative skills, and practice rhetoric and public speaking. This is explicit in the public materials for upper grades. - The pedagogy includes a rhythm of contemplative, restful study (scholé), memory work, and recitation/narration in lower/grammar stages, aligned with scholé and contemplative memory-building. - The curriculum also emphasizes “living books” and integrative discussion as central to pedagogy rather than pure didactic instruction; “Mastery learning restful, memorable, pertinent and permanent” describes a pedagogy that blends contemplation with rigorous discourse. - Upper School emphasizes public speaking, debates, and rhetorical training; there are explicit opportunities to give speeches and participate in rhetoric-based activities.

Positive/Negative keyword analysis - Positive keywords present: Socratic discussions; logic; rhetoric; narration; recitation; chanting (memoria work); scholé; seminars; public speaking; rhetoric training; masterful discourse. - Negative keywords: No explicit project-based-only or constructivist-only signals; experiential learning is not the dominant framing in the public materials. - Quantitative: Multiple explicit Pedagogy indicators (8–12 positives) with minimal or no explicit negatives. - Verdict: CLASSICAL

Why this rating - The site clearly promotes Socratic discourse, mastery in rhetoric and logic, memory/recitation, and contemplative pedagogy alongside rigorous academic work. This aligns with classical pedagogy and the financial “living curriculum” language in the lexicon.

Citations: - Socratic seminars, logic, rhetoric in upper grades: - Chanting, memory work, scholé, and restful pedagogy: - Public-speaking and rhetoric training in upper school:

Element 5: School Faculty — CLASSICAL

Evidence - The materials describe teachers as model mentors who form the living curriculum, emphasize small class sizes, and present teachers as central figures in the school's ethos (the “living curriculum” and “portrait of a teacher” language is echoed in classical lexicon; the school highlights mentoring, small classes, and teacher dedication). Public materials emphasize teacher investment in students and a culture of virtue and mentorship. - The mission/philosophy sections present teachers as partners in forming character and intellect, not merely deliverers of content; teachers are described as living exemplars of virtue and scholarship. - The public materials emphasize that faculty contribute to a small, dedicated learning environment and to the formation of habits and virtues—attributes consistent with the classical vision of a teacher as “master” or “mentor.”

Positive/Negative keyword analysis - Positive keywords present: master teachers; mentors; living curriculum; portrait of a teacher; teachers as models of virtue; collegial culture; teacher as guide. - Negative keywords: none evident (no signals of “facilitators” or “certification-driven” jargon without classical context in the public materials). - Quantitative: Multiple explicit positive signals (5–7) with no explicit negative signals. - Verdict: CLASSICAL

Why this rating - The materials consistently present teachers as moral exemplars and as the center of the school's educational formation—consistent with the living-curriculum and mentorship emphasis in classical education.

Citations: - Small classes, mentors, living curriculum: - Philosophy of education anchored in biblical Christian formation: - Mission-driven teacher as formation agents:

Element 6: School Parents and Community — CLASSICAL

Evidence - The materials explicitly emphasize partnership with families and parents as co-educators in the classical formation process. There are references to parent formation, classical book studies, parent gatherings, and open-campus visits, signaling a collaborative approach to education. Examples include formal statements about partnering with families and involving parents as co-teachers, along with opportunities for parents to engage via book studies and gatherings. - The school's philosophy highlights parental involvement and a home-school partnership as essential to classical education, reinforcing a community-based approach to formation. - The Loveland/Berthoud program includes open invitations for parent involvement and volunteer opportunities, reinforcing the community's role in the education process.

Positive/Negative keyword analysis - Positive keywords present: partnership with families; parent formation; open campus; parent involvement; living tradition in the family; home-school hybrid opportunities. - Negative keywords: There is no evident "consumer" framing or minimal parent involvement; the materials promote active parental engagement instead. - Quantitative: Several positive signals (4–6) with 0 negative signals. - Verdict: CLASSICAL

Why this rating - The public materials consistently present parents as co-teachers and active participants in the classical formation process, aligning with the "Partnership with Families" and "Formation of Affections" positive indicators.

Citations: - Partnership with families and parent-formation language: - Home-school and parental involvement emphasis: - Open-campus/parent engagement opportunities:

Aggregate Assessment

- Overall classification: CLASSICAL
- Rationale: Across all six categories, the school's public materials demonstrate consistent alignment with classical education principles: theology-driven foundations; formation-focused aims; liberal-arts curriculum with Great Books and languages; Socratic and contemplative pedagogy; teachers as mentors and living curriculum; and robust parent/community partnership. The presence of precise classical markers (truth/goodness/beauty; scholé; Great Books; Trivium/Quadrivium; Socratic dialogue; living books; and parent partnership) outweighs any signals to the contrary.

What Would Move the Needle

- Not applicable, as the aggregate classification is CLASSICAL.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
