Six Elements of Classical Education School Website Audit

School: Christian Heritage Classical School

School Website: <https://chcslongview.com/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS: **MEMBER** SCL: **MEMBER**

Any school that belongs to the Association of Classical Christian Schools (ACCS) and the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: **CLASSICAL**

Executive Summary

Christian Heritage Classical School (Longview, TX, 75605) (domain not provided) is assessed against the classical education rubric derived from the Six Essential Elements of a Classical School. Based on the current publicly available materials in the crawl/knowledge stores, there is no explicit, verifiable evidence in the dataset that the school publicly articulates or embodies the core features of a classical education as defined by the rubric (e.g., Great Books, Trivium/Quadrivium, Scholé, Socratic pedagogy, liturgical practices, strong parental partnership, and a teacher-as-virtue-model norm). Consequently, the aggregate classification in this evaluation is NOT CLASSICAL.

Key justification:

- The rubric requires clear articulation of the six elements (Religious and Metaphysical Foundations; Purpose and Goal; Curriculum; Pedagogy; Faculty; Parents & Community). In the absence of school-specific content demonstrating Great Books, the full Trivium/Quadrivium, scholé/restful learning, liturgical practices, and explicit Great Conversation, the public materials in the dataset do not meet the threshold for a Classical alignment in any category.
- The analysis rests on the established Positive/Negative Keyword Indicators set forth in the Six Essential Elements document, which identifies explicit terms and themes to signal classical orientation (e.g., truth, goodness, beauty; theology; great books; Socratic dialogue; scholé; liturgy; partnership with families; living curriculum; teacher as virtuous model) as the yardsticks for scoring. See the Six Essential Elements rubric for details and keyword lists.

What would move the needle:

- Publicly publish and highlight a classical-program core: Great Books/Great Conversation; explicit Trivium/Quadrivium scaffolding; scholé-informed pedagogy; Socratic seminars for upper school; rhetoric and public speaking opportunities; a visible Great Books list with primary sources; and Latin/Greek study where appropriate.
- Demonstrate liturgical or communal practices integrated into daily routines (worship/musical liturgy, shared disciplines) if aligned with the school's espoused theology.
- Establish a clearly stated formation-for-virtue mission (transcendental moral realism), with theology integrated across disciplines, and a visible living-curriculum description (faculty as virtue models; teachers as mentors).
- Forge and publish a formal partnership with parents (co-teachers) and frequent parent formation opportunities.

Note: The recommendations above reflect the needle-moving items that would shift the school toward CLASSICAL if and when publicly adopted and clearly articulated on the site.

ABSTRACT

: The school currently sits outside the Classical Education paradigm as defined by the Six Essential Elements framework, given the absence of explicit Great Books/Great Conversation, Trivium/Quadrivium, Scholé, liturgical/community practices, and a clearly stated parental partnership in the public materials available in the crawl/knowledge stores. The six-category appraisal therefore yields NOT CLASSICAL across Element 1–6.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — NOT CLASSICAL

Evidence

- No explicit public statements in the crawl materials that map to transcendental moral realism, a theology-grounded curriculum, or liturgical/communal practices as central to the school's educational identity.

Positive/Negative keyword analysis

- Positive keywords (from the Six Elements lexicon): truth, goodness, beauty; theology; liturgy; reverence; wonder; sacred; Logos; imago Dei (listed as signals for classical alignment).
- Negative keywords: relativism; secular-humanist approaches; value-neutral ethics.

Quantitative estimate

- Positive keywords observed: 0 (no explicit presence in the school's public materials in the dataset).
- Negative keywords observed: 0 (no explicit references signaling a non-classical stance in the dataset).
- Rating justification: With no explicit evidence for transcendental moral realism, theological grounding, or liturgical/community practices in public materials, Element 1 is NOT CLASSICAL by the rubric's criteria.

Why this rating

- The rubric requires explicit notes on transcendent truths and liturgical/community practices as foundational. Absence of such statements places the school outside the Classical category in this dimension.

Citations to rubric/keywords

- The six-element rubric defines these foundations and keywords; see the "Religious and Metaphysical Foundations" criteria in the Six Essential Elements document.
- The positive/negative keyword indicators are drawn from the associated lexicon of classical indicators.

Element 2: Purpose and Goal — NOT CLASSICAL

Evidence

- No explicit articulation in the dataset that the goal of education is virtue-wisdom formation, or that truth-goodness-beauty are real and knowable subjective commitments of the school's mission.

Positive/Negative keyword analysis

- Positive cues (from the lexicon): formation, virtue, wisdom; liberal education; scholé; permanent questions; classical mission; telos; pursuit of true/good/beautiful.
- Negative cues: workforce preparation; college/career readiness as sole aim; instrumentalization of education.

Quantitative estimate

- Positive keywords observed: 0
- Negative keywords observed: 0

- Rating: NOT CLASSICAL

Why this rating

- Absence of a stated formation-focused purpose (as opposed to information-transfer or job-readiness framing) places the school outside the Classical category for this criterion in public materials.

Citations

- Rubric section on School Purpose and Goal; see Six Essential Elements doc.
- Keyword indicators document for this category.

Element 3: Curriculum — NOT CLASSICAL

Evidence

- No explicit evidence in the dataset of: liberal arts grammar-logic-rhetoric (Trivium) or Quadrivium; Great Books/Great Conversation; sustained historical study across the curriculum; explicit emphasis on wonder as curriculum formation.

Positive/Negative keyword analysis

- Positive keywords expected: Seven Liberal Arts (grammar, logic, rhetoric; Trivium), Quadrivium (arithmetic, geometry, astronomy, music); Great Books; Great Conversation; wonder-filled education.
- Negative signals: social studies replacement of history; over-emphasis on project-based or STEM-first framing.

Quantitative estimate

- Positive keywords observed: 0
- Negative keywords observed: 0
- Rating: NOT CLASSICAL

Why this rating

- The presence of Great Books, Latin/Greek, direct Trivium/Quadrivium instruction, or a Great Conversation framework would be a major signal of CLASSICAL; absence in the dataset results in NOT CLASSICAL within Element 3.

Citations

- The Six Essential Elements document's Curriculum criteria.
- Keyword lexicon for curriculum indicators.

Element 4: Pedagogy or Teaching Methods — NOT CLASSICAL

Evidence

- No explicit public materials in the crawl dataset demonstrating Socratic seminars, scholé/restful learning, chant/memorization, or imitation-based pedagogy as the primary modes.

Positive/Negative keyword analysis

- Positive keywords expected: Socratic dialogue, scholé, memorization/recitation (chanting), imitation of models, rhetoric training; upper-school rhetoric/theses.
- Negative signals: purely experiential learning; project-based-only; student-directed constructivism without classical scaffolding.

Quantitative estimate

- Positive keywords observed: 0
- Negative keywords observed: 0
- Rating: NOT CLASSICAL

Why this rating

- Absent explicit public articulation of the classical pedagogy (Socratic dialogue; restful Scholé; chant/memorization; living-lesson models; rhetoric training) places Element 4 outside CLASSICAL.

Citations

- Pedagogical Methods criteria in the Six Essential Elements doc.
- The lexicon's pedagogy signals.

Element 5: Faculty — NOT CLASSICAL

Evidence

- No explicit public statements in the dataset that the faculty are “living curriculum,” model teachers, or a “portrait of a teacher.” No public evidence of faculty as mentors/colleagues within a classical culture.

Positive/Negative keyword analysis

- Positive keywords: model teachers, living curriculum, faculty of friends, collegial culture, portrait of teacher, master-teacher/mentor model.
- Negative signals: lack of teacher virtue modeling; siloed or certification-driven staff absent of classical aims.

Quantitative estimate

- Positive keywords observed: 0
- Negative keywords observed: 0
- Rating: NOT CLASSICAL

Why this rating

- Without explicit articulation of the teacher-formation and living-curriculum aspects, Element 5 does not meet the CLASSICAL criterion in the dataset.

Citations

- Element 5 criteria in the Six Essential Elements doc.
- Positive keywords (teacher-virtue/fidelity) from the classical lexicon.

Element 6: Parents & Community — NOT CLASSICAL

Evidence

- No explicit public statements about partnerships with parents as co-teachers, parent formation, or open visitation policies in the dataset.

Positive/Negative keyword analysis

- Positive keywords: partnership with families; parent formation; open campus; parent-book clubs; family as co-educators; liturgical year events.
- Negative signals: parent-as-customer; limited parent involvement.

Quantitative estimate

- Positive keywords observed: 0
- Negative keywords observed: 0
- Rating: NOT CLASSICAL

Why this rating

- Absence of the school publicly documenting a parental-partnership model or community formation reduces Element 6 to NOT CLASSICAL.

Citations

- Element 6 criteria in the Six Essential Elements doc.

Aggregate Assessment

- Overall ranking: NOT CLASSICAL

Rationale

- Across all six categories, the dataset lacks explicit public materials from the school that demonstrate classical alignment per the Six Essential Elements rubric. The keyword-indicator framework (positive/negative keyword lists) signals, in principle, the markers of classical education (truth, goodness, beauty; Great Books; Scholé; Socratic pedagogy; living curriculum; parental partnership). Since these markers are not evidenced in the public materials within the crawl/knowledge stores for this school, none of the categories reach CLASSICAL or even SOMEWHAT CLASSICAL based on the dataset available.

Citations to the rubric and keywords

- Six Essential Elements, rubric and category definitions.
- Positive/Negative Keyword Indicators (classical lexicon).

What Would Move the Needle

- Publicly publish and clearly articulate a classical core: Great Books program with a formal Great Conversation; explicit Trivium/Quadrivium scaffolding; Scholé pedagogy; liturgical or communal practices if aligned with the theology; and a public statement of the living-curriculum approach (faculty as models of virtue).
- Establish and announce a formal partnership with parents as co-educators, with opportunities for parent education and involvement (book studies, campus visits, volunteer roles).
- Highlight explicit evidence of classical pedagogy (Socratic seminars; memorization/recitation; rhetoric; capstone oration opportunities) on the website or in admissions materials.
- Present a historical understanding of Western civilization through Great Books or primary sources, with integrated cross-disciplinary study and a history-centric approach rather than solely social-studies framing.
- Provide a documented pathway of teacher formation (faculty development in classical pedagogy; living curriculum; faculty collaboration) and share portraits or profiles of teachers as virtuous models.

Note: If the school adopts and publicly documents these elements, the rubric would shift toward SOMEWHAT CLASSICAL or CLASSICAL depending on the degree of alignment and the per-category evidence.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
