

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Fletcher School
School Website: <https://fletcherschool.org/>

December 21, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

The Fletcher School (Southwest Florida) presents a clearly Christian, classical-leaning educational model. Public materials consistently frame the school as classical and Christian, emphasizing formation, virtue, and a God-centered view of knowledge. The curriculum intentionally centers on liberal-arts structure (grammar, logic, rhetoric) and a traditional ordering of subjects, with explicit theological grounding and emphasis on the formation of character. However, certain pedagogical elements typical of a full Classical model (notably explicit Socratic pedagogy and a fully articulated "living curriculum" in faculty practice) are less clearly demonstrated in the publicly accessible materials. Taken as a whole, the school sits squarely in the Classical spectrum in several core domains, while showing partial alignment in others.

Overall classification by category: - Religious and Metaphysical Foundations: CLASSICAL - Purpose and Goal: CLASSICAL - Curriculum: SOMEWHAT CLASSICAL - Pedagogy: SOMEWHAT CLASSICAL - Faculty: NOT CLASSICAL - Parents & Community: CLASSICAL

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — CLASSICAL

- Evidence
 - The school presents itself as "Classical Christian Education" with Christ-centered and theology-governed pedagogy; materials describe a divinely centered, biblical framing of education (e.g., "Governed by Theology," "Christ Centered," "All Truth Is God's Truth," and explicit Christian formation language) .
 - Public texts emphasize the integration of faith with learning and the pursuit of truth under a theological framework (e.g., "Christian Education flows from a conviction regarding the truths of God's revealed Word") , and the Vision statements explicitly articulate a divinely ordered whole with Christ at the center .
- Positive/Negative keyword analysis
 - Positive indicators: theology, Christ-centered, Christian, Bible, All Truth Is God's Truth, divinely ordered, virtue, wisdom, eloquence, formation.
 - Negative indicators: explicit secular/anti-theist signals are not present; the one explicit counter-signal is a brief nod to secularization of modern education as a concern (presented as a reason for the school's stance, not as a value in itself).
 - Net: strong positive signal; minor negative signal around secularization (as a critique of others, not a focus of the school's own pedagogy) , , .
- Why this rating
 - The materials consistently frame education through a theological lens, with explicit Christian doctrine, scripture-based formation, and the claim that truth is God-ordained. This aligns with the Positive keywords in the Six Essential Elements lexicon (e.g., theology, liturgy, wisdom, virtue, transcendental truth) and with the Lexicon's positive signal about a sacred, transcendent frame for learning. The absence of explicit, systemic liturgical practices in every classroom context is a potential gap, but the theological grounding and Christ-centered framing strongly support CLASSICAL on this category.

Element 2: School Purpose and Goal — CLASSICAL

- Evidence
 - The school’s stated purpose centers on formation, virtue, wisdom, and the realness of truth, goodness, and beauty; the mission emphasizes forming the whole person and cultivating human excellence rather than mere job preparation (e.g., “Education for the Whole Person; Mind, Body, Soul”; “the goal is formation, not mere information”) , , .
 - The Vision emphasizes pursuing goodness, truth, and beauty within a divinely ordered framework, and the text repeatedly anchors education in virtue, wisdom, and eloquence (e.g., “virtue, wisdom, and eloquence”; “pursues goodness, truth, and beauty”) , .
- Positive/Negative keyword analysis
 - Positive indicators: formation, virtue, wisdom, truth, goodness, beauty, liberal education, contemplation (Scholé), integral formation, human flourishing, soul formation, great conversation (implicit in classical aims).
 - Negative indicators: minimal explicit emphasis on workforce-readiness or career metrics; no explicit secular teleology.
 - Net: strong positive signal; essentially CLASSICAL in aims and teleology; limited conflicting signals , , .
- Why this rating
 - The materials articulate a classical teleology—a formation-centric view of education anchored in truth, beauty, and virtue. The emphasis on a divinely ordered whole with a Christ-centered frame aligns with Classical education’s purpose-driven, formation-first aims. The strong focus on formation over information, plus a stated aim to cultivate virtue and wisdom, justifies CLASSICAL here.

Element 3: School Curriculum — SOMEWHAT CLASSICAL

- Evidence
 - The Fletcher curriculum structure is explicit in liberal-arts fashion: five segments (Primary, Lower Grammar, Upper Grammar, Logic, Rhetoric) and a set of classical subjects (Latin, Bible, History/Geography, Literature, etc.) at various stages , .
 - The Grade Offerings document shows a progression aligned with the Trivium (grammar, logic, rhetoric) and includes traditional subjects such as Latin, Bible, Composition, Classical Studies, Debates, and Rhetoric (Rhetoric track for upper levels) , .
 - There is explicit mention of a classical framing (e.g., “What is Classical Education?” page); the materials describe a classical, integrated approach and emphasize traditional study rather than purely social studies or modern curricular shifts , .
- Positive/Negative keyword analysis
 - Positive keywords present: Seven Liberal Arts (grammar, logic, rhetoric); Trivium/Quadrivium; Great Books/Great Conversation (mentioned in the lexicon and implied through the Classical framework); Latin; History; Classical Studies; Poetry in literature; sacred/western-civilization orientation.
 - Negative keywords: Not explicitly present; however, Great Books are not consistently quoted with a robust “Great Conversation” mission in the explicit page text (though it is implied via classical framing and public materials sometimes reference “classical” canon Elements). The public materials do not consistently present a complete Great-Books program with direct quotations of canonical authors.
 - Net: SOMEWHAT CLASSICAL. The school demonstrates strong classical curricular scaffolding (grammar-logic-rhetoric; Latin; Bible; History; Literature) but lacks explicit, consistently articulated full Great-Books and “Great Conversation” language in every public-facing page; the explicit articulation of Great Books/Great Conversation is present in the lexicon and in some pages but not uniformly demonstrated across all public materials. See supporting lines above for curriculum structure references , , .
- Why this rating
 - The curriculum is rooted in classical forms (grammar-logic-rhetoric; languages; historical-literary

emphasis; sequential grammar-to-rhetoric progression). Yet the public-facing materials do not consistently spell out a comprehensive Great Books/Great Conversation program across all grade levels, nor do they always foreground a multi-decade, canonical Western canon in explicit language. This yields a mark of SOMEWHAT CLASSICAL rather than CLASSICAL for Curriculum.

Element 4: School Pedagogy or Teaching Methods — SOMEWHAT CLASSICAL

- Evidence
 - The public materials emphasize classical pedagogy elements (logic, rhetoric, grammar progression; upper-level rhetoric; debate; speech; and rhetorical training) with a track to “Rhetoric” in high school and a focus on classical disciplines; this points to a pedagogy that embraces disciplined reasoning and public speaking (e.g., logic, composition, classical studies, debate, and rhetoric) , .
 - There is explicit mention of a traditional, integrated curriculum and focus on formation and virtue, aligning with the classical pedagogy ethos (e.g., “formation through the liberal arts”; “the goal is formation, not mere information”) , .
 - Distinctive pedagogical practices like Socratic seminars, scholé/restful learning, memorization/recitation, and deliberate “living curriculum” are present in the classical lexicon, but explicit adoption by Fletcher (e.g., schedule, explicit Scholé days, singing/chanting for memory, or Harkness-style dialogues) is not consistently documented in the public pages. The public materials do, however, emphasize rhetoric and debate as an upper-school emphasis, which is a Classical hallmark but not necessarily a full Socratic pedagogy across grades , .
- Positive/Negative keyword analysis
 - Positive indicators: Socratic dialogue (not explicit in Fletcher’s public pages, but the lexicon signals its importance; the site does show rhetoric/debate and classical reasoning in the upper grades); scholé/restful learning (mentioned in the lexicon, but not clearly evidenced in Fletcher’s site as a formal program); memorization/recitation (not explicitly described in Fletcher’s pages, though Latin/Bible and memory work are common in classical curricula).
 - Negative indicators: Lack of explicit, uniform Socratic seminars or a fully documented “Scholé-based” restful pedagogy; absence of detailed lower-grade singing/chanting (as a formal practice) in the public materials.
 - Net: SOMEWHAT CLASSICAL. The school demonstrates classical elements (grammar-logic-rhetoric; rhetoric, debate, logic; integrated curriculum) but does not consistently present explicit Socratic pedagogy, Scholé days, or fully documented memory/singing practices across grade bands in public-facing content.
- Why this rating
 - The presence of a clear classical track (grammar-logic-rhetoric; high-school rhetoric; Latin/Bible; debate) aligns with CLASSICAL pedagogy in spirit, yet the explicit cadence of Socratic discussion, restfulness, and daily contemplative learning is not consistently documented in the public site content. That mix yields a SOMEWHAT CLASSICAL rating for Pedagogy.

Element 5: School Faculty — NOT CLASSICAL

- Evidence
 - Public texts do not provide a detailed portrayal of the faculty as living curriculum, model teachers, or a “portrait of a teacher” that characterizes the faculty as virtuous mentors (the lexicon’s ideal for faculty is not mirrored with explicit statements on the Fletcher site). The “Faculty” category is not substantiated through explicit statements in the public materials; the content focuses on mission, vision, and program structure rather than faculty portraits or professional development in classical pedagogy. The absence of explicit statements about faculty as mentors or the living curriculum is notable here.
- Positive/Negative keyword analysis
 - Positive indicators: None explicitly documented in public pages about faculty in the classical sense (e.g., “model teachers,” “living curriculum,” “faculty of friends,” or “master-teacher model”).
 - Negative indicators: The lack of explicit faculty descriptions and living-curriculum language in the public materials could be interpreted as a missing classical signal for this category.

- Why this rating
 - Without explicit public content describing teachers as mentors or a “living curriculum,” the category fails to demonstrate the explicit Classical faculty signals emphasized by the Six Essential Elements lexicon. Therefore, NOT CLASSICAL for Faculty based on publicly available content.
- Citations
 - Public-facing faculty-specific language is not evident in the accessible Fletcher materials; the available pages emphasize mission, vision, and curriculum rather than faculty portraits or mentorship language. See general mission/vision and program pages for context: , , .

Element 6: Parents & Community — CLASSICAL

- Evidence
 - The materials foreground the role of parents within a Christian-classical frame; explicit statements include “The Duty of Parents” (Bible-based instruction for family formation) and the emphasis on partnership with families, with statements about responsible Christian upbringing and biblical instruction for children (Ephesians 6:4; Deuteronomy 6) and “parents as co-educators” being implied in the mission’s language and the school’s theology-driven parenting stance , .
 - The Vision explicitly positions the school as serving parents in providing a classical and Christian education, reinforcing parental involvement and family partnership in the education journey .
 - The site also emphasizes the need for parental engagement and a home-centered approach, consistent with classical-parent partnership themes in the lexicon (Partnership with Families; Family involvement; parental formation) as suggested by the Six Essential Elements lexicon , though not always in explicit phrasing on the Fletcher pages. The public materials do show explicit parental involvement language and a call to align home-life with school formation.
- Positive/Negative keyword analysis
 - Positive indicators: partnership with families, parental formation, family involvement, home-school alignment, parental engagement, parental leadership, school-parent synergy.
 - Negative indicators: None explicit in the Fletcher public materials; no consumerist language or reduced parental access is evident; the site invites parental involvement and visits through program content and vision statements.
- Why this rating
 - Based on explicit references to parental role, biblical instruction for families, and the school’s stated aim to serve parents through classical and Christian formation, Parents & Community earns CLASSICAL. The content strongly aligns with the Six Essential Elements’ Positive Keywords for this category (partnership with families; formation of affections; cultural transmission), and the absence of disqualifying signals supports CLASSICAL here.

What Would Move the Needle

- Concrete curriculum clarity around Great Books/Great Conversation and primary-source reading explicitly stated in public materials, including a published Great Books list and a timeline showing reading across grades.
- Explicit articulation of Socratic pedagogy or Harkness-style discussions in high school and explicit restfulness Scholé days or contemplative practices in lower and middle grades, with public-facing language and examples.
- A clearly articulated “living curriculum” section for Faculty that showcases teacher mentorship, professional development in classical pedagogy, and the living-curriculum model.
- Greater explicit documentation of a robust, two-way partnership with parents, including regular parent education programs (books clubs, gatherings) and open-campus policies with explicit benefits for parental involvement.
- More explicit Great-Books canon references, primary-source integration, and historical-civilizational context as a consistent curricular thread across grades, not only in select pages.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
