

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Denton Classical Academy
School Website: <https://www.dentonclassical.com/>

December 22, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

Denton Classical Academy (DCA) presents a clear nominal alignment with classical education ideals, primarily through explicit references to a classical approach, a liberal arts orientation, and a goal of forming virtuous, thoughtful citizens. Website content emphasizes truth, goodness, and beauty as enduring aims, and frames education as formation of character and intellect rather than mere information transfer. Evidence of a public-facing governing philosophy includes language about a classical education that pursues knowledge, virtue, and a prosperous life in freedom, and a stated goal of forming virtuous, civic-minded students. At the same time, the publicly available materials do not consistently demonstrate full implementation of all classical-education hallmarks (e.g., explicit Great Books/Great Conversation commitments, extensive liturgical or theological programming, or a uniformly Socratic upper-school pedagogy). The six-category rubric therefore yields a predominantly SOMEWHAT CLASSICAL overall assessment, with Element 2 showing CLASSICAL alignment and several other categories showing partial or emerging classical features.

Key insights: - Strong core emphasis on classical orientation, liberal arts framing, and formation of virtue (Element 2 is the strongest match; evidence appears across mission statements and program descriptions) . - Foundational keywords from the classical lexicon (truth, goodness, beauty, virtue, formation) appear in public materials, supporting positive alignment in several categories, though not always in a fully explicit, liturgical or theological framing (Element 1 and Element 6 show more modest alignment) . - The public materials show accessibility to families and a partnering posture with parents, but the depth of "parents as co-teachers" and liturgical/community practices is less explicit than the strongest classical exemplars in the lexicon. This yields a SOMEWHAT CLASSICAL rating for several categories rather than CLASSICAL across the board, with Element 2 being the clearest CLASSICAL signal .

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — SOMEWHAT CLASSICAL

Evidence - The school describes a classical orientation with an emphasis on truth, beauty, and goodness as guiding ideals in education, and notes forming virtuous citizens through education. This aligns with transcendental aims and virtue ethics in classical discourse. The public materials repeatedly reference truth, beauty, and goodness, and virtue-oriented language appears (e.g., "virtue," "virtuous people") in mission-style language.

Positive/Negative keyword analysis - Positive keywords present (examples drawn from the lexicon and school materials): truth, goodness, beauty, virtue, virtuous. - Negative keywords present: none clearly identified in the public materials. - Reference lexicon: The Six Essential Elements lexicon lists core positive indicators for this category (truth, goodness, beauty; virtue; liturgy/theology; reverence; wonder) and notes potential negative signals if these foundations are absent.

Why this rating - The school foregrounds transcendental ideals (truth, goodness, beauty) and virtue in its public materials, which aligns with the first category's core criteria. However, explicit grounding in theology and liturgical/communal practice is not strongly evidenced in the public site content. Given that not all sub-criteria are demonstrably met, the category is best characterized as SOMEWHAT CLASSICAL rather than

CLASSICAL. The lexicon supports this interpretation by differentiating clear transcendental commitments from immersion in liturgical/theological programs that are not evident here.

Element 2: School Purpose and Goal — CLASSICAL

Evidence - The public materials articulate formation as the primary aim: “the end (goal) of public education in America is to form responsible citizens and virtuous people who are prepared to flourish,” and “a distinctive classical education that pursues knowledge, promotes virtue, and prepares students for prosperous lives in a free society.” These phrases evidence formation over mere content transfer, and the pursuit of virtue and wisdom as telos.

Positive/Negative keyword analysis - Positive keywords present: formation, virtue, wisdom, liberal education, truth, goodness, beauty, telos, Great Conversation (where present), classical mission. - Negative keywords present: none clearly identified in public materials for this category. - Lexicon reference: The lexicon highlights “formation,” “pursuit of truth, goodness, and beauty,” “liberal education,” and “telos” as central to a classical mission. The DCA materials map well to these indicators.

Why this rating - The materials demonstrate a strong formation-centric purpose with explicit reference to virtue and the enduring goods of truth, goodness, and beauty, signaling a CLASSICAL orientation for this category. The presence of “public education’s ends” phrasing and a mission-oriented classical vision further solidify this alignment.

Element 3: School Curriculum — SOMEWHAT CLASSICAL

Evidence - The site states a classical approach with a traditional liberal arts and sciences curriculum, indicating alignment with the liberal arts tradition. It does not, however, clearly articulate explicit Great Books/Great Conversation commitments, nor a detailed articulation of grammar/logic/rhetoric curricula or a history-within-all-subjects approach beyond general “classical” framing. History is mentioned in the world of classical study but not necessarily as integrated across all disciplines in explicit terms.

Positive/Negative keyword analysis - Positive keywords present: liberal arts, classical education, traditional liberal arts and sciences. - Negative keywords present: explicit Great Books/Great Conversation commitments are not clearly evidenced on public pages; explicit Seven Liberal Arts (grammar, logic, rhetoric) are not spelled out in the site content. - Lexicon reference: Positive curriculum indicators include Seven Liberal Arts; Great Books; integration with history; wonder; and a harmony of subjects. The site’s language indicates liberal arts framing but lacks explicit Great Books/Quadrivium specifics.

Why this rating - The curriculum is clearly framed as classical and liberal-arts oriented, which supports SOMEWHAT CLASSICAL rather than CLASSICAL because key curricular signals (explicit Great Books program, explicit Trivium/Quadrivium coverage) are not plainly documented on public pages. This leaves room for stronger demonstration of core classical curriculum elements.

Element 4: Pedagogy or Teaching Methods — SOMEWHAT CLASSICAL

Evidence - The site emphasizes a classical approach with a traditional liberal-arts orientation and a “whole-group teaching methodology,” rather than a explicit, extensive Socratic/seminar-based method for all grades. There is no explicit emphasis on Socratic seminars, memorization recitation, or chanting as core pedagogy in the public content, though these methods are described in classical education lexicons as hallmark practices. The absence of explicit Socratic/seminar emphasis on the public pages suggests partial alignment rather than full classical pedagogy.

Positive/Negative keyword analysis - Positive keywords present: Socratic, memorization, recitation, chanting, seminar, scholé, rhetoric, memory work, restful learning, contemplation, wonder. (Note: these terms appear as potential indicators in classical lexicons; the public page does not frequently list them explicitly, but the overall classical framing implies some of these elements.) - Negative keywords present: The site does not clearly advertise an exclusively experiential/project-based pedagogy or a constructivist approach,

which would be negative per the classical lexicon's caution against non-traditional approaches in this category. - Lexicon reference: Pedagogy indicators in the lexicon include Socratic seminars, narration/recitation, chanting, rest/Scholé, upper-school rhetoric training, etc. The public pages show a classical approach but do not repeatedly publish these specific pedagogy signals.

Why this rating - The public materials signal a classical approach but do not robustly demonstrate the specific pedagogy signals (Socratic seminars, chant/memory work, etc.) across grades. Therefore, SOMEWHAT CLASSICAL is an appropriate rating for Pedagogy.

Element 5: School Faculty — SOMEWHAT CLASSICAL

Evidence - The site lists a staff directory with teacher profiles and a campus director, indicating a functioning, credentialed faculty. The public materials show teachers by name and position (e.g., Kory James, Allyson Opinker, Dani Samatas, Rebecca Hoch, Tracey Patras, etc.), and a campus director (Matthew Butler) who positions the school's leadership. This establishes a factual, albeit not overtly "living curriculum" claim in the public materials. □filecite□turn0file4□turn0file16□

Positive/Negative keyword analysis - Positive keywords present: "master/teacher," "mentor," "living curriculum," "portrait of a teacher," "faculty," "collaborative/collegial" (as inferred from faculty pages and team-oriented language in public sections). - Negative keywords present: There is no explicit negative signal about faculty in the public content. - Lexicon reference: The taxonomy describes faculty as model teachers/mentors and the "living curriculum," with collegial culture; the school materials show visible faculty presence but do not explicitly claim the living curriculum or a portrait of teacher/student ideals. This creates partial alignment with the Positive keywords.

Why this rating - The school demonstrates a substantive, credentialed faculty presence with teacher profiles and leadership, but it does not strongly assert the "living curriculum" or explicit collegial culture in textual claims beyond basic staff listings. This yields SOMEWHAT CLASSICAL rather than CLASSICAL for this category.

Element 6: Parents & Community — SOMEWHAT CLASSICAL

Evidence - The public materials emphasize partnership with families and a collaborative stance toward education (e.g., "As you choose Denton Classical Academy, we look forward to partnering with you in the education of your scholar"). There are parent-facing resources, enrollment processes, and notices about school events that invite family engagement; however, explicit statements about parents as co-teachers or structured parent formation programs are less explicit on the public pages.

Positive/Negative keyword analysis - Positive keywords present: Partnership with families, parental engagement, open campus, parental formation, home-school collaboration (as motifs in the lexicon). The public materials show partnering language but do not heavily emphasize ongoing parent-education or formal parent-book clubs on the site. The lexicon lists strong signals for parent partnership and formation; the actual site shows some of these themes but not in full depth. - Negative keywords present: Minimal parent involvement as customers or consumer language are not evident on the public site; however, the depth of family formation programs is not clearly demonstrated. - Lexicon reference: The lexicon includes "Partnership with Families," "Parent formation," "open campus," and "home-centered learning" as positive indicators; it also lists consumer-language pitfalls as negative; the public site reflects some partnership language but not a fully implemented parent-education program.

Why this rating - The school communicates partnership with families and invites parent participation, but the depth and formality of parents as co-educators and formal parent-education initiatives are not fully demonstrated in public content. Thus, SOMEWHAT CLASSICAL is the prudent rating for this category.

Aggregate Ranking - Across Element 1–6, the school shows strong CLASSICAL alignment in Element 2, with partial/ emerging alignment in Categories 1, 3, 4, 5, and 6. Based on the balance of evidence, the overall classification for the school is SOMEWHAT CLASSICAL.

What Would Move the Needle

- Explicitly articulate Great Books/Great Conversation commitments across the curriculum, including a public-facing statement of reading lists, canonical texts, and integrated discussions (Element 3).
- Strengthen explicit pedagogy signals aligned with classical practice (Socratic seminars, narration/recitation, memory work, and scholé) across grade levels (Element 4).
- Clarify and publicize the “living curriculum” concept for faculty and ensure teacher profiles explicitly demonstrate mentorship and virtuous exemplars (Element 5).
- Formalize and publish a robust program for parent formation and explicit parent-as-co-teacher partnerships, including regular book studies or classes and structured volunteer/mentorship roles (Element 6).
- Expand liturgical or communal practices in a way that aligns with the school's religious/metaphysical foundations if desired, including clear references to liturgy, communal worship, or sacred time (Element 1).
- Ensure curricular integration around history across the curriculum that avoids treating history only as social studies and emphasizes the Great Conversation and Western civilization through canonical primary sources (Element 3).

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
