

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Geneva Academy
School Website: <https://genevaroseburg.com/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS: **MEMBER** SCL: **MEMBER**

Any school that belongs to the Association of Classical Christian Schools (ACCS) and the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: **CLASSICAL**

Executive Summary

Geneva Academy Roseburg (Geneva Academy OR 97470) presents a robust, classroom-centered model that aligns strongly with classical education and a Christian/catholic-liberal-arts heritage. Public materials from the Geneva site consistently describe a classical Christian mission, with explicit emphasis on faith-integrated learning, virtue formation, and the liberal arts tradition (grammar, logic, rhetoric) taught through a Great Books-oriented curriculum and socratic pedagogy. Evidence from mission statements, curriculum descriptions, and documented pedagogical practices indicates a comprehensive classical orientation across categories. The site likewise emphasizes parental involvement, a living faculty, and community engagement, all framed within a Christ-centered worldview.

Overall classification: CLASSICAL.

- **Why this matters:** Geneva Academy Roseburg clearly identifies itself as a classical Christian school, foregrounds faith-informed pedagogy and formation, and emphasizes canonical classical elements (Great Books, liberal arts triad, Socratic dialogue, capstone-style senior work, and a living-faculty model). The programmatic emphasis on virtue, wisdom, contemplation (scholé), and communal practices reinforces the alignment with classical education. The school's public materials consistently cite formation and virtue as primary goals, not merely vocational preparation, supporting a CLASSICAL ranking across all six categories. For example, mission statements emphasize faith-integrated classical education and the formation of virtuous character, while curricular and pedagogical notes highlight classical tools like Great Books, grammar/logic/rhetoric, and Socratic methods.
- **Note on needle-mover:** As a fully Classical rating, there is no mandatory "What Would Move the Needle" section required here.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — **CLASSICAL**

Evidence - Public materials foreground a Christian, classical framework. The mission states Geneva Academy is a "classical Christian school" that integrates faith and reason, cultivates virtuous character, and develops all faculties. - The school links theology with learning, noting that theology organizes knowledge and Scripture provides essential knowledge, with theology described as the "Queen of the Sciences." - Foundational emphasis on Christian formation and a biblical worldview appears in founding narratives and ongoing communications.

Positive/Negative keyword analysis - Positive indicators present: Christian, theology, faith-integrated, virtue, wisdom, sacred/holy language (theology, Scripture, Queen of the Sciences), liturgical/communal potential (worship, prayer themes appear in community events), reverence/wonder in the overall educational tone.

Key positive terms drawn from the classical-education lexicon include theology, sacred scripture, virtue, wisdom, and worship. - Negative indicators: none explicitly evident in public materials (no strong signals of secular relativism or value-neutral approaches are promoted). The site consistently frames education through a Christian-theological lens.

Why this rating - The school's public materials consistently place theology, sacred aims, and the formation of character (virtue, wisdom) at the center, with explicit references to a Christian worldview and a liturgical/-communal ethos as part of the learning environment. This strongly aligns with the Transcendental Moral Realism and Grounded Theology/ liturgical commitments characteristic of Classical education.

Element 2: School Purpose and Goal — CLASSICAL

Evidence - Mission emphasizes formation and virtue, not merely information or job preparation: the aim is to form well-educated, godly children within a classical Christian framework. - References to forming character and developing human flourishing/wisdom, aligned with the paideia/liberal-arts purpose and a telos oriented toward true/good/beautiful. - Senior capstone-like culmination (Capstone/Senior Thesis) indicates formation of the person through sustained, meaningful work rather than a narrow vocational track.

Positive/Negative keyword analysis - Positive indicators: formation, virtue, human flourishing, wisdom, liberal education, classical mission, telos, great conversation, scholé, long-view human excellence, soul craft. The site's language around forming virtuous graduates and "graduates not just to know, but to be" is strongly positive. - Negative indicators: none clearly stated; the site does not foreground job-readiness or narrowly vocational metrics as the primary aim.

Why this rating - The explicit emphasis on formation, virtue, wisdom, and the cultivation of humane excellence over mere job-prep points to CLASSICAL alignment in purposes/goals. The presence of capstone work further supports the classic Paideia-directed telos.

Element 3: School Curriculum — CLASSICAL

Evidence - The curriculum references a liberal-arts framework (grammar, logic, rhetoric) and the classical-triad approach. The school speaks to Great Books, primary sources, classics, and a broad Western civilization/historical arc, including Latin/Greek and philosophy. - History is treated as a throughline across the curriculum rather than merely "social studies," with emphasis on primary sources, great books, and canonical texts. - Explicit invocation of studying history, philosophy, literature, art, theology, Latin, Greek, logic, and rhetoric as integrated parts of education. - Kindergarten and early grades advertise classical liberal-arts core, with a gradual progression toward Capstone-style senior work.

Positive/Negative keyword analysis - Positive indicators present: liberal arts, grammar, logic, rhetoric; great books; primary sources; classics; Latin/Greek; history; philosophy; theology; art; chant; and the Great Conversation. - Negative indicators: minimal to none in the public materials; no explicit shift to "STEM-first framing" or project-based dominance in the public curriculum narrative. Some lexicon notes about negative signals exist in general (e.g., project-based dominance) but are not reflected as explicit school practice in the public materials.

Why this rating - The school's curriculum is unmistakably aligned with classical elements: grammar/logic/rhetoric, Great Books/primary sources, history as a through-line, and a sustained emphasis on liberal-arts formation. Capstone projects and a through-line of philosophy/theology/fine arts strengthen the CLASSICAL rating.

Element 4: School Pedagogy or Teaching Methods — CLASSICAL

Evidence - Pedagogical notes emphasize Socratic discussion, debate, and higher-order reasoning (upper-school) as part of the learning process. - Lower-school pedagogy includes singing, chanting, and memory-focused activities that align with contemplative and memory-anchoring practices; there is an emphasis on wonder and reverence in learning. - The presence of memory-work, recitation, and the "living curriculum"

approach suggests a relational and classical approach to instruction, with opportunities for rhetoric-based expression and public speaking in upper grades (capstone orations). - Capstone-style, rhetoric-focused upper-school experiences are referenced in the school materials.

Positive/Negative keyword analysis - Positive indicators present: Socratic seminar/discourse, narration/recitation, chanting/memory work, scholé/contemplation, seminar/Paideia, rhetoric/debate, capstone/orations, and liturgical-calendar integration. These align with classical pedagogy signals. - Negative indicators: explicit signals of non-classical methods (e.g., exhaustive project-based-only, or constructivist student-directed models) are not evidenced in the public materials. The lexicon notes negative signals for these approaches, but there is no explicit public evidence of such practices in Geneva's materials.

Why this rating - The school's publicly described pedagogy includes a mix of contemplative/restful elements plus rigorous Socratic and rhetoric-centered practices, reflecting a true Classical pedagogy rather than a modernist or purely project-based approach.

Element 5: School Faculty — CLASSICAL

Evidence - Public materials describe the faculty as model teachers and mentors who form the living curriculum and who embody virtue and character on campus. The name "Meet Our Dedicated Faculty and Staff" and the framing "A Community Devoted to Pointing Others to Christ" indicate a living, virtuous, and unified faculty culture. - The faculty is framed as a core element, with a portrait of teachers and a collegial culture; there is emphasis on the teacher-student relationship as central to the school's mission.

Positive/Negative keyword analysis - Positive indicators present: model teachers/mentors, living curriculum, faculty of friends/collegial culture, portrait of teacher and student ideals, ongoing professional engagement with classical texts (as implied by Great Books orientation). - Negative indicators: none explicitly present; there is no indication of a "certification-driven" or purely administrative faculty model in the public materials. The lexicon notes potential negatives in more secular contexts, but Geneva's own materials emphasize the living-curriculum model.

Why this rating - The public materials portray a faculty culture centered on virtue, mentorship, and a living curriculum—core markers of CLASSICAL faculty as described in the six-element rubric.

Element 6: Parents & Community — CLASSICAL

Evidence - The school presents a partnership model with parents, including opportunities for visits, open-campus events, and parental involvement in church/community life and school events. The site invites visitors and emphasizes parent participation in the school community. - There are explicit calls to engage parents through events and community activities (e.g., concerts, family events) and to participate in the school's broader "Geneva" community. The school also frames charitable giving as a community endeavor. - The "Discover Geneva" and "Open Visit" prompts indicate a welcoming, open-door approach to families.

Positive/Negative keyword analysis - Positive indicators present: partnership with parents, co-teaching language and parental formation (via book studies, seminars, and family engagement), open-campus access, hospitality, and community events. The lexicon's positive indicators for Parents and Community include partnership with parents, parent formation, open campus, and family participation. - Negative indicators: there is no strong consumer/customer framing in the public materials; the available materials emphasize formation and partnership rather than a transactional parent relationship. The absence of customer-centric language aligns with classical signals rather than negatives.

Why this rating - The school's public materials emphasize genuine partnership with parents, parental formation through reading groups and seminars, and welcoming visits, all consistent with CLASSICAL indicators in the Parents & Community category.

Aggregate Assessment

- Element 1: Religious and Metaphysical Foundations — CLASSICAL
- Element 2: School Purpose and Goal — CLASSICAL

- Element 3: School Curriculum — CLASSICAL
- Element 4: School Pedagogy or Teaching Methods — CLASSICAL
- Element 5: School Faculty — CLASSICAL
- Element 6: Parents & Community — CLASSICAL

Overall Ranking: CLASSICAL

What would move the needle

- Not applicable, as the school already achieves CLASSICAL status across all six categories. If one sought to explore further needle-moving enhancements, it could be focused on expanding explicit language around liturgical practices or integrating additional primary sources from a broader Great Books canon, but these are already partially present and not required to reach CLASSICAL status.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
