

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Great Hearts Roosevelt

School Website: <https://roosevelt.greatheartsamerica.org/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix for more details.

SCL MEMBER

Any school that belongs to the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because SCL requires adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: CLASSICAL

Executive Summary

Great Hearts Roosevelt Buckeye (AZ 85326) demonstrates strong alignment with classical education as defined by the six essential elements. Public-facing materials from the school emphasize Truth, Goodness, and Beauty, the formation of character and virtue, and a liberal-arts orientation anchored by Great Books, Socratic inquiry, and a classical curriculum. The school also foregrounds parental partnership and community involvement, including a visible Parent Service Organization and ongoing parent engagement. Across the six categories, the public materials show a coherent classical orientation with limited evidence of modern utilitarian or purely job-centric aims.

Overall classification: CLASSICAL

Key insights: - Religious/metaphysical foundations: The school centers on transcendent ideals (Truth, Goodness, Beauty) and moral formation, with explicit appeals to classical virtues and conversations about virtue and the good life. Evidence includes statements aligning with the transcendental aims and moral realism typical of classical education. - Purpose and goal: The education is framed as formation (soul, heart, mind) and the pursuit of virtue and wisdom rather than merely job-readiness. Evidence includes explicit language about forming good, virtuous scholars and the telos of liberal education. - Curriculum: Strong alignment with liberal arts orientation, Great Books, and a coherent, integrated program. Public materials reference Great Books and a library of Western tradition texts, along with a structured curriculum. - Pedagogy: Emphasis on Socratic instruction, disciplined inquiry, and memory- and recitation-based elements within a rest-filled, contemplative framework; elements of Schol  are present in the language and descriptions. - Faculty: Descriptions imply teachers as virtuous mentors and as part of a living curriculum; leadership materials indicate a centralized teacher-centered, virtue-oriented educational culture. - Parents & Community: Clear commitment to partnership with families, involvement of parents via PSO, and open pathways for engagement.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — CLASSICAL

Evidence - The school emphasizes Truth, Goodness, and Beauty as transcendent ideals guiding education (Verum, Pulchrum, Bonum). - Public materials describe moral and character formation as central to education (e.g., moral virtue and formation of the soul). - References to a holistic, virtue-centered formation align with classical aims of moral realism and universal goods.

Positive/Negative keyword analysis - Positive keywords present (approximate count): truth, goodness, beauty, virtue, moral formation, great conversation, contemplation, formation of the soul. (Cited materials include Verum/Pulchrum/Bonum language and virtue-focused aims.) - Negative keywords present: none clearly evident in public materials (no explicit values-neutral, relativistic, or secular ethics terminology).

Why this rating - The materials foreground transcendental aims (truth, goodness, beauty), virtue formation, and a moral/metaphysical orientation. While explicit liturgical details aren't prominent in the excerpts reviewed, the alignment with classical moral realism and the triad of Truth/Goodness/Beauty supports CLASSICAL in this category.

Element 2: School Purpose and Goal — CLASSICAL

Evidence - The highest goal is described as becoming good, intellectually and morally, with formation of the soul and heart emphasized. - Liberal education is framed as a central aim, with emphasis on formation, not merely information; telos articulated as human flourishing and moral imagination. - Parental/community statements emphasize enduring formation and virtue rather than solely workforce preparation.

Positive/Negative keyword analysis - Positive keywords present (approximate count): formation, virtue, wisdom, telos, liberal education, moral imagination, great conversation, formation of the soul, human flourishing. - Negative keywords present: none clearly evident (no explicit focus on 21st-century workforce readiness or career-readiness phrases).

Why this rating - The school explicitly positions education as formation aimed at virtue, wisdom, and moral excellence, consistent with classical telos. The absence of prominent workforce-centric language in the core public materials supports CLASSICAL classification in this category.

Element 3: Curriculum — CLASSICAL (leaning toward SOMEWHAT CLASSICAL in edge cases)

Evidence - Curricular emphasis on a liberal-arts framework and a coherent, common curriculum is stated; there is explicit mention of Great Books and Western tradition as a curricular anchor. - References to reading lists, curriculum sequences, and a focus on a classical curriculum align with Great Books/Great Conversation traditions. - Socratic inquiry and preparation for strong inquiry through shared inquiry and honest discussion are described in the philosophy materials.

Positive/Negative keyword analysis - Positive keywords present (approximate count): Great Books, liberal arts, reading lists, curriculum sequences, Socratic instruction, Great Conversation, Western tradition, memory/recitation practices (as part of a classical pedagogy). - Negative keywords present: minimal evidence of project-based-only, skills-first, or STEM-first framing within the core curriculum language; Singapore Math is referenced as a tool, not a negation of classical aims. Overall negative signals appear low.

Why this rating - The presence of Great Books, liberal arts framing, and Socratic methods demonstrates a strong classical curriculum orientation, with some cross-cutting modern elements (e.g., Singapore Math) that do not override the core classical signals. This supports CLASSICAL in this category, with a note that edge-case modernities could be harmonized more overtly with Trivium/Quadrivium terminology in public materials.

Element 4: Pedagogy or Teaching Methods — CLASSICAL

Evidence - Explicit references to Socratic instruction and disciplined inquiry align with classical pedagogy. - Public materials emphasize the value of shared inquiry and honest discussion in the learning process, consistent with classical seminar-style pedagogy. - Mention of memory-based and recitation-like elements (through classical pedagogy signals and some curriculum descriptions) and the use of calm/restful learning through Scholé concepts in the lexicon context. - The school communicates a recognition of the Great Books approach, which typically involves dialogues and classical discussion formats.

Positive/Negative keyword analysis - Positive keywords present (approximate count): Socratic instruction, shared inquiry, memory/recitation (classical memory work), Scholé/restful learning, seminars, rhetoric/debate, dialogue-based instruction. - Negative keywords present: minimal to none (no explicit emphasis on experiential learning as sole pedagogy; no overt signaling of constructivist-only approaches).

Why this rating - The strongest signals are Socratic dialogue, guided inquiry, and seminar-style discussions, which are hallmark features of classical pedagogy. While some modern tools (Singapore Math) appear, they

do not negate the overall classical pedagogy signals in the public materials. This yields CLASSICAL in this category.

Element 5: Faculty — CLASSICAL

Evidence - Leadership and governance materials frame faculty and leadership around standards and mentorship; the public materials also reference a leadership team and a “living curriculum” orientation in the classical sense (faculty as exemplars and guides). - Public materials describe teacher roles in forming character and guiding students within a shared, traditional curriculum; there are explicit references to a classical mission and to formation through the teacher-student relationship.

Positive/Negative keyword analysis - Positive keywords present (approximate count): teachers as models of virtue, mentorship, living curriculum, portrait of a teacher, professionalism, ethical leadership (as suggested by the governance/handbook language and mission statements). - Negative keywords present: minimal signals of non-classical faculty models (e.g., “facilitator on the side” or purely technician-style roles) in the public materials.

Why this rating - The school materials emphasize virtue, mentorship, and a living curriculum with teachers as core to the classical formation process, aligning with CLASSICAL expectations for this category.

Element 6: Parents & Community — CLASSICAL

Evidence - There is a clearly stated partnership with families and a high level of parental engagement; a Parent Service Organization (PSO) exists to involve families in school life. - Public materials emphasize parent formation and ongoing parent education, with visible opportunities for visits and involvement (e.g., tours, information nights, interest lists). - The handbook language and statements about school-parent collaboration suggest a culture of co-education and home-school partnership.

Positive/Negative keyword analysis - Positive keywords present (approximate count): partnership with families, co-teachers, parental engagement, parent formation, home-school collaboration, open campus, parent involvement, community of learners. - Negative keywords present: limited signals of consumer- or customer-only framing; the materials emphasize active involvement rather than passivity. (Not evident in the cited content.)

Why this rating - The school clearly articulates a classical-community orientation with strong parent involvement and family formation, which aligns with CLASSICAL expectations for this category.

Aggregate assessment - Category scores: 1) CLASSICAL, 2) CLASSICAL, 3) CLASSICAL, 4) CLASSICAL, 5) CLASSICAL, 6) CLASSICAL - Overall: CLASSICAL

What Would Move the Needle - Not applicable for a CLASSICAL overall rating. No category requires a needle-moving intervention to reach CLASSICAL given the current evidence base.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
