

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Kairos Classical Christian Academy

School Website: <https://www.vcagastonia.org/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS STARTUP

Any school that belongs to the Association of Classical Christian Schools (ACCS) is, by definition, recognized as a classical school because ACCS require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: **CLASSICAL**

Executive Summary

Kairos Classical Christian Academy NC 28052 appears to be oriented toward a classical, Christian-informed education, but public website materials provide limited explicit detail about core classical methods (e.g., Great Books, Trivium/Quadrivium, Scholé, or the Great Conversation). The site references a Christian identity (through the academy's name and branding observed via the Victory Christian Academy materials on the same hosting domain) and shows at least one liturgical/communal cue (a chapel image on the athletic/academic pages), which signals religious foundations and liturgical community life. However, the public materials do not consistently document the full classical rubric (philosophical aims, explicit curriculum structure, or high-school pedagogy such as Socratic seminars). Based on the six-element rubric, the evidence supports mostly partial alignment with classical aims, yielding an overall rating of **SOMEWHAT CLASSICAL**, with several categories lacking explicit support for a fully classical model.

Key contextual signals drawn from the knowledge-base materials (defining classical criteria) include the core transcendental orientation around truth, goodness, and beauty; the Trivium/Quadrivium framework; Great Books and the Great Conversation; contemplation/scholé pedagogy; and the parent/community partnership model. These signals are used to interpret the school's public materials and categorize the six categories. The known documents outlining classical indicators (e.g., the Six Essential Elements of a Classical School and associated lexicon) provide the criteria used to assess each category and to determine the category-level ratings. See the knowledge-base materials for the classical rubric and keyword indicators used in this evaluation.

Executive Summary — Element-by-Element Snapshot

- **Element 1: Religious and Metaphysical Foundations — SOMEWHAT CLASSICAL**
- **Evidence:** Public site signals Christian identity (the school name and branding), plus a chapel reference/visual cue on pages hosted under the same domain as the school's athletics/activities. This indicates liturgical and communal practices within a Christian framework.
- **Positive/Negative keyword analysis:** Positive indicators include liturgical practices and theology-related signals (chapel imagery and Christian branding). No explicit negative signals detected in the public materials reviewed. Positive keyword mentions are present (chapel, Christian identity), while explicit transcendental vocabulary (truth/goodness/beauty) is not clearly spelled out in the site text itself. Estimated positive vs negative keyword presence: 2 positives (Christian identity, chapel) vs 0 negatives observed. This aligns with a **CLASSICAL** orientation in a religious context, but with incomplete explicit articulation of transcendental metaphysical language on the site. Classification rationale follows: partial alignment with religious/metaphysical foundations, hence **SOMEWHAT CLASSICAL** rather than **CLASSICAL**.

- Why this rating: The Christian identity and liturgical signal meet some Positive keyword criteria for religious foundations, but the site does not consistently present the full transcendental moral realism and liturgical program described in the classical rubric. The strongest signal is religious identity rather than a fully articulated metaphysical and liturgical program. See the Six Essential Elements lexicon for the positive indicators (truth/goodness/beauty, liturgy, reverence, etc.) and how they would be evidenced in a classical setting.
- Element 2: Purpose and Goal — NOT CLASSICAL
- Evidence: Public materials reviewed show Christian branding and general “Academics” sections, but no explicit public statement declaring formation of virtue and wisdom as the primary aim separate from job/work preparation, nor explicit articulation that education is formation over information in the posted materials. The structure and language presented on the site do not clearly quote or emphasize classical aims such as paideia, formation through liberal arts, or the pursuit of truth/beauty as real ideals.
- Positive/Negative keyword analysis: No explicit positive keywords from the classical formation vocabulary (e.g., formation, virtue, wisdom, scholé, great conversation) are clearly evident in the publicly visible site text. No explicit negative signals identified either, but the absence of stated formation-focused aims suggests a weaker fit for the classical purpose/goal category. Estimated: 0 clear positive keywords vs 0 clear negative keywords (given the site’s lack of explicit formation language). Classification: NOT CLASSICAL.
- Why this rating: Classical education criteria emphasize formation of character, virtue, wisdom, and the real-truth-beauty framework as goals. The site’s public materials do not clearly articulate those aims, so the category is not convincingly Classical. See the knowledge-base treatment of category 2 (formation vs. information; telos; pursuit of truth/goodness/beauty) for context.
- Element 3: Curriculum — NOT CLASSICAL
- Evidence: The site materials reviewed (Kairos/VCAGastonia hosting) show an “Academics” label but do not present explicit classical curriculum markers such as the Seven Liberal Arts (grammar/logic/rhetoric; arithmetic/geometry/music/astronomy), Great Books, or a Great Conversation framework in the public-facing materials. The public materials do not clearly cite Great Books, primary sources, Latin/Greek study, or a historically grounded curriculum, though the school’s Christian/classical branding suggests alignment with some classical norms in principle.
- Positive/Negative keyword analysis: Positive indicators from classical criteria (Seven Liberal Arts, Great Books, quadrivium, etc.) are not present in the accessible site text; Negative indicators (e.g., replacement of history with social studies terminology, project-based emphasis, STEM-first framing) are not evidenced in the site materials either, but the absence of classical curriculum specifics leads to a NOT CLASSICAL rating. Quantitatively, 0 explicit positive keywords versus 0 explicit negative keywords observed in the site text; the absence itself is the basis for NOT CLASSICAL in this category.
- Why this rating: Without textual public materials describing the Seven Liberal Arts, Great Books/Great Conversation, or explicit Quadrivium-based study, the curriculum category cannot be rated Classical. The classical-literature-based curriculum signals are not clearly documented on the site. See the Six Essential Elements document for curriculum keywords and how to identify them.
- Element 4: Pedagogy (Teaching Methods) — NOT CLASSICAL
- Evidence: The public site evidence is limited to standard “Academics”/“Athletics” sections and imagery (e.g., a chapel image). There is no explicit documentation of Socratic seminars, Scholé/restful learning, chant/memorization, or imitation-based pedagogy on the visible pages. The absence of these explicit methods in the public content supports a NOT CLASSICAL categorization for pedagogy.
- Positive/Negative keyword analysis: No positive keywords such as Socratic dialogue, Scholé, memorization/recitation, or imitation-based practice appear in the public content accessible from the site.

Negative signals (e.g., exclusively project-based, experiential-only instruction) are not evidenced either, but the lack of classical pedagogical references leads to NOT CLASSICAL.

- Why this rating: Classical pedagogy emphasizes modalities like Socratic dialogue, memorization/recitation, and contemplative/restful learning (Scholé). The public site content does not document these modalities, so it does not meet the category's classical criteria as presented in the knowledge-base rubric. See the Six Essential Elements pedagogical indicators for specifics (Socratic dialogue; Scholé; memorization/chanting; formation through imitation).
- Element 5: Faculty — NOT CLASSICAL
- Evidence: Public materials do not provide explicit descriptions of faculty as the living curriculum, model teachers, or a faculty culture described as mentors or a "portrait of a teacher." The site's visible content does not document a teacher culture or faculty profiles aligned with classical ideals.
- Positive/Negative keyword analysis: No explicit positive keywords such as "model teachers," "living curriculum," "faculty of friends," or "portrait of a teacher" are found in the publicly accessible site text. Category-specific evidence is not present; thus NOT CLASSICAL.
- Why this rating: Classical education frames the faculty as living exemplars and the core of the school's ethos. The public site content does not clearly present this faculty ethos. Classical Lexicon indicators in the knowledge base call out these faculty cues; their absence in the public site content drives a NOT CLASSICAL rating for this category.
- Element 6: Parents & Community — NOT CLASSICAL
- Evidence: While classical education literature emphasizes partnerships with families and parent formation, the publicly accessible Kairos/VCAGastonia site content reviewed does not clearly articulate a robust parent-partnership stance (co-teachers, parent formation, or open invitation for parents to visit). Some imagery and Christian branding exist, but explicit parent partnership language is not demonstrated in the visible content.
- Positive/Negative keyword analysis: Positive keywords (e.g., partnership with families, parent formation, open campus, family involvement) are not clearly evidenced in the public website text. Negative signals are not explicitly present, but the absence of the canonical parent-community language yields NOT CLASSICAL in this category.
- Why this rating: The classical category expects explicit, ongoing parent partnership and community formation. The site's public materials do not clearly evidence that depth of parent-school partnership, even though the Christian branding exists. The knowledge-base lexicon provides the expected parent-community indicators; their absence in the site content informs the NOT CLASSICAL rating.

Overall assessment (aggregate): SOMEWHAT CLASSICAL

- Rationale: The school is clearly grounded in Christian identity (a religious foundation), and there are liturgical/community cues visible on the site. However, explicit articulation of classical curriculum, pedagogy, and living-teacher ideals in public-facing materials is not strongly demonstrated. The result is a partial alignment with classical education principles rather than a full Classical designation. This places the school in the SOMEWHAT CLASSICAL category overall, with room to elevate to CLASSICAL by publicly documenting classical curriculum, pedagogy, and faculty/community formation in line with the Six Essential Elements.

What Would Move the Needle

- Publish a formal mission statement and public documentation that explicitly states:
- The school's commitment to formation of character through the liberal arts (grammar, logic, rhetoric) and the Quadrivium, with Great Books and primary sources as core texts.
- The pursuit of truth, goodness, and beauty as real and knowable, with concrete examples of how those transcendental aims inform daily teaching, assessment, and disciplines.
- Landmark curricular disclosures:

- Clearly outline a Seven Liberal Arts-inspired curriculum (grammar, logic, rhetoric; arithmetic, geometry, music, astronomy) and show alignment with Great Books/primary sources and a Great Conversation approach.
- Show history as a constant through a Western civilization/historical-literature lens rather than a solely social-studies framing.
- Include explicit integration of theology/faith with other disciplines (the Mistress Science idea) and how liturgical/community practices inform the curriculum.
- Pedagogical transparency:
- Document concrete classical methods in use (e.g., Socratic seminars or Harkness discussions, Scholé/restful learning days, memorization/chanting, and formation through imitation and practice).
- Provide evidence of “living curriculum” where teachers model virtue and students study under exemplary mentors.
- Faculty development and culture:
- Publish a clear “portrait of a teacher” and a description of faculty as mentors and living exemplars, including professional development aligned with classical pedagogy.
- Parents and community partnerships:
- Establish and promote explicit partnerships with families (parents as co-educators; parent formation offerings; open-campus visits; book studies or classical book clubs).
- Public evidence cadence:
- Add a dedicated page or section on the site detailing classical education philosophy, text choices, and pedagogical practices, with references to classical texts and authorities in the field.

ABSTRACT

Kairos Classical Christian Academy NC 28052 presents a Christian, formation-oriented educational posture with visible religious and communal signals (chapel imagery; Christian branding) but lacks explicit public articulation of a full classical curriculum and pedagogy in the available materials. The overall assessment places the school in SOMEWHAT CLASSICAL rather than CLASSICAL, given the limited explicit documentation of classical curriculum components (Great Books, Trivium/Quadrivium, Scholé pedagogy, living-curriculum faculty, and formal partnerships with families) in the public site content. The six-category analysis shows the strongest alignment in Religious and Metaphysical Foundations (led by Christian identity and liturgical cues) and weaker alignment in Curriculum, Pedagogy, Faculty, and Parents & Community, with Purpose/Goal and Curriculum requiring more explicit classical articulation to lift toward CLASSICAL. The knowledge-base rubric and lexical indicators from the Six Essential Elements provide the framework for these ratings, and the presence of Christian formation signals on the public site aligns with SOMEWHAT CLASSICAL rather than NOT CLASSICAL, but without explicit classical foundations documented publicly, the aggregate remains SOMEWHAT CLASSICAL. See the cited classical framework sources for the lexical indicators used in this evaluation.

Note: The analysis relies on the school-related content available in the crawl results (notably the Kairos/VCAGastonia-hosted materials visible on the site) and the classical rubric from the knowledge base. Citations point to the sources that provided the visible evidence and the classical keyword framework used to interpret it.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
