

HUMANITAS
INSTITUTE

Six Elements of Classical Education School Website Audit

School: Wisdom & Truth Classical Academy

School Website: <https://wisdomatca.org/>

January 7, 2026

Artificial Intelligence Disclaimer

This audit was performed using artificial intelligence tools to evaluate the presence and strength of classical education principles on school websites. Results are automated, probabilistic in nature, and should be considered indicative rather than definitive. See the full disclaimer in the Appendix more details.

ACCS MEMBER

Any school that belongs to the Association of Classical Christian Schools (ACCS) is, by definition, recognized as a classical school because ACCS require adherence to the six essential elements defined by the Humanitas Institute. However, a school's website may not clearly reflect its conformity to one or more elements. In such cases, the school may still receive a "Somewhat Classical" rating for those elements. Schools can update their website content at any time to achieve a "Classical" rating for a given element.

Overall Classification: **CLASSICAL**

Executive Summary

Wisdom Truth Classical Academy (AR 72713) presents a clearly Christian, classical framing in public materials, with explicit emphasis on biblical truth, virtue, and wisdom. Public statements stress formation of character within a classical Christian framework and a communal aim to "glorify God." This yields strong Religious and Metaphysical Foundations and School Purpose & Goal signals (Categories 1 and 2), aligning with classical ideals in those dimensions.

However, the publicly available materials do not consistently foreground the explicit liberal-arts curriculum anchors (e.g., Great Books, Trivium/Quadrivium, Great Conversation) in the way the standard classical rubric expects. As a result, Element 3 (Curriculum) is only partially evidenced. Similarly, explicit pedagogy (Socratic dialogue, scholé, chanting, memory work), faculty living-curriculum portrayals, and formal parent/-community partnerships are not clearly documented in the public-facing content available in the crawl. Taken together, the school demonstrates several classical signals but does not meet the full, category-wide criteria in every dimension based on the available public materials. Overall assessment: **SOMEWHAT CLASSICAL**.

Key takeaway: WTCA is clearly rooted in a Christian classical ethos (Element 1 and Element 2 carry strong signals), but it lacks explicit, publicly stated evidence of the full liberal-arts curriculum structure, pedagogy, faculty portrayal, and parent/community partnering that would push it into **CLASSICAL** on every category. Concrete steps that would strengthen its case toward full **CLASSICAL** include explicit statements about Great Books/Great Conversation, articulation of Trivium/Quadrivium within the curriculum, publicly documented pedagogy (including Scholé and Socratic methods), a stated living-curriculum faculty model, and robust parent/community partnership initiatives.

What would move the needle (flagged for **SOMEWHAT CLASSICAL** schools)

- Publicly articulate a Great Books/Great Conversation program and explicitly name the Seven Liberal Arts (Trivium/Quadrivium) as core pillars of the curriculum, with explicit examples of texts and historical breadth.
- Describe pedagogy in more concrete classical terms (Socratic discussions, Scholé/restful learning, memorization/recitation, training in rhetoric) and provide examples from grade bands.
- Publish a clear "living curriculum" portrait of the faculty and a formalized, visible partnership with parents (co-teachers, home-school alignment, parent formation opportunities).
- Highlight explicit evidence of liturgical or communal practices as part of the school day or year, to meet the Liturgical & Communal Practices criterion.

ABSTRACT

: The school demonstrates a robust Christian/classical orientation anchored in virtue, wisdom, and biblical truth, yielding CLASSICAL signals in Categories 1 and 2. However, explicit evidence of full-classical curriculum structure (Great Books, liberal arts sequence), concrete pedagogy (Socratic/seminar-based, scholé), faculty-as-living-curriculum, and formal parent/community partnerships are not readily evidenced in the public crawl. Therefore, the aggregate classification is SOMEWHAT CLASSICAL, with clear opportunities to move toward a fuller CLASSICAL profile through targeted public articulation of curriculum structure, pedagogy, faculty portrayal, and parent-community engagement.

-

ABSTRACT (at end)

Notes on sources and methodology: The evaluation uses two vector-store sources: (1) a knowledge-base corpus containing classical-school criteria and the Six Essential Elements of a Classical School (1), including explicit Positive/Negative Keywords; (2) the school-specific crawl vector store containing Wisdom Truth Classical Academy's public site content. For Element 1, 2, and 3–6 the analysis cross-references public site content with Positive/Negative Keyword indicators from the "Six Essential Elements of a Classical School (1)" lexicon. See citations to the public WTCA content and the classical-education lexicon for the keyword mappings.

Executive Summary — Element-by-Element Snapshot

Element 1: Religious and Metaphysical Foundations — SOMEWHAT CLASSICAL

- Evidence
- WTCA publicly anchors its mission in biblical truths and the glory of God, describing a classical Christian education that forms character and prepares students to "think, speak, and live with wisdom and truth," and that grounds education in biblical truth and timeless virtue. The site proclaims "All to the Glory of God" and references Exodus 20:12, signaling explicit religious foundations.
- Positive/Negative keyword analysis
- Positive keywords present on site: truth, goodness, beauty, virtue, wisdom, theology, biblical truth, glory of God, sacred tradition, intentional formation. These align with the Positive Keyword indicators for Religious and Metaphysical Foundations (e.g., truth, goodness, beauty; theology; liturgy/worship concepts; virtue; wisdom). The site also uses phrases like "classical Christian education."
- Negative keywords: not evident in the public materials (no explicit secular-humanist, relativist, or values-neutral language observed).
- Why this rating
- The materials clearly assert transcendent truth and biblical/theological grounding with a communal, worshipful framing, satisfying most of the Religious/Metaphysical Foundations criteria. The "liturgical/-communal practices" element is less explicit in the public copy, but the strong theological framing and transcendental realism signals push Element 1 toward CLASSICAL, with a conservative interpretation here given the available evidence.

- Public WTCA content showing biblical/theological framing:
- Additional public WTCA content showing biblical truth and glory of God:
- Classically lexicon keyword anchors:

Element 2: School Purpose and Goal — CLASSICAL

- Evidence
- The site emphasizes formation of character and wisdom, stating: “classical Christian education that forms character, sharpens intellect, and prepares students to think, speak, and live with wisdom and truth.” This clearly aligns with the classical telos and formation-focused aim.
- Positive/Negative keyword analysis
- Positive keywords matched: formation, virtue, wisdom, liberal education phrasing (classical mission implied), telos (conceptual in intent), contemplation/rest. The lexicon lists formation, cultivation of virtue, liberal education, telos, and scholé as positive signals for this category; the WTCA language aligns with several of these.
- Negative keywords: not present (no explicit workforce-readiness or job-prep framing in the public copy).
- Why this rating
- The public materials foreground formation and virtue as primary educational goals and explicitly present a classical-Christian telos. This satisfies the core Criterion set for Element 2 and yields CLASSICAL signals for this category.

Citations:

- Public WTCA content (formation, wisdom, virtue):
- Classicality lexicon alignment:

Element 3: School Curriculum — SOMEWHAT CLASSICAL

- Evidence
- The public materials consistently describe a “classical Christian education,” but do not provide explicit details about liberal-arts structure (e.g., Seven Liberal Arts, Trivium/Quadrivium, Great Books, Great Conversation, or explicit Great Books reading programs) within the WTCA site text accessible in the crawl. The core copy emphasizes character formation and wisdom within a classical framework, but it does not enumerate the classic curriculum components in public-facing copy.
- Positive/Negative keyword analysis
- Positive keywords from the lexicon for Curriculum include: liberal arts, trivium (grammar, logic, rhetoric), quadrivium (arithmetic, geometry, music, astronomy), great books/original texts, Western civilization, history as a continuous thread, and wonder/integration. The WTCA page does not explicitly name these elements in the public crawl; the phrase “classical education” implies alignment but lacks explicit catalogs. Therefore, the presence of explicit keywords is limited, yielding a partial match.
- Negative keywords: not clearly observed in WTCA’s public copy (no direct substitution of “social studies” for history, no explicit STEM-first framing seen in the crawl, etc.).
- Why this rating
- WTCA projects a classical-Christian education ethos, but the absence of explicit public mentions of Great Books, the Trivium/Quadrivium, specific Great-Books curricula, or explicit Great Conversation language means it does not fully meet the Curriculum criteria in the public crawl. This yields a SOMEWHAT CLASSICAL rating, with an opportunity to strengthen explicit curricular articulation.

Citations:

- Public WTCA content (classical Christian framing but not listing Great Books/Trivium):
- Classicality lexicon Curriculum anchors:

Element 4: Pedagogy or Teaching Methods — NOT CLASSICAL (in this public crawl)

- Evidence
- The WTCA public materials emphasize a classical-Christian framing but do not publicly articulate specific Pedagogy methods (e.g., Socratic seminars, scholé, chanting/memory work, copybooks, or

rhetoric training) as a stated program in the crawl content. The front-page materials and program copy focus on formation and biblical/theological grounding rather than explicit pedagogy.

- Positive/Negative keyword analysis
- Positive keywords for Pedagogy include: Socratic dialogue, dialectic, narrations/recitation, chanting, singing, scholé (restful learning), seminar/Paideia, rhetoric exercises, and upper-school rhetoric/forensics. The WTCA crawl content does not publicly display these as named methods, reducing the positive keyword matches in this category. The lexicon marks these as strong signals for classical pedagogy; their absence in the crawl results in weaker alignment.
- Negative keywords (Pedagogy): experiential learning focus, project-based learning dominance, student-directed/constructivist approaches. The WTCA public copy does not foreground those tendencies; however, the absence of explicit classical-pedagogy language makes this category harder to classify as classical in the crawl.
- Why this rating
- Without explicit, publicly stated pedagogy aligned with classical methods (Socratic/dialogue-based seminars, scholé, memory work, rhetoric training), the Public Materials do not meet the Pedagogy criteria robustly. This yields a NOT CLASSICAL classification for this category based on the available public content.

Citations:

- Pedagogy keywords absence in WTCA crawl:
- Classical pedagogy lexicon anchors:

Element 5: School Faculty — NOT CLASSICAL

- Evidence
- The WTCA public site does not publicly present a “living curriculum” portrait of faculty, a formalized “faculty of friends,” or explicit teacher-mentorship culture in the crawl. The materials emphasize a Christian-classical mission and student formation but do not name a living-curriculum faculty model publicly in the crawl content available.
- Positive/Negative keyword analysis
- Positive keywords for Faculty include: tutors/masters/mentors, portrait of a teacher, faculty of friends, collegial culture, lifelong learners, moral exemplars, and “teacher training in classical pedagogy.” The WTCA crawl does not present these explicit faculty descriptors in the public material that’s crawled. The lexicon provides these as strong signals; their absence reduces the alignment for this category.
- Negative keywords: absence cannot be confidently asserted; nonetheless the explicit living-faculty portrait is not visible in the crawl.
- Why this rating
- The public materials do not demonstrate the living-curriculum/faculty-as-core elements in the Way-of-Teaching sense that the classical rubric expects. This yields a NOT CLASSICAL rating for Element 5 in the current crawl.

Citations:

- Element 5 absence in WTCA crawl:
- Faculty lexicon anchors:

Element 6: Parents & Community — NOT CLASSICAL

- Evidence
- The public WTCA crawl does not present explicit parent-partnership language (co-teachers with parents, parent formation: book studies, open-campus, etc.). The visible materials focus on the school’s mission and contact details but do not articulate a formal parental partnership program in the crawl.
- Positive/Negative keyword analysis
- Positive keywords for Parents & Community include: Partnership with families, parent formation, open campus, parent involvement, home-centered learning, living tradition in the family, etc. These terms

do not appear in the WTCA crawl content available in the current files. The lexicon provides strong positive signals for this category, but they are not evidenced publicly on the WTCA site snippet we have.

- Why this rating
- The public materials do not show the required Parent-Community partnership signals. This yields a NOT CLASSICAL rating for Element 6 as evidenced by absence of explicit parent/community language in the crawl.

Citations:

- Element 6 absence in WTCA crawl:
- Parent/community lexicon anchors:

What Would Move the Needle

- For Element 3 (Curriculum): Publicly articulate a concrete liberal-arts curriculum in the public-facing site, including explicit references to Trivium/Quadrivium, Great Books, Great Conversation, and a structured Great Books program, with sample texts and grade-level progression.
- For Element 4 (Pedagogy): Publish explicit pedagogy statements and examples (e.g., Socratic seminars, Scholé/restful learning, memory work/recitation, and rhetoric training) with sample lesson formats and anecdotes from actual classes.
- For Element 5 (Faculty): Publish a formal “Living Curriculum” portrait of faculties as mentors and exemplars, including a faculty-formation plan, professional development aligned to classical pedagogy, and a visible “faculty of friends” ethos.
- For Element 6 (Parents & Community): Document a robust Parent Partnership program (co-teaching roles, home-school alignment, parent formation programs, and open-campus events) and provide regular opportunities for parent involvement (book studies, gatherings, tours).
- Across all six categories, add explicit references to Great Books and the Great Conversation, and clearly map Great Books, the Seven Liberal Arts, and the Quadrivium to the daily schedule and annual offerings. This would elevate the curriculum and pedagogy profiles to CLASSICAL across more categories.

Appendix

ARTIFICIAL INTELLIGENCE DISCLAIMER

This audit was conducted using artificial intelligence tools (including large language models and automated web-analysis scripts) to evaluate the extent to which school websites reflect or incorporate recognized principles of classical education (e.g., the trivium, emphasis on truth/beauty/goodness, integration of great books, Latin/classical languages, Socratic method, rigorous academics, moral/character formation, etc.).

Important Limitations and Caveats

1. **Automated Nature:** The analysis relies on AI interpretation of publicly-accessible school website content as of the date of the audit. It does not involve direct contact with schools, review of internal documents, classroom observation, or verification of curriculum implementation beyond what is stated or implied on the website.
2. **Probabilistic Results:** Scores and assessments are probabilistic and reflect the AI's best interpretation of available text and site structure. They are not infallible and may miss nuance, context, or recent changes not yet reflected online.
3. **Subjectivity of Classical Education:** "Classical Education" encompasses a range of traditions and interpretations (e.g., Dorothy Sayers' trivium model, Classical Christian Education, Great Books programs, etc.). The Humanitas Institute Audit of the Six Elements of Classical Education uses a broad, consensus-based framework derived from prominent classical education organizations and thought leaders. Reasonable people may disagree on weighting or inclusion of specific criteria.
4. **No Official Endorsement or Certification:** Results do not constitute official endorsement, accreditation, or certification by any classical education organization. They are provided for informational and research purposes only.
5. **Potential for Error:** Websites may be incomplete, poorly worded, or temporarily inaccurate. Conversely, sophisticated marketing language may create false positives. Human review by parents, educators, or classical education experts is strongly recommended before drawing final conclusions about any school.
6. **Data Privacy and Ethics:** Only publicly available information was analyzed. No attempts were made to access password-protected areas or collect personal data.
7. **No Liability:** The authors, developers, and distributors of this audit assume no liability for decisions made on the basis of these results. Users are solely responsible for their own due diligence.

By reading or using this document, you acknowledge and accept the limitations described above.
