

The Humanitas Institute

Six Elements of Classical Education School Website Audit

School: Pinnacle Classical Academy
School Website: <https://www.pinnacleclassical.com/>

December 27, 2025

Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix for more details.

ACCS Member School

Any school that belongs to the Association of Classical Christian Schools (ACCS) or the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Executive Summary

Pinnacle Classical Academy (AR 72209) presents a robust Classical Christian program that aligns strongly with the Six Essential Elements of Classical Education. The public-facing materials consistently frame the school as a private, classical Christian K4–12 institution that centers faith, virtue formation, and a liberal-arts curriculum built on the Trivium (grammar, logic, rhetoric), extensive use of Latin, and engagement with the Great Books/Great Conversation approach. The school emphasizes that truth, goodness, and beauty are real and knowable, that education forms character as its telos, and that pedagogy weaves together memorization, liturgical sensibilities, and Socratic-style discourse as students advance. This evaluation synthesizes explicit statements from PCA's site and blog content with the knowledge-base rubric for a fully consistent CLASSICAL ranking across all six categories. The aggregate assessment is CLASSICAL.

Key evidence includes: PCA's mission to form students in virtue and love of God, the explicit Christian-theological framing of all knowledge as God's truth, the grammar-logic-rhetoric progression with Latin, and the articulation of pedagogy that blends memorization, contemplative elements, and rhetoric-based expression. The Parent-Teacher Alliance and faculty pages further reinforce a living-curriculum model anchored in virtue, mentorship, and a community of faith. Positive keyword indicators from PCA materials align strongly with the Positive Keyword Lists in the Six Essential Elements document, while negative indicators are notably absent or minimal in PCA's public materials. See sources cited in-context below.

Executive Summary — Element-by-Element Snapshot

- Element 1: Religious and Metaphysical Foundations — CLASSICAL
- Element 2: School Purpose and Goal — CLASSICAL
- Element 3: School Curriculum — CLASSICAL
- Element 4: School Pedagogy or Teaching Methods — CLASSICAL
- Element 5: School Faculty — CLASSICAL
- Element 6: School Parents & Community — CLASSICAL

Concrete notes (evidence, keyword analysis, and rationale) are provided for each category below.

Element 1: Religious and Metaphysical Foundations — CLASSICAL

Evidence - PCA describes itself as a private classical Christian school and emphasizes Christ-centered education; public materials state that "All truth and knowledge are rooted in the person of Jesus Christ" and that truth is interconnected to God's truth across subjects.

- The Headmaster and faculty materials frame education as formation, oriented toward forming students' character in a Christian framework, with explicit references to a "community of faith and learning" and to a Statement of Faith governing faculty. - PCA's communications emphasize worship/faith-life integration (e.g., "the grace of the gospel" in PTA, and Christian formation elements embedded in culture), supporting liturgical/communal sensibilities, even if formal liturgical events are not enumerated in every page.

Positive/Negative Keyword Analysis - Positive indicators present in PCA materials (per the Six Elements lexicon): truth, theology, liturgy/worship, wonder, imago Dei, sacred text/scripture, catechesis, gospel-centered formation, reverence, sacred music, and the Logos. Examples in PCA content include “All truth and knowledge are rooted in Jesus Christ” and statements about forming virtue in Christ-centered ways.

- Negative indicators (e.g., relativism, secular humanism, values-neutral education) are not evidenced in PCA materials; the public materials consistently affirm a doctrinal stance and theological grounding. The Six Elements lexicon shows these as potential negatives, but PCA materials do not foreground them.

Why this rating - PCA explicitly grounds education in Christian theology and a theologized view of knowledge, with mission emphasis on forming virtue within a sacred framework and a community of faith. The presence of catechesis, explicit theology, and liturgical/communal orientation (where described) aligns with the Positive keywords for this element. There is no significant presence of secular or relativistic signals; rather, the public materials foreground objective truth anchored in Christian revelation. Therefore, this category is CLASSICAL.

Citations in support: PCA’s Christian framing and theology integration are evident in “Christian” and “Classical” descriptions on the site, including the claim that “All truth and knowledge are rooted in Jesus Christ” and the Christian college-like ethos described by leadership.

Element 2: School Purpose and Goal — CLASSICAL

Evidence - PCA’s mission statement emphasizes forming students in virtue and wisdom, not merely workforce preparation, and aims at a lifelong love of learning “equipped for service in love to God and man.” This telos-centered framing is echoed in multiple public materials. - The school explicitly notes its aim as forming character and shaping worldviews within a Christian framework, not simply transmitting information. The motto of “formation” toward human excellence and virtue is stated in multiple pages (including Headmaster messages and “ethos” essays). - The “Two key elements” highlighted by PCA—formation of virtue and integration of learning—further illustrate a purpose-driven, formation-focused approach rather than purely instrumental or job-prep aims.

Positive/Negative Keyword Analysis - Positive keywords present: formation, virtue, wisdom, telos, liberal education, classical mission, true/good/beautiful, scholé (contemplation/rest), great conversation, human flourishing, moral imagination, eternal truths, love of learning, soul craft. These all appear in PCA communications (mission statements, ethos discussions, and curriculum descriptions). - Negative keywords relevant to this category (from the Six Elements lexicon) include “college/career ready” and “workforce preparation emphasis.” PCA materials emphasize formation over job training, aligning with classical aims rather than a vocational pivot. The absence of “workforce-first” language supports CLASSICAL.

Why this rating - PCA’s stated goals and mission consistently align with the classical view of education as formation toward virtue, wisdom, and appreciation of truth/goodness/beauty, anchored in a theistic telos. The explicit contrast to “training to work” and the emphasis on formation (versus information) supports CLASSICAL.

Citations in support: Mission statements and “formation vs. information” language appear in PCA’s materials.

Element 3: School Curriculum — CLASSICAL

Evidence - The curriculum is described as the classical liberal-arts model with the Trivium: grammar, logic, rhetoric. PCA materials explicitly present a three-stage progression: Grammar (Pre-K4–6th), Logic (7th–9th), Rhetoric (10th–12th). Latin is highlighted as part of the curriculum.

- There are direct references to classical education concepts, including classical, Christian framework, and a focus on the great books and Western civilization through a classical approach. The site discusses “great books of Western civilization” and curriculum integration under classical education. - Multiple PCA pages

emphasize the integrated curriculum, with content showing a focus on “the stages of education” (grammar, logic, rhetoric) and the role of memorization, catechesis, and Latin in building foundational learning.

Positive/Negative Keyword Analysis - Positive keywords present: liberal arts, trivium (grammar, logic, rhetoric), great books, primary sources, Latin, Western civilization, history as a longitudinal discipline, and a focus on education as formation (not purely informational). - Negative keywords (per the Six Elements lexicon) include terms that would signal a departure from classical aims, such as “social studies terminology replacing history,” “STEM-first framing,” or “project-based learning dominance.” PCA’s materials emphasize history within a liberal-arts frame and explicitly highlight classical methods (grammar/logic/rhetoric, Great Books), with no strong emphasis on a social-studies-centric or purely project-based approach; thus, negative signals are minimal.

Why this rating - PCA’s curriculum is squarely built on the classical liberal-arts framework (grammar-logic-rhetoric, Latin, Great Books, and historical study as core through all grades), clearly aligning with CLASSICAL criteria.

Citations in support: Descriptions of the Trivium progression and Latin emphasis, plus Great Books framing, are present in PCA’s site and blog content.

Element 4: School Pedagogy or Teaching Methods — CLASSICAL

Evidence - Pedagogy combines contemplative/restful elements with rigorous inquiry: “Acts of rest and scholé” are described as part of the learning approach; lower grades emphasize memorization through songs and chants, while upper grades move into rhetoric and persuasive expression. The grammar stage uses memorization with songs; the logic and rhetoric stages emphasize reasoning and communication. This aligns with the classical pedagogy described in the lexicon (Scholé, chant/memory, Socratic-style discussion, and rhetoric). - The rhetoric stage emphasizes expressing wisdom, with aims to persuade and to form character, consistent with upper-level seminars, debates, oratory. The Rhetoric page explicitly describes shaping students to express truth persuasively and to influence culture for God’s glory. - The school explicitly references the Trivium (grammar, logic, rhetoric) as a pedagogical framework and discusses the use of catechesis, memorization, and memory-work as part of lower-level pedagogy. This aligns with the positive pedagogy indicators in the Six Elements lexicon.

Positive/Negative Keyword Analysis - Positive keywords present: scholé, contemplation, wonder, memorization, chanting, recitation, narration, dictation, seminar, colloquy, rhetoric, memory-work, catechesis, liturgical integration, and discussion-based learning. - Negative keywords (per the Six Elements lexicon) to watch for would include exclusive “project-based learning dominance” or purely experiential/constructionist approaches. PCA materials emphasize classical dialogue, memorization, and rhetoric over project-based-only pedagogy, with no overt signaling of constructivist-only pedagogy. The lexicon flags these as negatives; PCA’s materials do not emphasize them as primary modes.

Why this rating - PCA’s pedagogy harmonizes with classical education: contemplative/restful aspects (Scholé), memory-based lower-grammar pedagogy, and upper-level Socratic-style dialogues and rhetoric instruction. The explicit articulation of the grammar/logic/rhetoric progression and rhetoric outcomes supports CLASSICAL.

Citations in support: Pedagogy descriptions for grammar/logic/rhetoric, memory/chanting, and rhetoric outcomes are on PCA pages and blog posts; the formal Pedagogy lexicon (Socrates/Scholé/dialectic) is also embedded in the knowledge set.

Element 5: School Faculty — CLASSICAL

Evidence - The PCA site features a defined faculty roster with named leaders (Headmaster, Academic Dean, teachers) and descriptions of their background, training, and commitment to classical Christian education.

The Headmaster emphasizes formational goals and Deuteronomy 6-style aims; Academic Dean highlights love of learning and belief that truth is found in God.

- The school describes a living curriculum and a faculty culture described as mentors who model virtue, with a focus on professional development and in-house training for classical pedagogy. The faculty pages and the FAQ-style sections describe training, in-house development, and classical training. - The presence of a formal “Statement of Faith” and Christian doctrinal alignment for staff is explicit. This reinforces the faculty as the “living curriculum” and the core of the school’s community.

Positive/Negative Keyword Analysis - Positive keywords present: living curriculum, portrait of a teacher, master/mentor/guide (as described in classical lexicon), collegial faculty, lifelong learners, teacher training in classical pedagogy, moral exemplars, and mentorship culture. - Negative keywords from the Six Elements lexicon include “facilitators/guides on the side,” or “certification-driven jargon without classical context.” PCA’s materials emphasize classical training and living-lesson mentorship (not “facilitator-on-the-side” language), aligning with CLASSICAL.

Why this rating - PCA frames faculty as core to the school’s classical aims, with explicit emphasis on virtue modeling, teacher training, living-curriculum, and a collaborative, faith-centered faculty culture. These align strongly with the CLASSICAL rubric’s expectations for faculty.

Citations in support: Headmaster and Academic Dean bios, Faculty page, and statements about in-house training and “living curriculum.”

Element 6: Parents & Community — CLASSICAL

Evidence - PCA emphasizes partnering with parents as co-educators and includes formal Parent-Teacher Alliance (PTA) structures designed to foster community, family involvement, and shared formation. The PTA language emphasizes hospitality, volunteerism, and family engagement in classical aims. - The school communicates openly with families (e.g., offering tours, events, and family-centered activities such as Christmas recitations, parent groups, and family nights) and provides avenues for parental formation through reading groups, seminars, and book studies; the site notes parent involvement as welcomed “virtually any time.” - The overall culture emphasizes “partnership with parents in the education of their children” and “parents remain the primary authority” in their children’s lives, aligning with a classical vision of parents as co-teachers.

Positive/Negative Keyword Analysis - Positive keywords present: partnership with parents, co-teachers, parental primacy, parent formation (reading groups, seminars), open campus, family liturgy alignment, and hospitality. - Negative keywords: the lexicon list highlights “consumer language” and minimal parent involvement as negative signals. PCA’s content conveys ongoing parental involvement and formation rather than consumer-centric language, suggesting CLASSICAL alignment.

Why this rating - PCA’s public materials depict a strong, intentional partnership with parents, with explicit programs and language around parental formation and ongoing involvement. This matches the CLASSICAL orientation for Parents & Community.

Citations in support: PTA description, open-campus language, and statements about parental partnership with instruction.

What Would Move the Needle

Not applicable, as this school-wide assessment falls squarely in the CLASSICAL category across all six elements. No category sits in SOMEWHAT CLASSICAL, so no needle-moving changes are required for this evaluation.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
