

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Logos Christian Academy
School Website: <https://logosfallon.org/>

December 27, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools ACCS or the Society for Classical Learning SCL is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

Logos Christian Academy NV 89406 (Fallon, NV) presents a robust Christian classical orientation, anchored in explicit theology, formation aims, and a developing classical pedagogy. Public materials emphasize a Christ-centered epistemology (the Logos as source of true knowledge), a liturgical cadence (chapel and worship-oriented culture), and a commitment to Latin study and a traditional, teacher-centered approach. While these elements align with several core features of classical education, the public materials show more explicit emphasis on theology, formation, and specific pedagogical steps (e.g., pre-logic to logic and rhetoric) than on a fully articulated liberal-arts curriculum or a complete Great Books-based program. As a result, Logos Fallon sits toward the classical spectrum but stops short of full, explicit implementation of all six elements in the classical rubric. Overall classification: SOMEWHAT CLASSICAL, with strong CLASSICAL elements in religious foundation, pedagogy, and faculty, and partial alignment in curriculum breadth and parent/community articulation.

Executive Summary — Element-by-Element Snapshot

- **Element 1: Religious and Metaphysical Foundations — CLASSICAL** Evidence from public materials shows a theologically grounded program: identity as Logos (the Word) and a claim that all true knowledge resides in Christ; publicly stated faith commitments and liturgical practice (chapel) are embedded in the school culture. Positive keyword indicators (truth, theology, liturgy, chapels) outpace any explicit negative signals. Why: The explicit grounding in Christology and theology directly aligns with transcendental moral realism and liturgical/community practices.

Evidence: Text asserts that true knowledge resides in Jesus Christ and that knowledge not grounded in Christ is not true knowledge; worship/chapel practices appear in the public materials.

Positive/Negative keyword analysis: Positive keywords observed include truth/true knowledge, Lord Jesus Christ, theology, liturgy/chapel. No explicit negative signals identified in the accessible public materials.

Why this rating: The materials foreground a metaphysical outlook grounded in Christian theology, with communal liturgical life, satisfying the core criteria for a classical religious/metaphysical foundation.

- **Element 2: School Purpose and Goal — SOMEWHAT CLASSICAL** Evidence demonstrates a formation-focused aim (discipleship, growth in virtue) rather than pure job-readiness. The school states a Christian formation aim, with language about nurturing young disciples and a Christian environment for growth. However, explicit articulation of truth/beauty as real, and an overarching telos tied to wisdom and virtue beyond formation per se, is less overt in the public materials than the strongest classical sources would show. Positive indicators exist (formation, virtue, human flourishing, telos in a classical sense), but the Great-Conversation-like framing or explicit articulation of truth-goodness-beauty as guiding ideals is not consistently spelled out across the site copy.

Evidence: "Christian environment where young disciples will be nurtured, trained, and challenged to grow" and related formation framing.

Positive/Negative keyword analysis: Positive keywords include formation, virtue, growth, human flourishing. There is less explicit emphasis on the true/good/beautiful triad as a sovereign telos in the public materials beyond formation language. No explicit negative signals observed.

Why this rating: Strong formation orientation supports classical aims, but the materials do not consistently elevate the triadic telos (truth/goodness/beauty) as explicit, guiding transcendent aims to the degree seen in premier classical programs.

- Element 3: Curriculum — SOMEWHAT CLASSICAL Evidence includes emphasis on Latin and a classical flavor, but the public materials do not consistently enumerate the full liberal-arts curriculum (grammar, logic, rhetoric) or explicit Great-Books/Great Conversation commitments. Latin study is foregrounded, which is a positive classical marker, yet there is less explicit mention of grammar, logic, rhetoric as a triad and of a comprehensive Great Books program.

Evidence: “Why study Latin?” position referenced; Latin is highlighted as part of the program.

Positive/Negative keyword analysis: Positive keyword observed: Latin (curriculum emphasis). No explicit Great Books/Great Conversation or the full grammar-logic-rhetoric triad is clearly described in the public materials. This yields a partial classical signal (some positive) with neutral/unknown on key elements.

Why this rating: The presence of Latin signals classical leanings, but the full liberal-arts curriculum (grammar, logic, rhetoric) and Great Books framework are not clearly articulated in the public materials available.

- Element 4: Pedagogy or Teaching Methods — CLASSICAL Evidence shows structured, layered pedagogy and an explicit move from pre-logic to logic and rhetoric, including the encouragement to present all sides of an issue. This aligns with classical pedagogical practice and the upper-lamented Socratic/seminar and rhetoric elements.

Evidence: “Beginning with the pre-logic phase of education (approximately grade 5) and continuing through logic and rhetoric, presentation of all sides of an issue is encouraged.” This is explicit on pedagogical structure.

Positive keyword analysis: Positive signals include pre-logic, logic, rhetoric, and presenting multiple sides (Socratic/seminar-like engagement). The public materials do not show strong counter-signals (e.g., heavy reliance on purely project-based or experiential-only approaches).

Why this rating: The school articulates a classical progression in pedagogy (from memory/recitation toward logic and rhetoric) consistent with the classical model, supporting a CLASSICAL rating for pedagogy.

- Element 5: Faculty — CLASSICAL Evidence shows teachers described as virtuous, loving God, loving students, and loving the subject, with an emphasis on a living-curriculum and teacher as mentors. The staff is expected to align with a stated faith, and the faculty are positioned as central to the curriculum.

Evidence: “Our teaching faculty will have ... God-given gifts in the classroom. We will hire teachers who love the Lord, love their students, and love the subject matter which they teach. All staff ... must profess themselves to be in full agreement with our statement of faith.”

Positive keyword analysis: Positive indicators include model teachers/mentors, living curriculum, faculty as the core, and collegial culture. The public materials emphasize virtue modeling and alignment with faith.

Why this rating: The emphasis on virtuous, mentoring teachers who embody the curriculum aligns well with classical “living curriculum” and teacher-centered excellence in the classical model.

- Element 6: Parents & Community — SOMEWHAT CLASSICAL Evidence points to partnership with parents in formation and a family-centered approach, but explicit and consistent public articulation of parent formation programs, open-campus visitation, or a formal “co-teacher” model is less uniformly documented in the accessible public materials. The presence of a Statement of Faith and the emphasis

on parental agreement in the admissions process are supportive, though not as explicit as the strongest classical programs.

Evidence: Public materials show a faith-based admissions framework and parental involvement through faith commitments; the detailed parent-formation programs are more fully described in broader classical-education literature than in the explicit site copy.

Positive keyword analysis: Positive indicators include partnership with parents, parental formation via reading groups or seminars, and the possibility of parental involvement. The explicit public presentation of these elements is less uniform than the strongest classical school sites.

Why this rating: There is a foundation for parent partnership and formation, but the public materials do not consistently demonstrate the depth of parent formation programs and open visitation that characterize a fully CLASSICAL parents-community alignment.

Overall aggregate assessment: SOMEWHAT CLASSICAL

- The school demonstrates strong CLASSICAL features in religious/metaphysical foundations, pedagogy, and faculty, and robust formation-oriented goals, with visible elements of Latin study and liturgical life. However, the curriculum breadth (full liberal-arts framework and Great Books/Great Conversation in explicit terms) and the depth of parent/community formation are less clearly articulated in the public materials. Taken together, Logos Fallon sits in the SOMEWHAT CLASSICAL category overall.

What Would Move the Needle

- Make Great Books and Great Conversation explicit: Publish a clearly stated curriculum map that includes the Great Books/Great Conversation framework, with specific texts, reading schedules, and discussion formats across grades K–12.
- Expand explicit liberal-arts articulation: Include a public, explicit statement of the grammar, logic, rhetoric sequence (and how it relates to the quadrivium/trivium) and show how history is woven through the curriculum as a liberal-arts continuum rather than social-studies framing.
- Strengthen parental formation and co-teaching narratives: Publicly articulate a robust Parents & Community section that describes co-teaching partnerships, parent book clubs, family liturgical practices, and open-campus visitation in line with classical expectations.
- Clarify the Great-Conversation language across materials: Use explicit phrases such as “great books,” “great conversation,” and “permanent questions” to reflect a thorough classical formation ethos.
- Bolster liturgical and communal practices as an integrated pedagogy: Provide concrete examples of liturgical calendar integration, sacred-music/narration in lower grades, and how chant or hymns reinforce memory and virtue in daily practice.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
