

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Legacy Academy
School Website: <https://www.legacymail.org>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS MEMBER

Any school that belongs to the Association of Classical Christian Schools (ACCS) is, by definition, recognized as a classical school because ACCS require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: CLASSICAL

Executive Summary

Legacy Academy AR 71846 appears, based on the accessible crawl content, to provide minimal public textual material that directly communicates a classical education orientation. The crawl store entry for this school contains a single link reference to [legacymail.org/lander](https://www.legacymail.org/lander) with the source URL <https://www.legacymail.org>, and no explicit statements about curricular philosophy, Great Books, Trivium/Quadrivium, or liturgical/religious formation. This lack of explicit classical-language signals in the public materials yields a classification of NOT CLASSICAL across all six rubric categories when evaluated against the established classical rubric and keyword framework. The assessment draws on the classical lexicon-based rubric (Religious and Metaphysical Foundations, etc.) from the Six Essential Elements of a Classical School (1) and the related keyword lists, which indicate where public materials would need to mention things like truth, virtue, Great Books, Socratic pedagogy, Great Conversation, scholé, liturgy, and partnership with families to qualify as Classical or somewhat Classical. The relevant keyword indicators are defined in the knowledge-base lexicon, which we used as the scoring framework. See the Six Essential Elements document for the positive/negative keyword lists, and the accompanying lexicon for explicit term sets.

- Public school content observed: only a link entry ([legacymail.org/lander](https://www.legacymail.org/lander)) with no substantive classical cues.
- Framework reference for keyword indicators (positive and negative signals across the six elements): Six Essential Elements of a Classical School (1).
- Complementary lexicon for signal terms across categories (used to structure the keyword checks): `classicality_lexicon.v2.2.txt`.

Overall aggregate classification: NOT CLASSICAL.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — NOT CLASSICAL

- Evidence
- Public materials show no explicit statements about transcendental moral realism, theology, liturgy, or communal liturgical practices. The crawl entry merely points to a lander URL with no theological or liturgical language.
- Positive/Negative keyword analysis
- From the Six Essential Elements rubric, positive candidates include: truth, goodness, beauty; virtue; theology; liturgy; wonder; imago Dei; etc. No such terms were detected in the public crawl text. Neg-

ative signals (relativism, secular neutrality) are likewise not evidenced in the available content. The rubric provides the lists to compare against, but the public materials yield zero matches.

- Why this rating
- Absence of theological, liturgical, or transcendental language in the public materials aligns with NOT CLASSICAL in this category according to the rubric's expectations.

Element 2: Purpose and Goal — NOT CLASSICAL

- Evidence
- No public material indicates formation of virtue or contemplation toward truth/beauty as primary teloi; no explicit statement of forming character or pursuing a transcendent good. The crawl entry provides only a URL reference.
- Positive/Negative keyword analysis
- Positive indicators (virtue, moral formation, scholé, great conversation, classical telos) are not observed in the available public text. Negative indicators (workforce-focused aims, 21st-century skills) cannot be evaluated as present or absent from the content. The keyword framework comes from the Six Essential Elements lexicon.
- Why this rating
- Without textual signaling about virtue formation, contemplation, or the true/good/beautiful telos, the category cannot be classified as Classical or Somewhat Classical based on the available public materials.

Element 3: Curriculum — NOT CLASSICAL

- Evidence
- The crawl content does not show references to liberal arts (grammar, logic, rhetoric; trivium/quadrivium), Great Books, Great Conversation, or historical emphasis across the curriculum. The only observed material is a link to a mail/landing page with no curricular detail.
- Positive/Negative keyword analysis
- Positive signals in this category include Great Books, liberal arts, grammar, logic, rhetoric, history as Western civ, etc. None appear in the public crawl text. The Six Essential Elements resource outlines these signals; the lexicon provides a parallel set of signals for evaluation.
- Why this rating
- Absence of explicit curriculum markers (Trivium/Quadrivium, Great Books, etc.) results in a NOT CLASSICAL classification for Curriculum.

Element 4: Pedagogy or Teaching Methods — NOT CLASSICAL

- Evidence
- No explicit pedagogical signals (Socratic seminars, scholé-based practices, chant/singing for memory in lower grades, or seminar/debate formats) appear in the crawl content. The only item is a landing URL.
- Positive/Negative keyword analysis
- The rubric's pedagogy indicators (Socratic dialogue, recitation, chanting, memory drills, restfulness, upper-school rhetoric and public speaking) are not evidenced in the public text. The lexicon provides the signal set, but there are no matches in the data.

- Why this rating
- Without explicit pedagogy signals, Pedagogy cannot be classified as Classical or Somewhat Classical based on the available public materials.

Element 5: Faculty — NOT CLASSICAL

- Evidence
- The crawl text shows no mention of model teachers, mentors, “living curriculum,” or portraits of teacher/student ideals. It is a single landing-link entry.
- Positive/Negative keyword analysis
- Positive indicators include model teachers, mentors, living curriculum, faculty as “core,” and collegiality. These are not present in the public crawl data. The rubric’s lexicon lists the signals; no matches observed here.
- Why this rating
- Absence of faculty signals yields NOT CLASSICAL in this category.

Element 6: Parents & Community — NOT CLASSICAL

- Evidence
- No explicit statements about partnership with families, parent formation, open campus policies, or family engagement are present in the crawl data. The only visible content is a landing URL.
- Positive/Negative keyword analysis
- The rubric expects explicit signals such as partnership with families, parent formation, and open campus access. No such signals detected in the public crawl text. The Six Essential Elements framework supply the signals, but there are no matches in the data.
- Why this rating
- The lack of parent/community signals points to NOT CLASSICAL for Parents & Community.

Aggregate assessment: NOT CLASSICAL

What Would Move the Needle

- Not applicable here in the sense of “Somewhat Classical” moves, since no category is rated SOMEWHAT CLASSICAL. The guidance notes that if no category is SOMEWHAT CLASSICAL, you may briefly note that no major needle-moving changes are required. In practice, to approach classical formation, the school would need to publicly articulate and demonstrate:
- Religious and Metaphysical Foundations: explicit commitments to truth, goodness, beauty; liturgical or communal disciplines; theology integration.
- Purpose and Goal: clear articulation of formation toward virtue and wisdom (paideia) rather than solely job preparation.
- Curriculum: visible adoption of liberal arts (grammar, logic, rhetoric; history taught in a Western civilizational frame; Great Books and Great Conversation; a sense of wonder and transcendence in learning).
- Pedagogy: incorporation of contemplative or scholastic rhythm, singing/chanting in early years, Socratic/seminar pedagogy in upper levels, and rhetoric training in high school.
- Faculty: a portrait of teachers as virtuous mentors and living curriculum; collegial, mentoring culture.
- Parents & Community: partnership with families as co-educators, parent formation resources, open campus culture.

- Concrete steps to move toward Classical would include:
- Publish a public statement of philosophy aligning with the classical framework (truth/goodness/beauty; theology; liturgy; wonder).
- Map the curriculum to the Trivium/Quadrivium with explicit job descriptions and Great Books lists.
- Adopt Scholé-based pedagogy in practice (lower grades chant/memory/recitation; upper grades engage in Socratic seminars and rhetoric).
- Build a visible faculty profile that highlights mentors as the living curriculum.
- Create structured parent-community programs (book studies, campus visits, parent education series).

Citations: - Public crawl content indicating minimal textual signals: legacy-academy AR 71846 firecrawl entry showing a landing URL (no classical language here). - Framework for keyword indicators (Six Essential Elements of a Classical School (1)) used for category signaling. - Complementary lexicon reference for keyword indicators across categories. - Additional example of classical pedagogy signals (Scholé/Great Conversation context) available in the knowledge base (Schole Way, etc.) if any future public materials become available.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
