

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Trinitas Christian School

School Website: <https://www.trinitaschristian.org>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix for more details.

ACCS: ACCREDITED MEMBER SCL: MEMBER

Any school that belongs to the Association of Classical Christian Schools (ACCS) and the Society for Classical Learning (SCL) is, by definition, recognized as a classical school because both organizations require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: **CLASSICAL**

Executive Summary

Trinitas Christian School in Pensacola, FL 32514 presents a predominantly CLASSICAL profile across the Six Essential Elements rubric, anchored by a clearly Christ-centered, theologically informed framework and a classical curriculum featuring grammar, logic, and rhetoric, along with heavy emphasis on Latin/Greek and Great Books ideals. Public materials show explicit theological grounding (Statement of Faith, Christ-centered identity) and a formation-focused goals statement, alongside a curriculum built around the Trivium and classical disciplines. There are clear signs of strong parental partnership and community integration. Two dimensions show more mixed or partial alignment (pedagogy and faculty modeling), which places those categories in SOMEWHAT CLASSICAL. The aggregate assessment is CLASSICAL, with some needle-moving opportunities in Pedagogy and Faculty to reach full CLASSICAL alignment.

Key evidentiary threads - Religious and Metaphysical Foundations are strongly present via Christ-centered framing, theology-integration, and explicit ecclesial language in public-facing materials (e.g., description of the school as Christ-centered and the explicit use of Latin/Greek in a theologically framed classical curriculum). Text from the school's materials also frames classical education within a Christian worldview and explicitly references sacred texts and faith-based formation (e.g., "The end goal of classical Christian education is a virtuous human being whose entire life is surrendered to the lordship of Jesus Christ"). - Purpose and Goal foregrounds formation and virtue, with a clear anti-overspecialization stance and a teleology oriented toward truth, goodness, and beauty as real, knowable, and guiding the process (formation over mere information; virtue and wisdom). This is spelled out in canonical statements from Trinitas materials, including the explicit end-goal language cited above. - Curriculum is explicitly classical: grammarian scaffolding (grammar, logic, rhetoric) across K-12, with named tracks (Grammar School, Logic School, Rhetoric School), and explicit reference to Great Books and Great Conversation through public-facing materials. The school also highlights classical languages (Latin and Greek) as core, with historical breadth and a focus on integrating history across disciplines. Evidence includes explicit listing of grammar/logic/rhetoric pathways and Great Books language in public materials, plus a staff page referencing Latin/Greek instruction, and. - Pedagogy contains recognizable classical elements (memory work and chanting in lower grades; opportunities for public speaking and rhetoric in upper grades; some restful/scholé undercurrent). Lower-grade memory/chanting is taught as a memory-building practice; upper-grade rhetoric and public speaking exist as outgrowths of classical education. See statements about memorization/recitation and public speaking, with citations to pedagogical descriptions in public materials, and relevant classroom-content references indicating ongoing emphasis on classical oratory and language study. - Faculty expectations and role modeling are signposted through the public-facing structure (Faculty & Staff pages; "living curriculum" concepts appear in classical-education literature referenced in the knowledge base). While public pages emphasize the existence of a faculty/staff structure and mission-oriented formation, explicit "living curriculum" phrasing and deeper faculty-role modeling language are not as overt in the scraped public materials as they are in classical-education theory; this area is therefore classified as SOMEWHAT CLASSICAL in this instance. -

Parents & Community are portrayed as central partners in classical formation: partnerships with families, parent formation opportunities, and accessible visitation policies are referenced in multiple public materials (e.g., Parent Links, “Partnership with Families” framing, and statements inviting parental involvement) , and.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — CLASSICAL

- Evidence
- The site presents Trinitas as a Christ-centered, classical school, with explicit language about Christian formation and theology guiding education. The school’s public-facing description highlights a Christ-centered environment and classical framework, indicating a transcendental moral realism oriented toward truth, goodness, and beauty in a theistic frame.
- Public-facing materials describe Greek/Latin study as part of serving a Christian worldview and biblical instruction as central to the classical model (e.g., Greek as the language of the New Testament; theology-integration through classical languages).
- The Great Books/Great Conversation orientation and the incorporation of literature and sacred texts in the curriculum further anchor metaphysical inquiry in a transcendent frame.
- Positive/Negative Keyword Analysis
- Positive keywords present: Christ-centered, theology, sacred scripture, Christian worldview, grace/virtue language, Logos, sacred tradition, biblical studies, reverence, wonder, liturgy (where referenced in broader classical-education materials). Relevant point-quotes include Latin/Greek as core, and explicit theistic framing within the curriculum.
- Negative keywords: Not clearly present in available public materials (no explicit secular/humanist framing observed in the school’s public pages).
- Why this rating
- The presence of explicit Christian-theological framing paired with a classical curriculum strongly aligns with the Religious and Metaphysical Foundations criteria, yielding CLASSICAL for Element 1.

Element 2: Purpose and Goal — CLASSICAL

- Evidence
- Public materials articulate formation and virtue as central goals rather than mere information delivery; the language explicitly centers on virtue, formation of character, and the pursuit of wisdom, truth, and beauty as real, knowable ideals. A canonical articulations states that the end goal is a virtuous human being surrendered to Christian lordship, with formation over information and a teleology toward truth, goodness, and beauty.
- Additional text emphasizes education as formation, cultivation of virtue, and human flourishing within a classical framework rather than solely job-readiness or purely informational objectives. The Great Books and virtuous-inquiry emphasis reinforces the teleological aims of classical education.
- Positive/Negative Keyword Analysis
- Positive keywords present: virtue, formation, wisdom, truth, goodness, beauty, contemplation, human flourishing, teleology, Logos, virtue ethics, moral imagination, eternal truths, contemplation, and the goal of moral and intellectual excellence per classical pedagogy. The explicit statement of formation and a virtue-centered telos is well evidenced in the texts above .
- Negative keywords present: the site itself critiques mere “college-ready” or workforce-focused aims; the public materials include explicit statements that Trinitas is not a college-prep or strictly job-oriented program, aligning with a formation-first stance. The public statement that Trinitas is not a college-prep school appears in related public materials (e.g., discussions about aims and outcomes).
- Why this rating
- The school’s mission and public-facing communications foreground formation, virtue, and the real-truth-goodness-beauty teleology, aligning strongly with CLASSICAL on Element 2.

Element 3: Curriculum — CLASSICAL

- Evidence
- The curriculum is explicitly organized around the classical Trivium: Grammar (K-8), Logic (7-9), and Rhetoric (10-12) tracks are listed as core structural elements of Academics, with public materials highlighting Great Books, primary sources, and classical languages (Latin and Greek) as central to the education; history is treated as a through-line rather than merely a social-studies module; there is emphasis on reading great books and engaging in the Great Conversation. The presence of Grammar/Logic/Rhetoric tracks and Great Books language is explicit in navigation and content references (e.g., Grammar School, Logic School, Rhetoric School; Great Books; Great Conversation) , and.
- Latin and Greek are described as core, with explicit teaching of both classical languages as part of the core curriculum to fortify language, logic, and comprehension skills, consistent with a classical curriculum approach.
- There is explicit mention in school material of not emphasizing STEM and of a broad inter-disciplinary, classical canon focus (including Western heritage, Great Books, and classical texts) as opposed to a STEM-first framing, which aligns with classical curricular norms and counters modern, non-classical trends in some aspects.
- Positive/Negative Keyword Analysis
- Positive keywords present: grammar, logic, rhetoric, Great Books, Great Conversation, classical languages (Latin/Greek), history (as history rather than social studies), western heritage, classical canon, primary sources, liberal education, and integration across subjects. Public materials explicitly reference grammar/logic/rhetoric tracks and Great Books language , and.
- Negative keywords present: STEM-first framing is explicitly noted as not emphasized; references to STEM being downplayed are present in public materials, which aligns with classical curriculum norms but also signals a partial tilt away from modern, project-based STEM emphasis. The public statements indicating limited emphasis on STEM appear in public materials (e.g., “Trinitas does not emphasize STEM”).
- Why this rating
- With clear, named classical tracks (Grammar-Logic-Rhetoric), explicit Great Books/Great Conversation orientation, and classical languages as core, the curriculum alignment is robustly CLASSICAL.

Element 4: Pedagogy or Teaching Methods — SOMEWHAT CLASSICAL

- Evidence
- Observed pedagogy includes traditional elements consistent with classical education: lower-grade memorization/recitation and singing to deepen memory, and a structure that moves toward more dialogic, rhetoric-focused work in higher grades. The public materials explicitly describe memorization/recitation as key (lower grades), and there are public-facing references to public speaking and oratory (John Chrysostom-type oratory activities) at the high-school level. These elements align with classical pedagogy, especially the shift from memory-based pedagogy in early years to dialectic/rhetoric/seminar-style activities in upper grades ,.
- There is evidence of Socratic/seminar-like activity in upper grades in the broader classical framework described by the public materials, though explicit classroom implementation in the publicly accessible pages is less direct. The school’s emphasis on classical languages and public speaking suggests rhetoric-training and organized oratory opportunities in the upper grades.
- Positive/Negative Keyword Analysis
- Positive keywords present: recitation, memorization, chanting, singing (lower grades); public speaking; rhetoric; oratory; seminar/paideia-like discussion (implied by classical framework). The explicit phrasing about memorization/recitation and the presence of public speaking activities provide clear classical pedagogy signals ,.
- Negative keywords present: there is some textual emphasis indicating public schooling elements beyond memory and recitation, but explicit “experiential learning” or strictly student-led, project-based pedagogy guidance is not the dominant pattern here; the material leans toward classical, teacher-guided dialogic activities rather than a fully student-led, constructivist approach. This aligns with the

category's negative signals for non-traditional, project-based pedagogy in the classical lexicon.

- Why this rating
- Pedagogy displays robust classical elements (memory work + recitation in the grammar phase; public speaking and rhetoric in upper grades) yet the explicit, large-scale implementation of Socratic seminars or Paideia-style seminars is not consistently documented in public pages. This yields a SOMEWHAT CLASSICAL assessment rather than fully CLASSICAL.

Element 5: Faculty — SOMEWHAT CLASSICAL

- Evidence
- Public materials acknowledge a Faculty and Staff presence and a built-in structure around the school's mission and formation; however, explicit statements describing the faculty as the living curriculum or explicit portraits of teacher character as core to the school's ethos are less directly stated in the scraped public-footage pages. The presence of a faculty/staff page and the idea of teachers as mentors are implied by the general classical-education framing of the school; these elements align with the classical model but are not as explicitly described in the public pages as the idealized "living curriculum" concept. See the mention of "Faculty and Staff" in the site navigation and in the public-facing content surrounding mission and academics .
- Positive/Negative Keyword Analysis
- Positive keywords present: "faculty and staff," "mentors," "model teachers" (these are classical-education ideals; explicit textual claims about the faculty as the living curriculum are not strongly evidenced in the scraped pages). The presence of a formal faculty/staff section signals alignment with the category's expectations, but the stronger "living curriculum" articulation is not overtly present in the public content.
- Negative keywords present: no explicit negative signals about faculty practice observed in the public materials (no "facilitators" or non-classical teaching-identity terms appear in the public pages).
- Why this rating
- Given the public-facing content shows a formal faculty/staff structure and classical aims but lacks explicit, narrator-level claims about teachers as living curriculum or portraits of ideal faculty beyond the general mission framing, the Faculty category is best described as SOMEWHAT CLASSICAL.

Element 6: Parents & Community — CLASSICAL

- Evidence
- The school emphasizes parent partnership and involvement as part of its classical formation model. Public materials reference partnership with families, parental formation opportunities, and open visitation policies. Documents show "Partnership with Families," parental formation activities (book studies, gatherings), and "Parents are welcome to visit the school at virtually any time." This is consistent with classical education's emphasis on parents as co-educators and a family-centered pedagogy .
- Positive/Negative Keyword Analysis
- Positive keywords present: partnership with families, parent formation, parental involvement, home-school synergy, open campus, parent as co-teacher, family engagement, and ongoing parent education components. The public pages explicitly communicate these ideals and practices .
- Negative keywords present: none evident in public materials. The content does not frame parents in consumer terms; rather, it positions them as co-educators and participants in the school's ethos.
- Why this rating
- The school demonstrates strong alignment with the Community/Parents dimension by positioning parents as co-teachers and actively inviting parental involvement, meeting the CLASSICAL standard for Element 6.

Overall Ranking (Aggregate)

- Category scores:
- Element 1 — CLASSICAL

- Element 2 — CLASSICAL
- Element 3 — CLASSICAL
- Element 4 — SOMEWHAT CLASSICAL
- Element 5 — SOMEWHAT CLASSICAL
- Element 6 — CLASSICAL
- Aggregate assessment: CLASSICAL (the majority of categories reach CLASSICAL, with Pedagogy and Faculty showing partial alignment but still within the Classical framework; the overall profile remains CLASSICAL).

What Would Move the Needle

- For a SCHOOL that is already CLASSICAL overall, the main needle-moving moves would focus on solidifying Pedagogy and Faculty into full CLASSICAL alignment. Specifically:
- Pedagogy: Expand explicit documentation of Socratic/seminar-based pedagogy in upper grades and provide public-facing examples of Paideia-like seminars or structured dialectic curricula. This would move Pedagogy from SOMEWHAT CLASSICAL toward CLASSICAL by making the method explicit and consistently implemented across grades.
- Faculty: Elevate explicit statements about the faculty as the living curriculum and portraits of teacher excellence. Public materials could include statements about teacher development in classical pedagogy, mentor-models, and character formation as core teacher competencies.
- Enhanced direct citations of Great Books in classroom experiences and explicit articulation of Great Conversation moments across more grades would further align Curriculum and Pedagogy with classical norms.
- No substantial needle-moving changes are required in Religious Foundations, Purpose & Goals, Curriculum, or Community if the school maintains its current public messaging and curricular emphases.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
