

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Doxa Christian Academy
School Website: <https://doxachristianacademy.com/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS: **MEMBER** SCL: **MEMBER**

Any school that belongs to the Association of Classical Christian Schools (ACCS) and the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: **CLASSICAL**

Executive Summary

Doxa Christian Academy Wisconsin 53151 presents as a clearly classical Christian school, oriented toward formation in virtue and wisdom within a Christian-theological frame. Public-facing materials consistently frame education as a Christian vocation and a classical enterprise (not merely information transfer), with explicit references to the Trivium (grammar, logic, rhetoric), Great Books oriented study, biblical languages (Biblical Greek), and a governance/culture anchored in Reformed theology and a Statement of Faith. The school emphasizes partnership with families, parental formation, and open campus-style engagement, aligning with the classical model of a school as a living, communal project rather than a purely institutional setting. These signals are reinforced by statements about "All truth is God's truth," the integration of theology across disciplines, and a commitment to classical pedagogy and culture rather than secular, utilitarian schooling. Evidence drawn from the Doxa site materials shows: clergy/teachers modeling virtuous teaching and the school positioning itself as collaborative with families and churches; a clear commitment to Great Books, the Trivium, Biblical Greek, and Socratic/seminar-style inquiry in upper grades; and explicit statements about avoiding secular/state-driven approaches in favor of a Christ-centered, classical framework. The knowledge-base rubric (Six Essential Elements) corroborates this orientation by listing transcendental moral realism, theology, liturgical/community practices, Great Books, the Trivium, and strong parental partnership as core indicators of classical education.

Key textual signals include: "Doxa Christian Academy is a classical Christian school" and "We are Classical" with a linked description of the classical method aligned to child development; explicit affirmation that "All truth is God's truth" and that the curriculum includes the Trivium, Great Books, Biblical Greek, and a formation-first aim; roots in Reformed theology with a Statement of Faith; and a stated partnership with families (parents as co-teachers) and an open-campus/visit approach. These signals appear across multiple pages (Admissions, About/Christian Education, FAQ, Employment bios, and faculty pages).

In sum, Doxa Christian Academy Wisconsin 53151 scores **CLASSICAL** across all six categories, with particular strength in religious/philosophical foundations, purpose and goal, curriculum, pedagogy, faculty, and parent/community partnerships. The public materials demonstrate a coherent classical-Christian program anchored in virtue, truth, and beauty, with a robust Trivium-based curriculum, Great Books orientation, and a strong parental-partnership model that aligns with classical norms.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — **CLASSICAL**

Evidence - The school presents itself as "thoroughly Christian" in goals, content, methods, and culture, with explicit statements that "All truth is God's truth" and that Christian education should bring all truth under Christ's lordship. - The church/theology posture is reinforced by references to Reformed theology and a

Statement of Faith; the school is explicit about a Reformed view of God, humanity, and salvation. - Foundational theological language appears across pages: “Christ is King,” biblical storyline, gospel-centered formation, and a biblically integrated curriculum.

Positive/Negative Keyword Analysis - Positive keywords present: truth, beauty, goodness, virtue, theology, gospel, Christ, biblical, Reformed, sacred tradition, worship, chapel, creed, Logos. These map directly to the Positive Keywords in the Six Essential Elements doc (thematic groupings include transcendental moral realism, grounded in theology, liturgical/community). - Negative keywords detected: effectively none in public materials; the site consistently pressurizes a Christian-theological frame rather than secular/neutral alternatives (e.g., no statements aligning with secularism or value-neutral instruction). The site does include explicit non-neutral/categorical stances like “No Education is Neutral.”

Why this rating - The explicit Christian framing, the integration of theology with curriculum, and the explicit Reformed posture align strongly with transcendental realism and theological grounding described in the Six Elements rubric. The presence of worship/communal language is less about liturgical practice in daily classes and more about a culture anchored in shared faith and worship life, which still satisfies core liturgical/community signals in practice terms. Overall, this category clearly satisfies CLASSICAL expectations.

Cited basis: Christian identity, theology integration, and Reformed stance are evidenced in multiple pages (Admissions/About/FAQ).

Element 2: School Purpose and Goal — CLASSICAL

Evidence - Public statements frame education as formation of virtue and human excellence, not job preparation; the mission centers on “joyously and victoriously love and live for Jesus Christ” and “formation of character.” This formation emphasis is reiterated in admissions and program materials. - The school emphasizes formation over mere information, aiming for the development of humane dignity, virtue, and wisdom through a classical framework (Trivium-based progression and Great Books). Staff bios and program descriptions repeatedly connect education to moral and spiritual formation. - Great Books, Great Conversation, and classical paideia motifs appear in the explanatory materials about classical education, indicating a telos-oriented aim beyond vocational outcomes.

Positive/Negative Keyword Analysis - Positive keywords present: formation, virtue, wisdom, classical mission, paideia, great conversation, great books, telos, contemplation, wonder, human flourishing, virtue ethics, sacred tradition. These are described in the Six Elements lexicon as core indicators of classical aims and are echoed in the Doxa materials. - Negative keywords detected: there is no substantive presence of “workforce readiness,” “career training,” or other modern, utilitarian signals in the public-facing materials; the site emphasizes formation over job prep. (Absence of those modern signals is itself aligned with the classical frame.) The Six Elements document cautions against an overemphasis on workforce readiness as a negative signal; the Doxa materials align with the positive, formation-centered frame.

Why this rating - The school’s explicit emphasis on formation, virtue, and the Great Conversation, together with a telos-oriented aim (the good, the true, the beautiful), places it squarely in CLASSICAL territory for Purpose/Goal.

Cited basis: Formation-focused mission and telos statements align with the classical rubric; Great Books/-Great Conversation and paideia motifs are referenced in both the school materials and the Six Elements framework.

Element 3: School Curriculum — CLASSICAL

Evidence - The site explicitly identifies itself as a classical Christian school, with a curriculum that centers on the Trivium (grammar, logic, rhetoric) and the Quadrivium, and an emphasis on Great Books and the Western canon, guided by a Christian frame. Statements like “The classical method cuts with the grain of the child’s natural phases of development” and “we teach Biblical Greek” point to a robust curriculum grounded in the liberal arts and foundational texts. - The presence of Biblical Greek study and a focus on primary sources, ancient languages, and the Great Books is explicit across school materials. The site references

“the Trivium,” “grammar, logic, rhetoric,” and the goal of reading ancient texts in original languages. - There are clear signals of historical and cultural transmission: study of Western civilization through primary sources, classical canon, and integration of classical wisdom.

Positive/Negative Keyword Analysis - Positive keywords present: Seven Liberal Arts (grammar, logic, rhetoric), Trivium, Quadrivium, Great Books, primary sources, classical languages (Biblical Greek), history as a throughline, sacred tradition, unity of truth across disciplines, and integration/wonder. These map directly to the Positive Keywords in the Six Elements lexicon. - Negative keywords detected: The materials do not emphasize “social studies” as a stand-in for history, nor do they foreground project-based learning as the primary mode; instead, they emphasize primary sources and the Great Books approach. The Six Elements doc identifies “project-based learning dominance” as a potential negative signal; the Doxa materials do not foreground this as the central pedagogy.

Why this rating - The curriculum signals align with the classical curriculum core (grammar/logic/rhetoric, Great Books, Latin/Greek emphasis, historical/cultural transmission, and a recognition of wonder in learning). This is a robust CLASSICAL alignment.

Cited basis: Curriculum language and emphasis on Trivium, Great Books, Greek study, and historical/cultural transmission are stated in school materials and corroborated by the Six Elements-derived taxonomy.

Element 4: Pedagogy or Teaching Methods — CLASSICAL

Evidence - Pedagogical signals include both contemplative/restful learning (Scholé) and active, Socratic-style inquiry in upper grades: “Socratic discussion, seminars, or debates,” and “upper school students are being trained in rhetoric and have opportunities to give speeches.” This matches the dual classical pedagogy pattern described in the Six Elements framework. - In lower grades, the curriculum employs memory-focused, chant-based approaches (rhymes, songs, chants) for memory and recall, consistent with the grammar stage of the Trivium. The materials explicitly mention mnemonic chants and memory-building practices. - The pedagogy emphasizes a gradual progression: memory/chant in the early years, Socratic discussion and rhetoric in later years, with an emphasis on forms of discussion, debate, and ethical instruction.

Positive/Negative Keyword Analysis - Positive keywords present: Socratic discussion, dialogue, dialectic, memory work, chanting, recitation, memorization, liturgy-inspired memory, cluelessly the “restful” pedagogy, seminar, rhetoric, debate, and discourse. These map to the Positive Keyword lists in the Six Elements doc. - Negative keywords detected: The materials do not rely primarily on “project-based learning” as the sole driver; there is clear emphasis on classical forms (recitation, memory, Socratic seminar) rather than a fully modern, project-driven pedagogy. Where present, project-based or experiential phrases appear as secondary or not central in the public materials. The presence of a strong, memory-based grammar stage combined with Socratic upper-level pedagogy aligns with classical pedagogy.

Why this rating - The school’s pedagogy aligns strongly with classical teaching methods: restful/scholé days in early years and Socratic/seminar/rhetoric in upper grades, plus memorization/recitation and the memory-centered grammar stage. This combination is a hallmark of CLASSICAL pedagogy.

Cited basis: The “Old-New Way” description of the Trivium and the explicit listing of grammar/logic/rhetoric, along with lower-grade chants/memory work, anchor this category in classical pedagogy.

Element 5: School Faculty — CLASSICAL

Evidence - Faculty are described as model teachers and mentors who embody virtue and wisdom; the school emphasizes the living curriculum and a culture of collegiality and mentorship (as reflected in faculty bios and employment materials). This mirrors the classical “living curriculum” and “portrait of the teacher” signals. - Biographical pages for faculty (e.g., Amy Dufek) present educators who model faith, virtue, and scholarship, aligning with the “teachers as models of virtue” and “mentors/collaborators” expectations. - The school materials reference partnerships with parents and a culture of formation, which are part of the classical “living curriculum” and mentorship ethos.

Positive/Negative Keyword Analysis - Positive keywords present: living curriculum, master/mentor figures, virtuous educators, character formation, mentorship, integrity, faith and reason. These map to the Positive Keywords section for Faculty in the Six Elements doc. - Negative keywords detected: none evident in public-facing materials; there is no emphasis on “facilitators on the side” or purely credential-based instruction without classical context. The materials emphasize virtue and teacher-modeling, which aligns with classical norms.

Why this rating - The public-facing materials frame faculty as moral exemplars and living parts of the curriculum rather than mere implementers of a script, which is a strong CLASSICAL signal.

Cited basis: Faculty bios and employment pages describe teachers as mentors/model virtuous living and as part of the school’s living curriculum.

Element 6: Parents & Community — CLASSICAL

Evidence - The school strongly emphasizes parental partnership: “We partner with and equip parents to give their children a rigorous, holistic education” and describes parents as co-teachers in the educational process. This is a central classical signal for Element 6. - There are explicit references to parent formation and home-school collaboration, including book studies, gatherings, and opportunities for parents to engage with the curriculum and pedagogy. The family-school partnership is a formal aim, not an incidental feature. - The school invites parental involvement on campus and in classroom activities, aligning with classical practice where parents participate and are welcomed on campus.

Positive/Negative Keyword Analysis - Positive keywords present: partnership with families, co-teachers, parental engagement, home-school collaboration, family catechesis, parent formation, community of learners, open campus, parental leadership, and school-parent synergy. These map to the Positive Keywords for Parents & Community in the Six Elements doc. - Negative keywords detected: none in the public-facing materials; the site does not promote a consumer-model or minimal-parent-involvement stance. The presence of open-campus and family involvement is a strong positive signal.

Why this rating - The school’s materials clearly reflect a classical, collaborative approach with families and a culture of parental formation and engagement, which aligns with the Element 6 criteria.

Cited basis: Partnership with families, parental formation, and open-campus engagement are explicitly stated across admissions, about pages, and FAQ sections.

Aggregate Assessment

- Overall, the school demonstrates CLASSICAL orientation across all six categories, with explicit alignment to transcendental moral realism, theology, liturgical/community signals in practice, formation-focused purposes, Trivium-based curriculum with Great Books, and a classical pedagogy that blends memory work with Socratic inquiry, plus a robust living-curriculum faculty and a strong parent/community partnership. The parallel between the school’s public materials and the Six Essential Elements framework is consistent and strong.
- Executive view: CLASSICAL overall.

What would move the needle

- Not applicable since this evaluation yields CLASSICAL across categories. No category requires needle-moving changes to reach CLASSICAL status; the school already meets the key classical indicators in all six domains.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
