INSTITUTE

Six Elements of Classical Education School Website Audit

School: Legacy Christian Academy
School Website: <https://legacy-christian.com/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

Overall Classification: SOMEWHAT CLASSICAL**Executive Summary**

Legacy Christian Academy CA 91355 (as represented by public materials surfaced in the crawl) presents a classical, Christian-leaning program with clear lineage to the traditional liberal-arts model. Public materials emphasize a classical curriculum (Latin, classical studies, logic, literature) delivered in a structured, community-oriented environment that partners with families. The school positions itself as a Christian, traditional, virtues-focused program and references the Great Books/Great Conversation idiom through its use of Memoria Press materials and classical pedagogy. However, explicit statements about liturgical practice, formal Socratic pedagogy in high school, or a fully developed “living curriculum” communicated directly on the site are less overt. Taken together, the school demonstrates many core classical elements (grammar, logic, rhetoric; Great Books culture; parental partnership; formation of affections in a Christian frame) but with some gaps in publicly stated pedagogy and explicit liturgical/programmatic language.

Overall classification: SOMEWHAT CLASSICAL

- Most clearly classical signals: explicit classical curriculum (grammar/logic/rhetoric), Latin/Classical Studies, use of a traditional model with parental involvement, and a focus on truth, goodness, and beauty in a Christian frame. Evidence sources point to Memoria Press-based offerings, a two-day-per-week structure, and explicit Christian formation language. See public pages describing the HLS Santa Clarita model, two-day enrollment, and the Good/True/Beautiful formulation.
- Notable gaps for full Classical alignment: explicit liturgical practices, sustained Socratic seminars and high-school-level rhetoric coaching explicitly stated on the site, and a fully developed “living curriculum” communicated publicly. The framework exists in ancillary/classical-education literature linked in the knowledge store, but it is not consistently evidenced on the school’s own public materials.

What would move the needle toward CLASSICAL: - Make explicit on-site statements about liturgical/community practices (chapel, worship, seasonal rites) and the role of the church in daily formation. - Include explicit, high-school-level Socratic seminars, rhetoric training, and public articulation of “great books” engagement and the Great Conversation in grade-level descriptions. - Publish a concise statement of the school’s “living curriculum” and how teachers model virtue in day-to-day instruction. - Clarify how Great Books / Western canon is integrated across grades, and provide sample course sequences demonstrating grammar–logic–rhetoric progression with direct references to classic texts.

Executive Summary — Element-by-Element Snapshot

- Element 1: Religious and Metaphysical Foundations — SOMEWHAT CLASSICAL
- Element 2: Purpose and Goal — SOMEWHAT CLASSICAL
- Element 3: Curriculum — SOMEWHAT CLASSICAL
- Element 4: Pedagogy — SOMEWHAT CLASSICAL
- Element 5: Faculty — SOMEWHAT CLASSICAL
- Element 6: Parents & Community — CLASSICAL

Notes on the six-category rubric: The school demonstrates substantial classical cues (Christian orientation, classical curriculum, parental partnership, classic liberal-arts pedagogy in structure). However, explicit liturgical practice, concrete Socratic methods in upper grades, and a clearly communicated “living curriculum” are less overt in the public materials, which grounds Category scores primarily in the SOMEWHAT CLASSICAL band for most categories. The Parents & Community category shows the strongest alignment with Classical indicators (families as co-educators, visible parental involvement).

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — SOMEWHAT CLASSICAL

Evidence - Public materials emphasize Christian framing and moral formation: “We are a classical, Christian homeschool support program” and the aim to engender love for the Good, the True, and the Beautiful. - The program uses a Christian framework (Lord/Faith orientation) and relies on a classical approach to education (Memoria Press materials, classical languages).

Positive/Negative keyword analysis - Positive keywords found: Christian; Good, True, Beautiful; Virtue-related framing (virtue implied through the Good/True/Beautiful triad); Theological framing (explicit Christian formation). - Negative keywords found: None of secular, nonreligious, or secularist signaling appear in the public materials. The absence of secular framing supports a Christian/classical orientation rather than a secular approach.

Why this rating - The school’s public materials clearly anchor education in a Christian metaphysical frame and moral formation through the Good/True/Beautiful triad, with explicit Christian identifiers. However, explicit liturgical practices (worship/music as integral) are not strongly evidenced on the site, which is why the category does not reach full Classical (due to the liturgical/communal component not being strongly evidenced on the public site). The overall alignment is robust but not fully exhaustive of the liturgical/communal dimension. CLASSICAL signals exist but not all three criteria are demonstrated publicly.

Notes on needle-moving changes - Add explicit statements of liturgical practices (chapel, communal worship) and daily/seasonal rites. - Provide explicit evidence of theological integration across disciplines (e.g., theology as a “Mistress Science” inside core classes beyond general Christian framing).

Citations: The Christian framing and Good/True/Beautiful language are evidenced in the public pages and admissions/Who We Are areas.

Element 2: School Purpose and Goal — SOMEWHAT CLASSICAL

Evidence - Public materials emphasize formation and virtue through a classical framework and aim to engender a love for the Good, the True, and the Beautiful. This signals formation-oriented aims beyond mere information transfer. - The curriculum is described as classical (grammar/logic/rhetoric foundations), with Latin and classical studies as core features, pointing toward formation via classical pedagogy.

Positive/Negative keyword analysis - Positive keywords found: Good, True, Beautiful; virtue-related language (formation of affections implied by classical formation); classical education framing (grammar/logic/rhetoric, Memoria Press). - Negative keywords found: None signaling secular/information-forward/technology-centric education; no explicit “work-prep” or purely vocational framing appears in the public materials. The materials lean toward formation rather than information, aligning with classical aims.

Why this rating - The school indicates formation-oriented aims in the Christian classical frame (Good/True/Beautiful) and uses a classical curriculum that is intended to shape character and wisdom. However, explicit language tying the goal to “virtue and wisdom” in a way that matches all rubric items is not consistently explicit across the public materials (the formation language is present but not universally explicit in the exact phrases used by the rubric). Therefore SOMEWHAT CLASSICAL is the prudent rating.

Needle-moving changes - Explicitly articulate aims like “formation of virtue and wisdom” and “the mind can know truth, goodness, beauty” in public statements; connect daily pedagogy to formation outcomes beyond information delivery.

Citations: Good/True/Beautiful phrasing and formation emphasis on public pages.

Element 3: Curriculum — SOMEWHAT CLASSICAL

Evidence - Core curricular features include grammar, logic, rhetoric (the Trivium) and classical studies; Latin and classical languages are highlighted as central subjects. This aligns with classical curricular scaffolding. - The program uses a classical core (Memoria Press curriculum) and references “core”/“grammar school”/“upper school” course offerings with emphasis on literature, Latin, logic, and classical composition.

Positive/Negative keyword analysis - Positive keywords found: grammar, logic, rhetoric; Latin; classical studies; Memoria Press curriculum; liberal arts core. These terms map directly to the classical curriculum indicators. - Negative keywords found: Not explicitly referenced; there is no indication of secular or non-classical histories (absence of negative terms is notable). However, absence of explicit Great Books language and explicit “Great Conversation” phrasing on the public site reduces the strength of the encoding of the “Great Books / Great Conversation” dimension.

Why this rating - The school demonstrates strong classical curricular components (grammar/logic/rhetoric and Latin, with a classical core). However, explicit public articulation of Great Books and the Great Conversation as a curricular centerpiece is not consistently evidenced on the site, which keeps Element 3 at SOMEWHAT CLASSICAL rather than CLASSICAL. The presence of Memoria Press and the described core topics are strong, but the Great Books/G.C. dimension is less explicit in public materials.

Needle-moving changes - Publicly articulate Great Books and the Great Conversation as a curricular pillar, with examples of published reading lists or course sequences across grades. - Provide sample syllabi or unit plans showing how grammar/logic/rhetoric progress into literature and history, with explicit references to classic texts.

Citations: Curriculum descriptions, Memoria Press, and course offerings cited from public pages.

Element 4: Pedagogy or Teaching Methods — SOMEWHAT CLASSICAL

Evidence - The classical-pedagogical frame is supported by the existence of language-based study (Latin, classical studies, literature) and the emphasis on a structured, teacher-guided classroom. The two-day-per-week enrollment model is a distinctive pedagogical format that implies a particular rhythm and memory-based approach (repetition and recitation typical of classical pedagogy). - The public materials imply a commitment to a traditional, classical approach (grammar/logic/rhetoric progression) and a pedagogical structure that includes memory and recitation in lower grades (as seen in classical education literature tied to the curriculum). See public references to classical core curriculum.

Positive/Negative keyword analysis - Positive keywords found: Socratic discussion in upper grades (not explicitly stated on the site, but the classical pedagogy orientation implies Socratic-style inquiry) and rhetoric training (upper-school rhetoric). The site mentions logic, classical composition, and literature as core activities, which align with traditional classical pedagogy. - Negative keywords found: none, but explicit statements about lower-grade singing/chanting and contemplative pedagogy are not clearly documented on the public site (which is a classical cue in traditional schools). The absence reduces the strength of a fully liturgical/chant-based pedagogy claim.

Why this rating - The program shows classic pedagogical elements (grammar/logic/rhetoric, classical literature, Latin). However, the site lacks explicit, consistently stated evidence of specific practices such as regular Socratic seminars, structured chant/singing in the lower grades, or a clear articulation of contemplation/restful pedagogy in day-to-day teaching across grade bands. Therefore, SOMEWHAT CLASSICAL is warranted.

Needle-moving changes - Publish explicit examples of upper-school Socratic discussions and seminars; provide examples of lower-school chanting/memory routines; publish a short description of contemplative/restful pedagogy integrated with rigorous study.

Citations: Pedagogical structure and classical-curriculum emphasis drawn from public pages.

Element 5: Faculty — SOMEWHAT CLASSICAL

Evidence - The public materials describe classical education as the framework and reference the HLS Model as a unified approach; however, explicit portrait-language of faculty as “models of virtue” or a formal “living curriculum” communicated on the site is not clearly shown in the accessible public pages. The “Good Teacher” literature (from the knowledge base) provides a model of teacher as mentor and living curriculum in general classical pedagogy; this informs the rubric but is not necessarily a direct site claim.

Positive/Negative keyword analysis - Positive keywords found: Mentorship, virtue-formation language appears in classical education literature (the Good Teacher text) and is consistent with the classical-pedagogical ethos. While the site itself doesn’t necessarily publish a teacher-portrait, the public materials imply a teacher-guided classical model. - Negative keywords found: None of explicit “teacher as mere technician” or “non-virtue-based” descriptors; the public materials do not challenge or undermine the “virtuous teacher” model, but they also do not directly articulate a robust “living curriculum” narrative on the site itself. This modest absence keeps the assessment at SOMEWHAT CLASSICAL.

Why this rating - While there is an implicit expectation of teacher-guided classical instruction, there is not a clearly stated “living curriculum” or a robust teacher-portrait on the public site. The presence of classical pedagogy and the HLS Model suggests the faculty could be aligned with classical ideals, but explicit statements are limited in the public materials. So, SOMEWHAT CLASSICAL.

Needle-moving changes - Publish a concise “Faculty Profile” page describing teacher qualification, virtues, mentorship role, and ongoing professional formation. - Articulate how teachers model virtue and how faculty operate as “the living curriculum” in daily practice.

Citations: Public materials mention the HLS Model and classical framework; the Good Teacher document provides a model of how teachers function in classical education.

Element 6: Parents & Community — CLASSICAL

Evidence - Public materials emphasize parental involvement and partnership in classical education: “All instruction is provided in the classroom with parents providing homework help,” “two-day/week enrollment,” and admissions language inviting families to join the community. This clearly signals active parental partnership (co-education) and family engagement. - The admissions messaging emphasizes forming a community of families and invites parent involvement, with emphasis on the Lord and classical formation. The materials directly address parents as part of the educational partnership.

Positive/Negative keyword analysis - Positive keywords found: Partnership with families; parents as co-educators; family involvement; community of learners; parental engagement; home-school connections; joint mission; parental formation. These map directly to the Six Essentials’ Family-Partners signals. - Negative keywords found: None that indicate a lack of parental involvement; the site explicitly invites parents to participate, visit, and engage. The presence of public statements corroborates the partnership model.

Why this rating - The school demonstrates strong evidence of partnership with families and a deliberate strategy to engage parents as co-educators. This aligns with the classical model’s emphasis on community and familial formation. Therefore Element 6 earns CLASSICAL.

Needle-moving changes - Maintain and grow the explicit, public articulation of parent education initiatives (book studies, gatherings) to strengthen the “parents as co-educators” claim. - Expand opportunities for parent visits and regular engagement forums to deepen the community dimension.

Citations: Public pages describing parental involvement, co-educator framing, and admissions language.

What Would Move the Needle

- Element 1 (Religious and Metaphysical Foundations): Introduce explicit liturgical/communal practices in public materials (chapel, communal prayer, liturgical calendar) and provide a visible “theology in the classroom” integration across disciplines.
 - Element 2 (Purpose and Goal): Add explicit, publicly stated statements about formation of virtue and wisdom as the central aims of education; connect daily pedagogy to virtue formation with examples.
 - Element 3 (Curriculum): Publish explicit Great Books/Great Conversation framing in grade-level sequence; provide sample reading lists and unit plans linking grammar/logic/rhetoric to canonical texts.
 - Element 4 (Pedagogy): Include explicit examples of upper-school Socratic seminars, debates, or rhetoric training; include clear lower-school singing/chanting memory routines; publish a contemplation/rest model for pedagogy.
 - Element 5 (Faculty): Publish a “Living Curriculum” section and faculty portraits, detailing teacher roles as mentors/model virtues; describe ongoing faculty formation and virtue exemplars.
 - Element 6 (Parents & Community): Maintain and expand parent education offerings (book studies, parent circles); increase opportunities for parent visits with structured feedback loops.
-

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
