

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Kingdom Collegiate Academies
School Website: <https://ourkca.org/>

December 22, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix for more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

Kingdom Collegiate Academy (KCA) presents a clearly religiously rooted, college-preparatory program that bills itself as incorporating classical education with a Kingdom worldview. Public materials emphasize biblical instruction, weekly chapels, and a Kingdom Agenda philosophy, alongside modern, 21st-century learning tools and college-preparatory aims. The school publicly frames its mission around formation within a Christian milieu, leadership development, and high academic expectations, while also highlighting accreditation and partnerships with faith-based organizations.

Overall classification (six-category rubric): SOMEWHAT CLASSICAL.

Rationale: The school elevates classical education as a core frame (explicitly described as "classical education" in its materials) and demonstrates elements of the classical structure (e.g., disciplined curriculum, emphasis on formation, and some dialogic/critical-thinking aspects in middle/high school). However, explicit classical pillars such as Great Books, routine Socratic seminars, emphasis on grammar-logic-rhetoric as a formal liberal-arts sequence, and the full Great Conversation are not consistently evidenced across all grade bands in the public materials. The religious-metaphysical foundations are robust and align with classical aims, which strengthens the classical profile, but the degree to which the curriculum and pedagogy fully embody the historic liberal-arts trivium as described in the classical rubric is partial rather than comprehensive. See category-by-category analysis for details and keyword evidence.

What would move the needle: - Add explicit Great Books/Great Conversation components and visible integration of grammar-logic-rhetoric as distinct stages within the curriculum. - Tie higher-level discourse and Socratic-style seminars more clearly to upper grades, with documented opportunities for student-led rhetoric and public speaking. - Provide concrete alignment of "formation" with explicit virtues and linking activities (e.g., memory work, recitation, and liturgical or contemplative practices) in lower grades where appropriate. - Expand and document parents-as-co-teachers initiatives and more formal "community-learning" moments (book studies, parent seminars) to meet the full range of classical-school family-partnership expectations.

Citations: The analysis draws on KCA materials indicating biblical worldview, Kingdom worldview, chapels, and faith-based mission ([2], [3], [11], [12], [18]), as well as curriculum details (core subjects, literacy, math, science, social studies, and chapel-based formation) ([13], [3], [14], [2]). Evidence of accreditation and partnerships is noted ([0], [3], [11]). See inline citations throughout the category sections for specific evidence.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — [CLASSICAL]

Evidence - The site emphasizes a Biblical Worldview as a core framing of academic excellence (e.g., "In Academic Excellence with a Biblical Worldview"). - Kingdom worldview and biblical philosophy are repeatedly highlighted as guiding principles (e.g., "Kingdom worldview," "Kingdom Agenda Philosophy") and theological framing within curriculum and school culture.

- Weekly chapels and a Word of God focus are described as integral to student life and spiritual formation.

Positive/Negative keyword analysis - Positive keywords present: biblical worldview, kingdom worldview, Word of God, weekly chapels, Bible integration (5 unique positives).

- Negative keywords present: none clearly evidenced in public materials (no explicit secularizing or anti-religious signals detected in the available pages).

Why this rating - There is a strong, explicit religious/metaphysical program centered on scripture, worship, and faith-informed formation, which aligns with the classical emphasis on transcendental moral realism and theological grounding signals. The public materials stress that education occurs within a biblical/kingdom framework, including liturgical aspects (chapels) and Word-of-God teaching, which fits the category's criteria. The evidence supports a CLASSICAL designation for this category.

Abstract citations: Biblical Worldview line ([2]); Kingdom Worldview and Kingdom Agenda ([11], [12]); Weekly Chapels and Word of God ([3], [12]).

Element 2: School Purpose and Goal — [SOMEWHAT CLASSICAL]

Evidence - The mission emphasizes a superior collegiate education in a nurturing Christian environment, with a Kingdom worldview that “impacts the culture” and helps students reach their highest potential. This centers formation and character within a Christian frame. - The language foregrounds formation, virtue-oriented aims, and the cultivation of a Kingdom worldview, suggesting formation more than merely job-preparation. - The school frames itself as a college-preparatory academy that integrates faith, virtue, and leadership development within 21st-century learning contexts.

Positive/Negative keyword analysis - Positive keywords: Kingdom worldview, nurturing Christian environment, formation/leadership/ College-preparatory framing (3–4 positive concepts). - Negative keywords: None clearly evident in the public materials (no explicit vocational-work-preparation emphasis that would conflict with formation focus).

Why this rating - The school emphasizes formation, virtue-oriented aims, and the integration of faith with education, which align with the classical concept of education as formation of character and wisdom. However, explicit language about virtue-and-wisdom as the sole/primary aims, separate from college-prep or Kingdom-identity, is less overt than the strongest classical formulations. Therefore, this category is judged SOMEWHAT CLASSICAL rather than CLASSICAL.

Abstract citations: Mission and Kingdom worldview language ([11]); formation and worldview emphasis ([2]).

What would move the needle (for category 2) - Add explicit statements that the goal of education is virtue and wisdom apart from job-work preparation, with concrete examples (e.g., virtue-based outcomes, character formation rubrics). - Provide a formal articulation of the “great conversation” and how it informs purpose and goals beyond college prep.

Element 3: School Curriculum — [SOMEWHAT CLASSICAL]

Evidence - The curriculum is described as “rich with classical education,” indicating a classical frame and alignment with timeless liberal-arts aims, while also integrating modern tools. - Core K-12 subjects are listed (Reading/Language Arts, Mathematics, Science and Technology, Social Studies, Fine Arts, Physical Education, Spanish) and include weekly chapels, with Bible/Kingdom worldview integrated throughout. - The elementary and middle programs emphasize academic rigor, active engagement, project learning, and technology integration.

Positive/Negative keyword analysis - Positive keywords present: classical education, academic rigor, active engagement, technology integration, biblical worldview, Kingdom worldview, weekly chapels. (5–6 positives) - Negative keywords present: project learning (flagged in classical-education lexicon as a potential non-classical element), which appears in some pages.

Why this rating - The explicit declaration of classical education and the presence of a rigorous curriculum with a mix of classical framing and modern technology position the school as CLASSICAL in spirit. However, explicit Great Books/Great Conversation and the formal liberal-arts sequence (grammar, logic, rhetoric) are not consistently documented in public materials. The combination yields a SOMEWHAT CLASSICAL rating rather than full CLASSICAL.

Abstract citations: Classical education phrase ([2]); core curriculum elements and chapels ([13]); emphasis on biblical worldview and reformulation of curriculum ([11], [12]).

What would move the needle (for category 3) - Clearly document and publish a formal liberal-arts sequence (grammar, logic, rhetoric) and the inclusion of Great Books or Great Conversation elements in appropriate grade bands. - Explicitly map the curriculum to the Great Books tradition and demonstrate cross-disciplinary integration of classical topics beyond basic subject areas.

Element 4: School Pedagogy or Teaching Methods — [SOMEWHAT CLASSICAL]

Evidence - The middle school notes higher-level thinking and discussions about academic and professional careers, indicating dialogic pedagogy in the upper grades. - The program highlights that lower grades may involve singing and memory work, pointing to some contemplative/experiential elements in early-childhood pedagogy, alongside recitation and memory-friendly practices. - Upper school emphasis on discussion, seminars, and debates is implied (Socratic/argumentation skills are a hallmark of classical pedagogy), though explicit references to Socratic seminars or rhetoric instruction are not strongly documented in the public materials.

Positive/Negative keyword analysis - Positive keywords present: higher-level thinking, discussions, seminars/debates (implied), discourse-based learning (3–4 positives). - Negative keywords present: project-based approach is visible in curriculum language, which classical pedagogy sometimes views with caution (e.g., “project learning” could be a negative indicator in strict classical rubrics).

Why this rating - The pedagogy shows a mix of dialogic, inquiry-oriented elements (discussions, higher-level thinking) and contemporary, technology-enhanced approaches (21st-century learning, active environments). The absence of consistently explicit, classroom-wide Socratic seminars and rhetoric-focused training across all high-school grades dampens a full CLASSICAL Pedagogy rating. Hence, SOMEWHAT CLASSICAL is appropriate.

Abstract citations: Middle school discussions/higher-level thinking ([3]); lower/upper-grade pedagogy language including dialogue and seminars is implied in the content ([3]).

What would move the needle (for category 4) - Document concrete Socratic seminars and seminars/debates as a core pedagogy across grades, with rubrics for rhetoric and public speaking. - Publish detailed syllabi showing explicit grammar/logic/rhetoric integration and Great Books-style discussion prompts tied to core subjects. - Showcase explicit evidence of contemplative and restorative practice (scholé-like idle time or reflective learning) in the lower grades.

Element 5: School Faculty — [CLASSICAL]

Evidence - The site presents the faculty as capable of challenging students to their potential and emphasizes a high standard of teaching with formal accreditation steps (certified faculty). - Descriptions of the faculty as mentors and contributors to a “living curriculum” appear in classical-school lexicon, with teachers identified as core to the school’s mission (per the knowledge-base framing and public materials). The walking emphasis is on teacher quality and formation.

Positive/Negative keyword analysis - Positive keywords present: certified faculty, mentors, living curriculum, teachers as core (2–3 positives). - Negative keywords present: none evident in the publicly available

materials.

Why this rating - The materials emphasize a high-quality teaching staff and a teacher-centered approach (faculty as mentors and core). While not every classical frontier term (e.g., explicit “portrait of a teacher” or “model teachers”) is spelled out in every page, the core elements align strongly with a CLASSICAL rating for Faculty.

Abstract citations: “Our certified faculty ensures...” ([11]).

Element 6: School Parents and Community — [SOMEWHAT CLASSICAL]

Evidence - The school notes partnerships with faith-based institutions (Oak Cliff Bible Fellowship and partnering organizations) as well as community-rooted support structures. - Public materials discuss enrollment processes, open houses, and visit opportunities, indicating some formal engagement with families and the broader community. - The donor/donate section emphasizes ongoing community engagement and funding for programs, facilities, and technology aligning with a broader school-community ecosystem.

Positive/Negative keyword analysis - Positive keywords present: partnership with faith-based organizations (Kingdom/Oak Cliff Bible Fellowship); community and family engagement (donations, events); “Schedule a Visit/Open House” for family engagement (3 positives).

- Negative keywords present: none explicitly signaling rejection of parent involvement; however, explicit “parents as co-teachers” language is not clearly demonstrated in the public materials.

Why this rating - The school shows meaningful community partnerships and accessible family engagement channels, but explicit language about parents as co-teachers and formal parent-education programs (book studies, parent gatherings) is not consistently evidenced in the public materials. This places Element 6 in SOMEWHAT CLASSICAL.

Abstract citations: Oak Cliff Bible Fellowship partnership ([12]); Visit/Open House sections ([18]); Donation and community support information ([5]).

What Would Move the Needle

- Explicitly document and publish a formal Great Books/Great Conversation program and show how grammar-logic-rhetoric are sequenced across grades.
 - Add clear, public evidence of Socratic seminars, textual study groups, and explicit rhetoric training in upper grades (with rubrics and sample transcripts or outcomes).
 - Augment the “formation” narrative with concrete virtue-outcome metrics and real-world examples of character formation integrated into daily classroom practice.
 - Strengthen parent-facing materials that describe parents as co-teachers and outline structured parent learning opportunities (book studies, workshops) with schedules and outcomes.
 - Increase transparency about the balance between classical forms and 21st-century tools to demonstrate how both converge in daily pedagogy across all grade levels.
-

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
