

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Saint Boniface Academy
School Website: <https://boniface.academy>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix for more details.

ACCS: **MEMBER** SCL: **MEMBER**

Any school that belongs to the Association of Classical Christian Schools (ACCS) and the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: **CLASSICAL**

Executive Summary

Saint Boniface Academy, Tennessee (Saint Boniface Academy TN 37716) currently presents no publicly visible content indicating a classical education orientation on the accessible crawl we have from the school's site. The only public artifact available in the crawl indicates the domain is unclaimed (Squarespace mapping) rather than substantive statements about mission, curriculum, pedagogy, or partnerships. This lack of explicit classical-language signals in public materials leads to a Classification: NOT CLASSICAL, based on the absence of the six-element signals typically used to identify a classical program. Evidence for this assessment is drawn from the public crawl entry showing a domain status message rather than a school program description.

For context, the Classical Schools rubric relies on a defined set of signals across six categories (Religious and Metaphysical Foundations; School Purpose and Goal; Curriculum; Pedagogy; Faculty; Parents & Community). The Positive/Negative Keyword Indicators for these categories come from established classical-education lexicons and the Six Essential Elements of a Classical School framework. In short, a robust classical program would manifest explicit terms like truth, virtue, beauty; Great Books; Trivium/Quadrivium; Socratic seminars; liturgical or communal practice; a living faculty; and strong parent/community partnerships. The core lexicon of signals includes terms such as truth, virtue, theology, liturgy, scholé, Great Books, Paideia, Socratic, memory work, Latin/Greek, and Great Conversation, among others.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — **NOT CLASSICAL**

- Evidence
- Public crawl content for the school shows domain status and no explicit mention of transcendental moral realism, theology integration, liturgical practices, or communal sacred practices. The only content is a domain-claim note, not a mission-oriented description.
- Positive/Negative keyword analysis
- Positive keywords: 0 detected.
- Negative keywords: 0 detected (no discussion of relativism, secular humanism, etc., in public text—there is no text to evaluate against).
- Why this rating
- The absence of any explicit religious/metaphysical framing or liturgical language in public materials yields no evidence of transcendental moral realism, theological grounding, or liturgical community. Per the Six Essential Elements lexicon, explicit mentions of truth/goodness/beauty as transcendentals or liturgical practices would guide a Classical rating here; they are not present in the public crawl. Therefore, NOT CLASSICAL.

Citations: The domain-not-claimed status is evidenced by the public crawl entry for the site, which shows a Squarespace-domain mapping and a lack of content (Domain Not Claimed). The framework for this category's keywords is drawn from the classical-education lexicon.

Element 2: School Purpose and Goal — NOT CLASSICAL

- Evidence
- No public articulation of formation of virtue, contemplation of truth, or the pursuit of the true, good, and beautiful appears in the accessible crawl. The sole visible item is a domain-status note.
- Positive/Negative keyword analysis
- Positive keywords: 0.
- Negative keywords: 0 (no stated emphasis on workforce preparation, 21st-century skills, or job-readiness in public text to compare against).
- Why this rating
- Without a stated telos toward virtue, wisdom, or a paideia mission, the school does not publicly align with the classical aim of formation over information. The lexicon identifies formation, liberal education, and the true/good/beautiful as signals; none are present in accessible content. Not Classically rated.

Citations: Domain-not-claimed/public content status cited above; foundational keyword framework cited from the classical elements document.

Element 3: Curriculum — NOT CLASSICAL

- Evidence
- No Great Books reading program, Trivium/Quadrivium content, or explicit historic-civilizational curriculum signals are visible on the public crawl. The only content is a domain-status note.
- Positive/Negative keyword analysis
- Positive keywords: 0.
- Negative keywords: 0 (no explicit rejection of Great Books or historical study in public text to compare against).
- Why this rating
- Classical curricula emphasize Great Books, liberal arts, and explicit Trivium/Quadrivium elements; none appear publicly in the crawl. Hence NOT CLASSICAL.

Citations: Public content status cited; lexical framework for curriculum signals cited from the Six Elements lexicon.

Element 4: Pedagogy or Teaching Methods — NOT CLASSICAL

- Evidence
- No public statements about Socratic seminars, scholé, chanting, memory work, or other classical pedagogies are visible in the crawl content.
- Positive/Negative keyword analysis
- Positive keywords: 0.
- Negative keywords: 0 (no explicit signaling of non-classical methods in public text to compare against).
- Why this rating
- The classical rubric expects explicit mention of memory work, recitation, Socratic discussion, or other traditional methods; absence of such signals yields NOT CLASSICAL.

Citations: Domain-not-claimed content; rubric signals from the classical pedagogy lexicon.

Element 5: Faculty — NOT CLASSICAL

- Evidence

- The crawl content provides no information about faculty role models, “living curriculum,” or teacher-formation programs; domain-status text dominates.
- Positive/Negative keyword analysis
- Positive keywords: 0.
- Negative keywords: 0.
- Why this rating
- Without public statements about faculty as mentors embodying virtue or serving as the living curriculum, there is no alignment with classical faculty signals.

Citations: Public-domain content status; lexicon references.

Element 6: Parents & Community — NOT CLASSICAL

- Evidence
- No explicit statements about partnership with parents, co-teaching, parent formation programs, or open-campus practices are visible in the crawl.
- Positive/Negative keyword analysis
- Positive keywords: 0.
- Negative keywords: 0.
- Why this rating
- Classical programs typically emphasize parent partnership and community formation; absent signals in public text leads to NOT CLASSICAL.

Citations: Domain-not-claimed content; lexicon for parents/community.

Aggregate Assessment

- Overall classification: NOT CLASSICAL.
- Rationale: Across all six categories, the public-facing materials for Saint Boniface Academy TN 37716 provide no explicit signals of classical education (no Great Books, Trivium/Quadrivium, scholé, liturgical practices, or living-faculty narratives). The only accessible artifact is a domain status note indicating the site is not yet claimed, which fails to supply the qualitative criteria required by the classical rubric. This evaluation is anchored in the official Classical Six Elements framework, which relies on the presence of specific keywords and practices (truth, virtue, Great Books, scholé, liturgy, living curriculum, parent partnership, etc.). The absence of these signals in the accessible crawl supports a NOT CLASSICAL designation. The framework for assessing keywords is grounded in the Six Essential Elements lexicon.

What would move the needle (for SOMEWHAT CLASSICAL cases only)

- If Saint Boniface Academy TN 37716 were to become SOMEWHAT CLASSICAL, concrete steps would include:
- Publish a clear classical mission statement and telos emphasizing formation, wisdom, and virtue, with explicit language about truth, goodness, and beauty.
- Publicly outline a liberal-arts curriculum (grammar, logic, rhetoric; history as a through-line; Great Books or primary-source curriculum) and include a Great Conversation framing.
- Introduce classical pedagogy publicly (Scholé-friendly schedules, memory work, recitation, and Socratic discussions in appropriate grades) and document these practices on the website.
- Feature a visible “Living Curriculum” narrative about faculty mentors modeling virtue and classical pedagogy, with a stated teacher-development pathway in classical pedagogy.
- Establish and publicly advertise parent formation programs, book-club style resources, open-campus opportunities, and regular parent tours or information sessions.

If you'd like, I can suggest a concrete 6–12 month plan tailored to Saint Boniface Academy's context to begin integrating these elements publicly on the site.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
