

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Knox Classical Academy
School Website: <https://www.knoxclassical.com/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix for more details.

SCL MEMBER

Any school that belongs to the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because SCL requires adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: CLASSICAL

Executive Summary

Knox Classical Academy (Roseville, MN, 55113) presents a distinctly classical, Christ-centered approach that aligns strongly with core classical education principles across all six rubric categories. Public materials consistently emphasize a three-day Christian classical model, a charitable partnership with families, a Charlotte Mason–influenced pedagogy (living books, narration, nature study), and a Trivium-based curriculum (grammar, logic, rhetoric). The school's communications repeatedly frame education as formation of character and wisdom in a religiously anchored framework, not merely information transfer or workforce preparation. Examples include explicit statements about a Christ-centered community, the use of the Trivium in every classroom, living books and the Great Conversation, and a home-school partnership model that keeps parents as co-teachers. These signals are reinforced by faculty and governance materials, parent-facing content, and curricular descriptions that highlight theology, virtue formation, and liturgical or worship-informed practices. Overall, Knox Classical Academy (Roseville, MN, 55113) earns CLASSICAL across the six categories with only minor tensions in pedagogy wording (e.g., a limited emphasis on explicit Socratic seminars in the public-facing site language).

Key supports drawn from the public-facing site and internal references include: Christ-centered mission and governance language, emphasis on the Trivium (grammar, logic, rhetoric), living books and narration as core pedagogy, nature study and worship-oriented aims, Charlotte Mason–styled curriculum signals, and a family-partnering, open-campus posture. These signals are supported by multiple public materials and the knowledge-base rubric terms (positive keyword indicators for truth, goodness, beauty; formation; Great Books/living books; Socratic/dialogic pedagogy; and partnership with families). Citations reflect the exact sources used from the crawl content and the classical-education rubric lexicon. See cited sources for specific phrasing and scope.

- Overall classification: CLASSICAL
- Executive snapshot notes:
 - Religious and Metaphysical Foundations: strong Christ-centered framing, worship/theology language, and liturgical sensibilities evident in mission and policy language.
 - Purpose and Goal: formation of character and wisdom foregrounded; virtuous education and God-centered aims repeatedly stated.
 - Curriculum: Trivium emphasis (grammar, logic, rhetoric); living books; history-infused and Great Conversation–leaning articulation; evidence of Great Books/reading culture and curricular integration.
 - Pedagogy: inclusion of contemplative/restful elements, narration as a central practice, and singing/chanting in lower grades; some public-language emphasis on Socratic/seminar formats appears less pronounced on the site but is consistent with classical forms.

- Faculty: governance and leadership materials show a formal Head of School and a board of engaged Christian professionals; representations of teacher as living curriculum and mentor appear in profiles and mission statements.
- Parents & Community: explicit emphasis on parental partnership and co-teaching model; openness to visits and parent formation through book/gatherings; strong parent-school integration.

Note: The six-element knowledge lexicon provides the explicit Positive/Negative keyword indicators used to ground the category scoring (see the detailed keyword framework in the Six Essential Elements documents). The Knox materials align with multiple positive indicators (e.g., truth, virtue, Great Books, scholé, living books, partnership with families) and show minimal alignment with negative indicators (e.g., exclusive focus on project-based or secular-workforce framing). See the cited “Six Essential Elements” sources for the rubric terms.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — CLASSICAL

Evidence - Public materials repeatedly frame Knox as Christ-centered and God-oriented, including explicit Christ-centered community language and references to Jesus Christ's lordship in daily life and policy. - Worship, theology, and liturgical sensibilities appear in routines and mission framing (e.g., collective worship language and theology-forward language in related materials). - Nature-study passages connect scientific inquiry with worship and wonder toward God's creation, reinforcing a theologically grounded metaphysical frame.

Positive/Negative keyword analysis - Positive keywords present: Christ-centered, God, worship, theology, liturgy, imago Dei (via theological framing), sacred tradition, wonder. Evidence includes explicit Christ-centered mission, worship-oriented statements, and the God-centered framing of nature-study aims. - Negative keywords: None evident (no strong secular-relativist signals detected in public materials). See rubric expectations for negative signals, none observed in these materials.

Why this rating - The school foregrounds a transcendent moral framework and theological grounding in multiple principal materials (Christ-centered mission, worship/theology language, liturgical sensibilities, and a theology-grounded view of creation). This aligns squarely with the Positive Keyword indicators for Religious and Metaphysical Foundations in the Six Essential Elements lexicon, and the absence of secularly oriented negative signals reinforces a Classical alignment.

Element 2: School Purpose and Goal — CLASSICAL

Evidence - Formation-focused language dominates the mission: formation of virtue and wisdom, not merely job-prep; explicit references to virtuous education and God-centered aims. - Institutional framing emphasizes “formation” and “great conversation” through a classical framework; partnership with families underscores telos-oriented aims beyond information transfer. - Historical and humanistic aims are reflected through living books, Great Conversation framing, and paideia-oriented language in curriculum descriptions.

Positive/Negative keyword analysis - Positive keywords present: formation, virtue, wisdom, liberal education/paideia, great conversation, telos, pursuit of truth/goodness/beauty, human flourishing. Knox materials explicitly discuss formation and virtue in multiple places. - Negative keywords present: minimal evidence of career- or job-prep framing; the site emphasizes formation over information and job-readiness rather than workforce metrics. The absence of career-readiness language in primary mission framing supports a Classical alignment.

Why this rating - The school's stated aims center on virtue formation, wisdom, and the pursuit of truth/goodness/beauty, consistent with the Positive Keyword indicators for Element 2. The public materials do not foreground workforce- or college-then-career readiness as the primary telos, which strengthens CLASSICAL alignment.

Element 3: School Curriculum — CLASSICAL

Evidence - The trivium is explicitly named as foundational pedagogy in every classroom, signaling grammar, logic, rhetoric as core curriculum elements. - Great Books / living books approach appears via references to living books, “great conversation,” and narrative-based learning; history is integrated across disciplines (not treated as separate “social studies”). Narration is a central method. - Curriculum signals include primary sources, grammar/poetics/Latin from early grades, and a two-year science rotation with a God-centered purpose (Nature study and creation-focused framing).

Positive/Negative keyword analysis - Positive keywords present: grammar, logic, rhetoric (Trivium); Great Books / Great Conversation (via living books and culture); history integrated; narration; Latin; interdisciplinary/harmony; wonder; sacred tradition. Public materials show explicit use of grammar/logic/rhetoric and living books through mission and curriculum descriptions. - Negative keywords present: limited reference to modern project-based or externally driven, secular STEM-first framing; the site emphasizes a classical approach rather than modern, non-traditional, or purely vocational/project-based methods. (See Six Elements’ negative cues around project-based or strictly experiential learning; not prominently featured in Knox’s public materials.)

Why this rating - The curriculum signals align strongly with the Classical lexicon: Trivium core, living books, Great Conversation, and an integrated, interwoven historical-literary-scientific approach with a religious frame. This matches the Positive Keyword indicators for Element 3 and shows minimal exposure to the negative signals advocated by the lexicon.

Element 4: Pedagogy or Teaching Methods — CLASSICAL

Evidence - Restful, contemplative tempo (Scholé) and singing/chanting in lower grades are explicitly described as part of the pedagogy; this aligns with a contemplative pace and memory-strengthening methods. The published materials emphasize singing/chanting as a memory tool and as part of a liturgical rhythm, particularly in lower grades. - Narration is a central method; students retell learned material in their own words, reinforcing active recall and integration of content. - There are explicit references to Socratic-style instruction in high school in classical pedagogy lexicons; Knox’s public materials emphasize Socratic dialogic potential via Trivium but place emphasis on narration and living books. The site language does not heavily foreground formal Socratic seminars, but the Trivium framing implies dialectical reasoning as a skill.

Positive/Negative keyword analysis - Positive keywords present: scholé/restful learning, narration, chanting/singing as memorative technique, master-teacher model, formational learning via living books, rhetorical training, and memory-focused pedagogy. Evidence includes explicit lower-school singing/chants, and narration as core practice. - Negative keywords present: limited explicit emphasis on formal, high-frequency Socratic seminars in the public text; the site emphasizes narration and living books over a constant Socratic seminar format. The presence of Socratic dialogue as a keyword is in the rubric; Knox’s site language centers on other classical methods more prominently.

Why this rating - Pedagogy signals align with Classical expectations: contemplative rest, memory-building through chant/singing, narration as a primary method, and a rhetoric-informed trajectory in higher grades, with living books and Great Conversation framings pervasive. The absence of a heavy, explicit, on-the-ground Socratic seminar language does not undermine a Classical status given the strong presence of other Classical pedagogy signals.

Element 5: Faculty — CLASSICAL

Evidence - Governance and leadership materials describe a Head of School and a board with profiles that emphasize virtue, service, and Christian leadership; the faculty is presented as engaged professionals who model virtue and serve as a living curriculum. Leadership posts and board bios appear in the site materials. - Profiles describe teachers as mentors in a classical approach; references to “portrait of a teacher” and “faculty as living curriculum” appear in the content.

Positive/Negative keyword analysis - Positive keywords present: model teachers/mentors, living curriculum, faculty as core, portrait of a teacher, collegial culture, mentorship, godly guidance. Examples include Head of School contact and board bios. - Negative keywords present: no clear signals of a non-classical faculty model (e.g., overly technocratic or certification-driven jargon) appear in the public-facing content. The site emphasizes character and virtue-oriented leadership rather than purely credential-based narratives.

Why this rating - The public-facing materials depict a faculty and governance structure aligned with Classical expectations: a Christ-centered leadership core, mentoring roles, and a living-curriculum orientation that foregrounds character and classical pedagogy. This aligns with the Positive Keyword indicators for Element 5.

Element 6: Parents & Community — CLASSICAL

Evidence - A central organizing principle is partnership with families: families register as homeschoolers in Knox's model and are treated as co-educators; the community emphasizes parental formation and on-site parent involvement. - Public materials highlight opportunities for parent involvement, open campus visits, and classical education book/gathering formats to educate parents about the Classical model. The site repeatedly invites parent participation and transparency. - The program describes home-learning rhythms (home days, on-campus days) designed to engage families as part of the living-learning model.

Positive/Negative keyword analysis - Positive keywords present: parent partnership, co-teachers, parental formation, home-school hybrid, open campus, family formation, classical parent training, parental involvement, living tradition in the family. The site content explicitly uses "parent partnership" and "co-teachers," and describes parent engagement as a core feature of the Knox model. - Negative keywords present: none evident in the public materials; the materials consistently emphasize partnership and family integration rather than consumer-style disengagement. Positive signals dominate.

Why this rating - The school's explicit and repeated emphasis on parental partnership, co-educator roles, parental formation, and open-access campus visits match the Element 6 Positive Keyword indicators strongly, conferring CLASSICAL status in this category.

Aggregate assessment: All six categories reach CLASSICAL status based on keyword alignment and textual evidence from the Knox materials and the classical-education rubric lexicon.

- Overall, Knox Classical Academy (Roseville, MN, 55113) is CLASSICAL.
- The six-category tally supports a strong, cohesive CLASSICAL characterization with robust alignment to the Great Books / living books / Trivium core emphasis, a Christian formation framework, and a genuine parent-partnered model.

What would move the needle - Not applicable here given CLASSICAL status across all six categories. If one sought further refinement, targeted enhancements could include explicit on-site documentation of Socratic seminars in upper grades and an expanded articulation of Scholé as a formal pedagogy label across grade bands. However, these are optional refinements rather than essential shifts.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
