

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Holy Family Academy

School Website: <https://holyfamilyhomeschoolapostolate.com/index.html/>

December 27, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

Holy Family Academy La 70433 currently presents no accessible public content that demonstrates the core hallmarks of a Classical Christian education according to the Six Essential Elements framework. The available crawl data for the school's site returns a 404 page, with no substantive text to indicate a liturgical or theological grounding, Great Books participation, or a classical pedagogy (e.g., Socratic inquiry, memory work, or the Trivium). This lack of public, textual evidence on the school's site strongly limits the ability to confirm classical practices or align with the Classical rubric. The crawl evidence is explicitly a 404 (no content) for the site URL observed, which suggests either an inactive/defunct page or content not captured in the crawl.

To ground the rubric in what classical education typically requires, I reference the knowledge-base materials that define the Six Essential Elements and their positive/negative keyword indicators. The classical rubric emphasizes: the Liberal Arts (grammar, logic, rhetoric); Great Books and the Great Conversation; Scholé (restful, contemplative learning); liturgical and communal practices; a living, virtue-forming faculty; and active parent partnership and community. Positive indicators are terms like truth, goodness, beauty, theology, liturgy, reverence, wonder, Great Books, Great Conversation, scholé, and partnership with families; negative indicators include secular, project-based-only, lack of memory work, and lack of formation through imitation and practice. These keyword indicators are laid out in the classical lexicon and Six Essential Elements documents.

Overall, based on the absence of public, textual evidence from the school site and the rubric's criteria, the school is classified as NOT CLASSICAL.

Key contextual citations: - Public-materials gap and 404 evidence for the Holy Family Academy La 70433 crawl: 404 page observed in the crawl data. - Classical rubric framework (Six Essential Elements) and examples of required elements (Great Books, scholé, liturgical practice, etc.). - Positive/negative keyword indicators for each category (Religious Foundations, Purpose, Curriculum, Pedagogy, Faculty, Parents/-Community) from the classical lexicon.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — NOT CLASSICAL

- Evidence
 - Public-site crawl for Holy Family Academy La 70433 yields no textual content to anchor transcendental or liturgical foundations; the observed crawl item shows a 404 page with no usable content. This provides no explicit evidence of transcendental moral realism, theology integration, liturgical practice, or communal worship embedded in curriculum.
- Positive/Negative keyword analysis
 - Keywords from the positive list include truth, goodness, beauty, theology, liturgy, reverence, wonder, sacramental worldview, and logos. No such terms are evidenced on the public crawl content (the page is effectively empty). Negative indicators (relativism, secular humanism) are also not evidenced in public content due to absence of text.

-
- Quantitative note: 0 positive keywords observed; 0 negative signals observed (due to lack of textual content to analyze). See lexicon framework for what counts as these keywords.
 - Why this rating
 - Without public-facing text to indicate transcendental aims, liturgical life, or theological grounding, the category cannot be demonstrated as CLASSICAL. The absence of explicit religious-metaphysical articulation in the site content leads to a NOT CLASSICAL rating for this category.

Element 2: School Purpose and Goal — NOT CLASSICAL

- Evidence
 - The crawl reveals no mission statements or articulated telos oriented to virtue formation, wisdom, or the True-Good-Beautiful framework. No public-language hints at paideia, liberal education, or formation-focused aims are visible in the captured content.
- Positive/Negative keyword analysis
 - Positive indicators would include formation, virtue, wisdom, telos, scholé, Great Conversation. None are evidenced in the crawled content. Negative indicators would include “college-ready/workforce-ready” emphasis; none is documentary in the crawl text due to lack of content.
 - Quantitative note: 0 positive keywords; 0 negative indicators visible in the publicly accessible material (per the captured page). See the Six Elements lexicon for the exact terms.
- Why this rating
 - Without explicit articulation of formation toward virtue/wisdom or the True-Good-Beautiful as a guiding telos, the category cannot be rated Classical. The public materials do not show the formation- vs. information-structure dichotomy called out in the classical rubric.

Element 3: School Curriculum — NOT CLASSICAL

- Evidence
 - No Great Books readings, no explicit Great Conversation framing, no mention of liberal arts (grammar, logic, rhetoric), and no historical-civilizational curricula are evidenced in the crawl capture of the site. The observed content is effectively non-existent text.
- Positive/Negative keyword analysis
 - Positive keywords from the six-element lexicon include Great Books, primary sources, grammar, logic, rhetoric, history as Western civilization, etc. No such items are publicly visible in the crawl data for the school site.
 - Quantitative note: 0 positive curriculum keywords; 0 negative indicators within the public-crawl text (due to no content).
- Why this rating
 - The absence of explicit Great Books participation, grammar/logic/rhetoric emphasis, or a historically-rooted curriculum in the public content constitutes a NOT CLASSICAL designation for Curriculum.

Element 4: School Pedagogy or Teaching Methods — NOT CLASSICAL

- Evidence
 - The crawl content yields no substantiating pedagogical descriptions (e.g., Socratic seminars, memory work, chanting, scholé days, or high-school rhetoric/speeches). The observed page is a 404 with no pedagogy text.
- Positive/Negative keyword analysis
 - Positive indicators in pedagogy include Socratic discussion, narration/recitation, chanting, restfulness/scholé, and rhetoric/debate. No such language is present in the crawl text; thus no positive signals are detected. Negative signals (experiential learning, project-based only, constructivist) are not evident due to lack of content to judge.
 - Quantitative note: 0 positive pedagogy keywords; 0 negative signals present in the visible content.
- Why this rating

-
- Without explicit evidence of the classical pedagogy (Socrates, seminary-style discussions, memory work, or arching rhetoric training), the category falls to NOT CLASSICAL.

Element 5: School Faculty — NOT CLASSICAL

- Evidence
 - The visible crawl for the school site shows no “faculty-as-living-curriculum,” no teacher portraits, and no discussion of mentorship or classical formation of teachers. The public capture is text-poor, showing no faculty details.
- Positive/Negative keyword analysis
 - Positive faculty keywords include mentors, living curriculum, portrait of a teacher, collegial culture, lifelong learners, etc. These are not evidenced in the publicly accessible material. The absence yields 0 positive and 0 negative signals in the crawl text.
 - The knowledge-base lexicon provides the ideal phrases as placeholders for evaluation; none are evidenced here.
- Why this rating
 - With no public descriptions of faculty roles, mentorship, or exemplar-teachers, the category cannot be classified as Classical.

Element 6: School Parents & Community — NOT CLASSICAL

- Evidence
 - The crawl content captured shows no statements about parent partnerships, co-educators, or family formation within the school community. The 404 page yields no content to indicate parent engagement practices.
- Positive/Negative keyword analysis
 - Positive indicators (Partnership with Families, parent formation, open campus, etc.) are not evidenced in the public crawl. Therefore, 0 positive keywords; 0 negative signals visible here.
 - The Six Elements lexicon lists these as critical indicators; absence of text means they cannot be demonstrated publicly.
- Why this rating
 - Without public mention of parent engagement, co-education, book studies, or open-visits, this category cannot be rated Classical.

Aggregate assessment across all six categories: NOT CLASSICAL

- The overall public-materials footprint for Holy Family Academy La 70433 does not demonstrate the six-element classical framework, largely due to a lack of accessible textual content in the crawl data and the absence of publicly visible evidence of Great Books, scholé, liturgy, or parental partnerships. The authoritative classical rubric relies on evidence of these elements in curriculum, pedagogy, and community, which are not present in the observed crawl materials. The knowledge-base lexicon confirms the indicators we would expect to see for a Classical program, but the public content does not exhibit them.

What Would Move the Needle

- Not applicable: No category is ranked SOMEWHAT CLASSICAL, and the aggregate is NOT CLASSICAL. The rubric invites explicit textual evidence; to move toward CLASSICAL, the school would need to publish or clearly articulate at least the following on its public site:
 - A stated telos focused on truth, goodness, and beauty, with formation toward virtue and wisdom (Scholé and Paideia language).
 - A documented curriculum centered on liberal arts (grammar, logic, rhetoric) and the Great Books / Great Conversation, including history framed as Western civilization and not merely “social studies.”

-
- Pedagogy that includes contemplative practice (Scholé), memory work, chanting, and Socratic/seminar-based inquiry appropriate to high school (or appropriate K-8 sequences) with explicit articulation for grades K–12.
 - Faculty profiles that describe teachers as living curriculum, mentors, and community-building figures; a clear image of the teacher-student relationship as a shared culture.
 - Active parental partnership with formal parent-education opportunities, book clubs, and parent visitation rights, with a visible, ongoing program for parent formation.
 - Communal liturgical or ritual practices integrated into the school culture (worship, liturgy, sacred music) where appropriate to the school's religious identity.
- If the school intends to pursue CLASSICAL alignment, the public-facing materials should explicitly state and demonstrate these elements, with explicit references to Great Books, scholé, grammar/logic/rhetoric, Great Conversation, liturgy, and family partnership in evidence-rich language on the site. See the Six Essential Elements and the Positive/Negative Keyword lexicon for guidance on the exact terms to feature.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
